[Page 17: Connecting The Ac Power Cord](#)

Installation Connecting the AC Power Cord This projector uses nominal input voltages of 100-120 V or 200-240 V AC and it automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. If you are not sure of the type of power being supplied, consult your authorized dealer or service station.

[Page 18: Basic Operation](#)

Basic Operation Turning On the Projector Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector. Connect the projector's AC power cord into an AC outlet. The POWER indicator lights red. Open the lens cap (see pages 8, 61). Press the ON/STAND-BY button on the top control or on the remote control. The POWER indicator The preparation display will disappear lights green and the cooling fans start to operate. The after 30 seconds.

[Page 19](#) Basic Operation Enter a PIN code Use the Point buttons to enter a number. Press the PIN Code Input Dialog Box Point button to fix the number and move the red frame pointer to the next box. The number changes to "*". If you fixed an incorrect number, use the Point button to move the pointer to the number you want to correct, and then enter the correct number.

[Page 20: Turning Off The Projector](#)

Basic Operation Turning Off the Projector Press the ON/STAND-BY button on the top control or on the remote control, and Power off? appears on the screen. Press the ON/STAND-BY button again to turn off the projector. The POWER indicator starts to blink red, and the cooling fans keep running. (You can select the level of fans' quietness and speed. See "Fan" on page 56.) Power off? disappears after 4 seconds. At this time, you can unplug the AC power cord even if the fans are still running. When the projector has cooled down enough, the POWER indicator stops blinking and you can turn on the projector.

[Page 21: How To Operate The On-Screen Menu](#)

Basic Operation How to Operate the On-Screen Menu The projector can be adjusted or set via the On-Screen Top Control Menu. The menus have a hierarchical structure, with a main menu that is divided into submenus, which are further divided into other submenus. For each adjustment and setting procedure, refer to respective sections in this POINT buttons (arrowhead)

[Page 22: Menu Bar](#)

Basic Operation Menu Bar For detailed functions of each menu, see "Menu Tree" on pages 68-69. Main Menu Sub-Menu Input Used to select an input source from Computer 1, Computer 2, Video or S-video . (pp.27-28,37-38). In this condition, the projection lamp will be turned on if the input signal is reconnected or any button...

[Page 52](#) Setting On start When this function is set to On, the projector will be automatically turned on just by connecting the AC power cord to a wall outlet. ✓ Note: Be sure to turn off the projector properly (see "Turning Off the Projector" on page 20). If the projector is turned off in the incorrect sequence, the On start function does not work properly. Standby mode This function is available when operating the projector via network.

[Page 53](#) Setting Lamp life control Lamp control Lamp control This function allows you to change brightness of the screen. Normal .. Normal brightness Eco Lower brightness reduces the lamp power consumption and extends the lamp life. Lamp life control Select the lamp operation when the total lighting time of a lamp exceeds the recommended total hours of use. Mode 1 The lamp can be turned on even after exceeding the recommended total hours of use. Mode □ The lamp can be turned on even after exceeding the recommended total hours of use. But the projector turns off automatically after 3 minutes. ✓ Note: • Lamp mode cannot be changed for a while after turning on the projector. Lamp needs some time to stabilize after the power is turned on. Stored lamp mode will be active after the lamp is stabilized. • If Mode □ has been selected and the projection lamp exceeds the recommended total hours of use, the replacement icon will be displayed at the time of power...

[Page 54](#) Setting Key lock Security (Key lock and PIN code lock) This function allows you to use the Key lock and PIN code lock function to set the security for the projector operation. Key lock This function locks the top control and remote control buttons to prevent operation by unauthorized persons. Select Key lock and then press the SELECT button, and select the desired item by pressing the Point buttons .. Unlocked.. Lock the operation of the top control. To unlock, use the remote control.. Lock the operation of the remote control. To unlock, use the top control. If the top control accidentally becomes locked and you do not have the remote control nearby or there is something wrong with your remote control, contact the dealer where you purchased the projector or the service center. PIN code lock This function prevents the projector from being operated by unauthorized persons and provides the following...

