[Page 3](#) · Ricordi di chiedere il “Manuale d’installazione” al costruttore (o rivenditore). Gracias por adquirir el juego de bomba de desagüe para el aparato de aire acondicionado TOSHIBA. Lea este manual de instalación atentamente antes de utilizar el aparato de aire acondicionado.

[Page 4](#) CONTENTS Precautions for Safety 1 Drain piping5 Components2 Wire Connecting 5 Installing Drain pump kit3 Test Run6 Installing the Attachment plate3 Check the Draining6 Hose Connecting 4 SOMMAIRE Précautions de sécurité...

[Page 5](#) Precautions for Safety • Read this “Precautions for Safety” carefully before installation. • The precautions described below include the important items regarding safety. Observe them without fail. • After the installation work, perform a trial operation to check for any problem. •...

[Page 6](#) Components Installable Model Concealed Duct High Static Pressure Type indoor unit MMD-AP0721H, AP0961H Components Part name Q'ty Shape Part name Q'ty Shape Drain pump unit Support bracket Tapping screw Fixture plate for (Ø4 × 10) Drain pump unit (spare 1) spare 1 Inlet drain pipe Hexagon bolt with...

[Page 7](#) Installing Drain pump kit • Unscrew the two screws on the left of the air conditioner, and secure the fixture plate for the Drain pump unit using the two screws aligning the hole positions. • Attach the Drain pump unit top plate to the air conditioner using the support bracket (Use the attached tapping screws and the air conditioner screws.) •...

[Page 8](#) Hose Connecting CAUTION Be careful not to damage the Drain pump kit hose during handling before extending it because it passes under the unit. REQUIREMENT Be sure to fix the center of the hose to the air conditioner cabinet with the fixture band to install a drain trap.

[Page 9](#) Drain piping • Be sure to tilt downward the drain pipe from the outlet drain pipe of the Drain pump unit. (Support and secure the drain pipe so that it will not loose or slack to avoid stress to the outlet drain pipe.) •...

[Page 10](#) Test Run Checking drain status Run the air conditioner in cooling mode after completion of electrical work and piping construction, and check smooth draining. • If long-time cooling is disabled, fill the drain pan of the air conditioner with water, and check for smooth draining.
