1-9 Indoor Fan Performance

Concealed Duct High Static Pressure Type

How to Read the Diagram

The vertical axis is the EXTERNAL STATIC PRESSURE (mmAq) while the horizontal axis represents the AIR FLOW (m

³/minute). The characteristic curve for the "H", "Med", and "Lo" fan speed control.

The name plate values are shown based on the "H" air flow. Therefore in the case of the 25 type the flow is 23 m minute, while the EXTERNAL STATIC PRESSURE is 19 mmAq at "H" position. If the external static pressure is too great (due to long extension of duct, for example), the air flow volume may drop too low at each air outlet.
