Air jets 2. LED spotlight 3. Overflow 4. Drain 5. Control button Electrical parameters: Voltage 220 V...

[Page 4](#) Attention! All electrical connections must be made by a certified electrician in accordance with the requirements of national electrical codes and procedures. 4. Connection preparation The following measures are an example. All dimensions required for proper installation should be taken directly from the product. Note: The fitting is recommended to be installed in the area marked in blue in the diagram.

[Page 5: Installation](#)

5. Installation As shown in the picture below, turn the tub over, wrap the tub hole with PTFE tape and then screw in the siphon. Turn the bathtub around. Move the bathtub to the right place in your bathroom; put the siphon in the drain and seal it. Adjust the feet of the bath so that the bath is horizontal and level.

[Page 6: Operation](#)

6. Operation • To turn on the air jets and the LED spotlight, simply press the button on the edge of the bath. • To turn off the functions, press the button again. 7. Cleaning and maintenance 1. Use generic liquid detergent and a soft cloth for daily cleaning. Do not use detergent with acetone, ammonia or strong water.

[Page 7](#) 8. PRECAUTIONS 1. Installation must be performed by a qualified technician in accordance with the requirements of national electrical codes and procedures. 2. There must be a RCCB and MCB in the installation. Make sure the ground wire is properly installed. 3.
