[Page 2: Safety Precautions](#)

Safety Precautions The following safety precautions will increase the life of the Disney Netpal. Follow all precautions and instructions. Except as described in this manual, refer all servicing to qualified personnel. Disconnect the AC power before cleaning. Wipe the Disney Netpal using a clean cellulose sponge or chamois cloth dampened with a solution of nonabrasive detergent and a few drops of warm water and remove any extra moisture with a dry cloth.

[Page 3: Powering On Your Disney Netpal](#)

Powering on your Disney Netpal These are only quick instructions for using your Disney Netpal. Connect the AC power adapter Turn ON the Disney Netpal • When you open the display panel, do not force it down to the table or else the hinges may break! Never lift the Disney Netpal by the display panel! •...

[Page 4: First-Time Startup](#)

First-time Startup For the first time you start your Disney Netpal, the Windows wizard will launch automatically and lead you through setting up your preferences and some basic information. Follow the wizard instructions to finish the initialization: The Welcome message appears.

[Page 5: Parental Control](#)

Disney Netpal, including programs which they can and cannot use and a safe environment for your children when they go online. For service and support, visit our multi-language web site at <http://support.asus.com>. Setting the master password and creating an account Double-click the Parental Control icon on the desktop to start the program.

[Page 6: Wireless Network Connection](#)

Wireless network connection Double-click the crossed wireless network icon Notification area. If the wireless connection icon does not show in the Notification area. Activate the wireless LAN function by pressing (<Fn> + <F2>) before configuring a wireless network connection. Select the wireless access point you want to connect to from the list and click Connect to build the connection.

[Page 7: Wired Network Connection](#)

Wired network connection To establish a wired network, follow the instructions below: Using a dynamic IP: Right-click the network icon with a yellow warning triangle Windows® taskbar and select Open Network Connections. Right-click Local Area Connection and select Properties. Click Internet Protocol (TCP/IP) and click Properties.

[Page 8](#) Using a static IP: Repeat the step 1-3 of Using a dynamic IP to start the static IP network configuration. Click Use the following IP address. Enter the IP address, Subnet mask and Gateway from your service provider. If needed, enter the preferred DNS Server address and alternative address.
