[Page 2: Legal Statements](#)

Product warranty or service will not be extended if: (1) the product is repaired, modified or altered, unless such repair, modification or alteration is authorized in writing by ASUS; or (2) the serial number of the product is defaced or missing.

[Page 3](#) GPS navigational software for ASUS R300 UK English August, 2007 (1.0) Copyright note The product and the information contained herein may be changed at any time without prior notification. This manual nor any parts thereof may not be reproduced or transmitted in any form either electronically or mechanically, including photocopying and recording, without the express written consent of ASUSTek Computer Inc..

[Page 4: Safety Notice](#)

Before using the device, carefully read the safety information below. When using the device, always follow the safety precautions to avoid any accident, personal injury or property damage due to improper operating. Configure the device settings before driving. Do not configure it while driving. The navigation may not be always in accordance with the actual locations and it's for your reference only. The map may not be exact the same with the actual locations and it's for your reference only. It is the user's responsibility to observe safe driving practice and the local laws of driving. Avoiding exposing the device to high temperature for long time. Mount the device in a cool dry place when it is not in use. While parking, keep the satellite navigation function enabled to ensure the satellite searching accuracy. Do not open or remove the internal

components by yourself or by unauthorized engineers. ASUS is not responsible for any device damage caused by the above situations. Avoid pressure that may damage the internal components. Use qualified battery only. Protect the display from scratch. Use fingers or a stylus to write on the screen. Do not apply any chemical when cleaning the display. Mount the device in a dry place and avoid environments where it may get wet. Remove the charger and power off the device before cleaning it. Shut the main power on the bottom of the device and contact your technical support staff immediately in the following situations: power cable is damaged, cover panels break, and the device is exposed to water or rain...

[Page 28: Getting Started With Asus Go](#)

1.1 Getting started with Asus GO Asus GO is optimised for in-car use. You can use it easily by tapping the screen buttons and the map with your fingertips. Asus GO can plan routes throughout the whole installed map set; you do not need to change maps or switch to a poorly detailed general map to navigate between map segments or countries.

[Page 29](#) First screen of Asus GO Asus GO starts by displaying the Navigation menu in Simple mode. The fastest way to find your destination and start navigating is tapping the button: You can select your destination the following ways (not all of them are available in Simple mode):
•...

[Page 30: Simple And Advanced Modes](#)

- Simple mode: you have easy access to the most important navigation functions and the basic settings only
- Advanced mode: you have access to the full functionality of Asus GO. To switch from Simple mode to Advanced mode from the startup screen (Navigation Menu),...

[Page 31](#) Type of action Navigating to a selected map point Navigating to a street address Navigating to an incomplete address Navigating to an intersection Navigating to recent destinations (History) Navigating to Favorites Navigating to a POI Navigating to coordinates Creating a multi-point route Saving a map point as a Favorite destination Saving a map point as a POI Saving a map point as a location of a...

[Page 32: Hardware Buttons](#)

Power on/off button. You can turn on or off the device at any time. When the device is switched off, Asus GO does not calculate your GPS position and it does not update the route or the driving instructions; it will calculate these data when it is turned on again.

[Page 33](#) Zooming in Change how much of the map Asus GO displays on the screen. Asus GO and out uses high-quality vector maps that let you see the map at various zoom levels, always with optimised content.

[Page 34](#) • When you are approaching a turn, Asus GO zooms in and raises the view angle to let you easily recognise your manoeuvre at the next junction. • If the next turn is at a distance, Asus GO zooms out and lowers the view angle to show you the road in front of you.

[Page 35: More Information](#)

1.1.1 Status information on the map (GPS, battery, etc.) The following icons show status information on the map in Asus GO: Icon Status for GPS position quality Battery Orientation
1.1.2 Using the Cursor You can perform the following actions with the location that you selected on the map (with the Cursor): •...

[Page 36: Using Keyboards](#)

- List the POIs near it
- 1.1.3 Using keyboards You only need to enter letters or numbers in Asus GO when you cannot avoid it. You can type with your fingertips on the full-screen keyboards and you can switch between various keyboard layouts, for example ABC, QWERTY, or numerical.