[Page 55](#) Setting Enter a PIN code Enter a PIN code Use the Point buttons to enter a number. Press the Point button to fix the number and move the red frame pointer to the next box. The number changes to "*". If you fixed an incorrect number, use the Point button to move the pointer to the number you want to correct, and then enter the correct number. Repeat this step to complete entering a four-digit number. After entering the four-digit number, move the pointer to "Set." Press the SELECT button so that you can change the following PIN code lock

setting. If you entered an incorrect PIN code, PIN code and the number (****) will turn red for a moment. Enter the correct PIN code all over again.

[Page 56](#) **Setting** This function provides the following options in the cooling fans' operation when the projector is turned off (p.20). L1 ..Normal operation L2 ..Slower and lower-sound than the normal operation (L1), but it takes more time to cool the projector down. Fan control This projector provides Fan control function in the Setting menu. Choose the running speed of cooling fans from the following options according to the ground elevation under which you use the projector. Off...Normal speed. Set this function to Off when using the projector in non-high altitude environment. On 1..... Faster than Off mode. Select this mode when using the projector in high altitudes (about 1,200 meters or more above the sea level) where the fans have less cooling effect. On 2..... Faster than On 1 mode. Select this mode when using the projector in higher altitudes than above where the fans have lesser cooling effect. ✓ Note: The fan noise becomes louder in On 1 and On 2. Filter counter Filter counter This function is used to set a frequency for the filter cleaning.

[Page 57](#) **Setting warning log** This function records anomalous operations while the projector is in operation and use it when diagnosing faults. Up to 10 warning logs are displayed with the latest warning message at the top of the list, followed by previous warning messages in chronological order. ✓ Note: When the Factory default function is executed, all the warning log records will be deleted. Factory default This function returns all setting values except for the User Factory default logo, PIN code lock, Logo PIN code lock, Lamp counter and Filter counter to the factory default settings.

[Page 58: Information](#)

Information Input Source Information Display The Information Menu is used for checking the status of the image signal being projected and the operation of the projector. Direct Operation Press the INFO. button on the remote control to display the Remote Control Information Menu. INFO . button Menu Operation Press the Point buttons to select the Information. The Information Menu is displayed. See below for displayed information. Input Information Menu The selected input source is displayed. H-sync freq . The horizontal frequency of the input signal is displayed in KHz, or - - - - KHz when no signal. V-sync freq . The vertical frequency of the input signal is displayed in Hz, or - - - - Hz when no signal. Numbers of Hz doubles when during Interlace.

[Page 59: Maintenance And Cleaning](#)

Maintenance and Cleaning WARNING indicator The WARNING indicator shows the state of the function which protects the projector. Check the state of the WARNING indicator and the POWER indicator to take proper maintenance. The projector is shut down and the wARNING Top Control indicator is blinking red . When the temperature inside the projector reaches a WARNING blinking certain level, the projector will be automatically shut down to protect the inside of the projector. The POWER indicator is blinking while the projector is being cooled down. When the projector has cooled down enough (to its normal operating temperature), it can be turned on again by pressing the ON/ STAND-BY button.

[Page 60: Cleaning The Filters](#)

Maintenance and Cleaning Cleaning the Filters Filter prevents dust from accumulating on the optical elements inside the projector. Should the filters become clogged with dust particles, it will reduce cooling fans' effectiveness and may result in internal heat buildup and adversely affect the life of the projector. If a "Filter warning" icon appears on the screen, clean the filters immediately. Clean the filters by following the steps below.

[Page 61: Attaching The Lens Cap](#)

Maintenance and Cleaning Attaching the Lens Cap When moving this projector or while not using it over an extended period of time, replace the lens cap. Attach the lens cap according to the following procedures. Thread the string through the hole on the lens cap and then tie a knot in the string to secure it in place. To pass the other end of the string into the hole on the top of the projector and pull at it. **Cleaning the Projection Lens** Unplug the AC power cord before cleaning. Gently wipe the projection lens with a cleaning cloth that contains a small amount of non-abrasive camera lens cleaner, or use a lens cleaning paper or commercially available air blower to clean the lens.

