Most instructions are based on remote control operation,  
unless otherwise noted. You can use the buttons on the  
remote control and those on the main unit as well when  
they have the same function.

If copy protection signal is detected during  
recording on this recorder, the recording  
automatically pauses and a message appears. In  
this case, the PAUSE button cannot release the  
recording. (It is possible to end the recording by  
pressing the STOP button.) If the copy protection  
signal continues, the recording will terminate.