[Page 37: Asus Go Concepts](#)

Smart Zoom is a lot more than just a usual automatic zoom: • While following a route calculated by Asus GO: when approaching a turn, it will zoom in and raise the view angle to let you easily recognise your manoeuvre at the next junction.

[Page 38](#) 1.1.4 Selected location on the map (Cursor) If you tap the map, the Cursor appears at the selected point on the map. Asus GO displays the Cursor with a red dot and radiating red circles to make it visible at all zoom levels, even when it is in the background of a 3D map view.

[Page 39](#) GPS position. Note Even if you move the map while you are driving, Asus GO continues navigating if there is an active route: it plays the voice instructions and displays the

turn preview icons according to your actual GPS position.

Page 40 A simulation drives you through the route, following the driving instructions. You can use it, for example, to see which bridge Asus GO planned for the route; if you do not want to take that bridge, you can avoid it.

Page 41 1.1.10 Speed Cameras A speed camera is a special POI . Asus GO is not shipped with a built-in database of speed cameras, but you can also add more speed cameras by marking their positions on the map. 1.1.11 Speed limit warnings Maps sometimes contain information about the speed limits of the road segments.

Page 42: Navigating With Asus Go

1.1 Navigating with Asus GO You can set up your route in Asus GO in several ways: • if you need a simple route (a route with only one destination, without any intermediary waypoints), you can select the destination and start navigating to it right away •...

Page 43 1.1.1 Selecting the Cursor as the destination Find your destination on the map: move the map, tilt it, etc. as needed. Tap the location that you want to select as your destination. to open the Cursor menu. Tap the button (Simple mode). The map appears with the selected point in the middle.

Page 44 The procedure is explained starting from the Navigation menu. Tap the following buttons: (Advanced mode). By default, Asus GO proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list.

Page 45 Tap the button after a couple of letters; Asus GO lists the items that contain the character set. button to finish entering the address. (Advanced mode) from the Cursor menu. The route is then...

Page 46 2.2.1.2.2 Tips on entering addresses quickly • When you are entering the name of a settlement or a street, Asus GO only displays those characters that appear in possible search results. The other characters are greyed out. • You can speed up finding an intersection: •...

Page 47 To select the settlement from the list of recently used ones, tap the Tap the button with the name of the settlement, or if you have changed the country/state, tap Start entering the settlement name on the keyboard. Get to the hit list: •...

Page 48 The procedure is explained starting from the Navigation menu. Tap the following buttons: (Advanced mode). By default, Asus GO proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list.

Page 49 To change the settlement: Tap the button with the name of the settlement, or if you have changed the country/ state, tap Start entering the settlement name on the keyboard. Get to the hit list: • After entering a couple of characters, the hits that match the string appear in a list. •...

Page 50 By default, Asus GO proposes the country/state and settlement where you are. If needed, tap the button with the name of the country/state, and select a different one from the list. Tap the button with the name of the settlement, and enter the postal code: Start entering the code on the keyboard.

Page 51 Enter the house number on the keyboard. Tap the The map appears with the selected point in the middle. Tap mode) or then automatically calculated, and you can start navigating. 1.1.1 Selecting the destination from your Favorites You can select as your destination a location that you have already saved as a Favorite. For instructions on how to create a Favorite, see the relevant section.

Page 52 1.1.1 Selecting the destination from the POIs You can select your destination from the POIs included with Asus GO or from the ones you have previously created. For instructions on how to create a POI, see relevant section. The procedure is explained starting from the Navigation menu.

[Page 53](#) 1.1.1 Selecting the destination or a waypoint from the History The destinations that you have set earlier appear in the History. The procedure is explained starting from the Navigation menu. Tap the following buttons: (Advanced mode). If necessary, turn the page to see earlier destinations with the arrow buttons. Tap the desired item.

[Page 54: Creating A Multi-Point Route](#)

Select the coordinate system: tap WGS84 or UTM. Enter the coordinate values: • In UTM: the latitude (N or S) and the longitude (E or W) • In WGS84: the number and the letter of the zone, and the X Y coordinates Tap the The map appears with the selected point in the middle.

