[Page 30: Alarm Recording](#)

ALARM RECORDING If an alarm condition arises, the alarm function operates with an alarm input signal. Operation at Alarm Input When there is an alarm during recording, recording pause or stop modes, the VCR automatically goes into alarm recording mode. The VCR can be programmed to record in the following time modes during alarm recording: A2, A6, A12, A18, A24.

[Page 31](#) Connecting the Alarm Terminals Connecting the ALARM IN/OUT terminals Warning • When the alarm switch is ON, alarm recording starts. It is possible to confirm the warning from outside by connecting the switching input of external interface devices such as alarm lamp or alarm buzzer to the alarm output. Please do not use the alarm output for power source to any of external devices.

[Page 32](#) Setting the Alarm Recording Press the DISPLAY button. TIME MODE DISPLAY - TRACKING SHIFT LOCATION SELECT Press the SHIFT button to blink SETUP and press the + SET button. TIME MODE DISPLAY - TRACKING SHIFT LOCATION SELECT Press the + SET button to set the alarm recording time.

[Page 33: One Shot Recording](#)

ONE-SHOT RECORDING It is possible with this VCR to carry out one-shot recording to record only when there is a trigger input from outside or for use as a data file. If a trigger is input to the one-shot input on the back, there will be recording for the field numbers set at the time interval set.

[Page 34](#) Press the SHIFT button to make INTERVAL blink. Press the + SET button to set the time interval between the individual recording fields. TIME MODE DISPLAY - TRACKING SHIFT LOCATION SELECT Each time pressing the + SET button, the display changes as follows.

[Page 35: Setting Of Operation After Tape End Detection](#)

OPERATION AFTER TAPE END DETECTION The VCR can be programmed to respond differently when the tape reaches its end. The following describes how to set the different modes of operation. How to Set to Stop at End of Tape Press the DISPLAY button.

[Page 36: Auto Rewind After Recording](#)

The VCR can be programmed to automatically rewind the tape when the tape reaches its end. How to Set to Auto Rewind at End of Tape Press the DISPLAY button. TIME MODE DISPLAY - TRACKING SHIFT LOCATION SELECT Press the SHIFT button to blink SETUP and press the + SET button.

[Page 37: Repeat Recording](#)

The VCR can be programmed to automatically restart recording when the tape reaches its end. With this function, the VCR will automatically rewind the tape and begin recording. How to Set to Repeat Record at End of Tape Press the DISPLAY button.

[Page 38: Recording With The Sequential Switcher](#)

RECORDING WITH THE SEQUENTIAL SWITCHER This VCR can work with a sequential switcher connected for recording. Connection with the Sequential Switcher For detailed operations and connections of the switcher, consult the Instruction Manual of the sequential switcher. Timing for Camera Switching In case of using the sequential switcher for 4 channels (and recording for A18 hours);...

[Page 39](#) REC Trigger Output Selection in the Alarm Recording REC Trigger output can be selected during the alarm recording. Press the DISPLAY button. TIME MODE DISPLAY - TRACKING SHIFT LOCATION SELECT Press the SHIFT button to blink SETUP. TIME MODE DISPLAY -...

[Page 40: Playback Operation](#)

[Page 46: Daily And Periodic Inspection](#)

DAILY AND PERIODIC INSPECTION This VCR has been designed to stand the use over long periods. Nevertheless, we recommend you to carry out regular daily inspection to insure problem-free use. Note: It is particularly important to carry out daily checks when using the VCR for repeat recording. Order of Daily Checks Turn the power ON for this VCR and for the

connected devices in the surveillance system including the video...

[Page 47](#) Steps to Take after Daily Checks If an abnormality is found, turn the power switch to OFF and remove the power plug from the household AC outlet. Then consult with your dealer. A Request for Periodic Checks This VCR includes a time gauge to display the total usage time.

[Page 48: Cautions During Use](#)

CAUTIONS DURING USE Dew Condensation This VCR includes a safety function to prevent operation when dew condensation occurs and thus protects against damage to tapes, the video heads and other parts. i i i i What is condensation? If you pour cold beer in a glass, water droplets gather on the surface of the glass.

[Page 49: Before Calling Service Personnel](#)

BEFORE CALLING SERVICE PERSONNEL If you suspect a breakdown, check the following points before calling your serviceman for follow-up service. Installation Power does not go ON. There is no camera picture. The camera picture is indistinct. Function/Operation The VCR does not operate even when the control buttons are pressed.

[Page 50](#) Playback There is excessive noise in the playback picture. The playback picture is not clear. The time-lapse mode playback picture or still playback shakes up and down. Two recorded sections appear in the playback picture when using several video cameras and changing cameras.
