11. Schedule Timer (SHA-TM64AG(B))

Important Information to Remember

1. Schedule Timer and Air Conditioner Operation

Air conditioners operate either according to operations programmed from the schedule timer (starting/stopping and remote control operation enable/disable) or according to a connected remote controller or system controller.

Schedule timer settings (Example)

Operation without system controller operation

If remote controller operation is enabled, the air conditioner can be started/stopped from the remote

controller.
 (The air conditioner responds to the most recently pressed button.)
 Air conditioner operation

Remote controller operation

Operation with system controller operation
 If remote controller operation is enabled, the air conditioner can be started/stopped from the remote controller.
 (The air conditioner responds to the most recently pressed button.)
 The remote controller operation enable/disable set from the system controller (Centralized control 1 to 4) is canceled according to programmed operations.

- *1 Whether remote controller operation is enabled or disabled depends on the setting of the previous day.
- *2 Since remote controller operation is disabled, operation remains disabled.
- *3 The remote controller remains disabled the next day and thereafter until it is enabled in the remote controller operation enable/disable setting.

- *1 Whether remote controller operation is enabled or disabled depends on the setting of the previous day.