[Page 55: Watching The Simulation Of A Route](#)

• Tap to add the point as a new final destination demoting the previous one to the last intermediary destination. [optional] To add more points to the route, repeat the above steps as many times as you like. Every time a new point is added, the route is recalculated automatically, and you can start navigating right away.

[Page 56: Pausing The Active Route](#)

1.1.1 Pausing the active route You do not need to pause the active route: when you start driving again, Asus GO restarts the voice instructions from your position. 1.1.1 Deleting the active route This feature is available in Advanced mode only. The procedure is explained starting from the Cockpit screen.

[Page 57: Saving A Route](#)

This feature is available in Advanced mode only. When you save a route, Asus GO only saves the waypoints: • If you updated your map since you first saved the route, Asus GO calculates the driving instructions according to the latest available map information.

[Page 58: Loading A Saved Route](#)

Saving a multi-point route Tap the following buttons: Enter a name for the saved route, and then tap 1.1.1 Loading a saved route This feature is available in Advanced mode only. The procedure is explained starting from the Cockpit screen. Tap the following buttons: Tap the route you wish to navigate.

[Page 59: Reference Book \(Advanced Mode\)](#)

1.1 Reference book (Advanced mode) Asus GO starts with the Navigation menu. From there you can access the following screens: Screen Button The map. Find Setting the destination (for example from an address or a POI) or using the search engine of Asus GO.

[Page 60: Map](#)

1.1.1 Map Asus GO is primarily intended for land navigation. That is why maps in Asus GO look similar to paper road maps. However, Asus GO provides much more than regular paper maps: you can customise the look and the content of the map.

[Page 61](#) Name Active? Simulation control Zoom in, zoom out Cursor (selected map location) Map view modes Current speed limit Volume control Tilt up, tilt down Rotate left, rotate right Current street Active route Scale Show the Panel Open the Menu TMC status Map orientation Return to GPS position Battery status...

You can select your destination from the thousands of POIs included with Asus GO or from the ones you have previously created. The destinations that you have already entered in Asus GO are available in the History list. You can select your destination by entering its coordinates.

[Page 64](#) • whether dynamic volume is on When you are driving at a high speed, the noise in

the car might be too loud and you might not be able to hear the voice instructions and warnings. If you turn on Dynamic Volume, Asus GO increases the volume when your speed exceeds a certain limit. • loudness of the voice instructions •...

[Page 65: Route Calculation Method](#)

Combines the benefits of Fast and Short: Asus GO calculates as if it were calculating the Fast route, but it takes other roads to save petrol. Easy Results in a route with fewer turns. With this option, you can make Asus GO to take, for example, the motorway instead of series of smaller roads or streets. Description...

[Page 66](#) Note When you exclude a road type, you set only a preference. Asus GO will still include such roads in the routes when it cannot plan a route to your destination in any other way.

[Page 67](#) By default Asus GO includes toll roads (pay roads where you can purchase a pass or vignette to use the road for a longer period of time) in the routes. If you disable toll roads, Asus GO plans the best toll-free route.

[Page 68: Glossary](#)

GPS position but the accuracy is lower and the GPS device does not give you elevation data: only 2D reception is feasible. In Asus GO, you can see the GPS position quality on the GPS Data Screen. 2D and 3D GPS reception have nothing to do with the 2D and 3D display modes of the map, which are ways of showing the map on the screen independently of the quality of the GPS reception.

[Page 69: Gps Accuracy](#)

(from one via point to another). Scheme Asus GO comes with different colour schemes for the map for the daylight or night use. Schemes are custom graphic settings for the map and they can have different colours for streets, blocks or surface waters in 2D and 3D modes, and they display shades or shadows in different ways in 3D mode.

[Page 70: Speed Camera](#)

Speed Camera A special POI type. Asus GO is shipped with a built-in database of fixed and mobile speed cameras but you can also mark the position of a speed camera on the map. You can configure Asus GO to warn you when you approach a speed camera.
