UltraMobilePC

Front Side

Refer to the diagram below to identify the components on this side of the UltraMobilePC.

Display Panel

The display panel functions the same as a desktop monitor. The UltraMobilePC uses an active matrix TFT LCD, which provides excellent viewing like that of desktop monitors. Unlike desktop monitors, the LCD panel does not produce any radiation or flickering, so it is easier on the eyes. Use a soft cloth without chemical liquids (use plain water if necessary) to clean the display panel.

Camera

The built-in camera allows picture taking or video recording. Can be used with video conferencing and other interactive applications.

Microphone (Built-in)

The built-in mono microphone can be used for video conferencing, voice narrations,

or simple audio recordings.

Thumbstick Cursor Control

The thumbstick cursor control with its left and right cursor buttons is a pointing device that provides the same functions as a desktop mouse.