[Page 62: Lamp Replacement](#)

Maintenance and Cleaning Lamp Replacement When the projection lamp of the projector reaches its end Top Control of life, the Lamp replacement icon appears on the screen and LAMP REPLACE indicator lights yellow. Replace the LAMP REPLACE lamp with a new one promptly. The

timing when the LAMP indicator REPLACE indicator should light is depending on the lamp mode.

[Page 63](#) Maintenance and Cleaning ORDER REPLACEMENT LAMP Replacement lamp can be ordered through your dealer. When ordering a projection lamp, give the following information to the dealer. ● Model No. of your projector : PLC-XU300A, PLC-XU350A Replacement Lamp Type No. : POA-LMP131 ● (Service Parts No. 610 343 2069) LAMP HANDLING PRECAUTIONS This projector uses a high-pressure lamp which must be handled carefully and properly. Improper handling may result in accidents, injury, or create a fire hazard. Lamp life may differ from lamp to lamp and according to the environment of use. There is no guarantee ● of the same life for each lamp. Some lamps may fail or terminate their life in a shorter period of time than other similar lamps. If the projector indicates that the lamp should be replaced, i.e., if the LAMP REPLACE indicator lights ●...

[Page 64: Appendix](#)

Appendix Troubleshooting Before calling your dealer or service center for assistance, check the items below once again. - Make sure you have properly connected the projector to peripheral equipment as described on pages 14-16. - Make sure all equipment is connected to AC outlet and the power is turned on. - When the projector does not project an image from the connected computer, restart the computer. Problem: - Solutions No power - Plug the power cord of the projector into the AC outlet. - See if the POWER indicator lights red. - Wait until the POWER indicator stops blinking to turn on the projector again. The projector can be turned on after the POWER indicator turns red. See page 18. - Check the WARNING indicator. If the WARNING indicator lights red, projector cannot be turned on. See page 59. - Check the projection lamp. See page 62. - Unlock the Key lock function for the projector. See page 54. The initial display is not shown. - Make sure Off or Countdown off are not chosen at display function. See page 46. The initial display is not same - Make sure User or Off are not chosen at Logo (select) as the default set.

[Page 65](#) Appendix No image - Check the connection between your computer or video equipment and the projector. See pages 14-16. - See if the input signal is correctly output from your computer. Some laptop computers may need to change the setting for monitor output when connecting to a projector. See your computer's instruction manual for the setting. - It takes about 30 seconds to display an image after turning on the projector. See page 18. - Check the Input signal, color system, video system or computer system mode. - Make sure the temperature is not out of the specified Operating 41°F-95°F [5°C-35°C] Temperature (- When No Show is operating, the image cannot be displayed. Press the NO SHOW button or any other button on the remote control. No sound - Check the audio cable connection from audio input source. - Adjust the audio source. - Press the Volume + button. See page 24. - Press the Mute button. See page 24. - When the AUDIO OUT is plugged-in, the projector's built-in speaker is not available. - Is the image projected? You will hear the sound only when the image is projected. The color is strange. - Check the Input signal, color system, video system or computer system mode. - Make sure the Blackboard is not selected on Image select menu. See pages 33,40.

[Page 66](#) Appendix The image is distorted or runs off. - Check PC adjust menu or Screen menu and adjust them. See pages 31-32, 35-36. PIN code dialog box appears - PIN code lock is being set. Enter a PIN code (the "1234" or numbers at start-up you have set). See pages 19, 54-55. The Remote Control does not work. - Make sure no obstruction is between the projector and remote control. - Make sure you are not too far from the projector when using the remote control. Maximum operating range is 16.4'(5 m). - Make sure the code of the remote control is conformed to the projector's code. See page 53. - Unlock the Key lock function for the remote control function. See page 54.

[Page 67](#) Appendix WARNING : High voltages are used to operate this projector. Do not attempt to open the cabinet. If problems still persist after following all operating instructions, contact the dealer where you purchased the projector or the service center. Specify the model number and explain about the problem. We will advise you how to obtain service. This symbol on the nameplate The CE Mark is a Directive conformity means the product is Listed mark of the European Community (EC).
