<u>Page 6</u> Canadian Department of Communications Statement This digital apparatus does not exceed the Class B limits for radio noise emissions from digital apparatus set out in the Radio Interference Regulations of the Canadian Department of Communications. ASUS PCI-DA2100 User's Manual...

<u>Page 7</u> 1. Introduction 1. Introduction The ASUS PCI-DA2100 is a PCI to SCSI RAID controller specifically designed to provide RAID 0, 1, 3 or 5 capability to any host system equipped with Little Endian PCI Local Bus interface. All the RAID functions of ASUS PCI-DA2100 are per- formed by a 486 CPU coupled with high-speed DRAMs and firmware in Flash Memory.

Page 8 Uses 486 CPU with all executable firmware downloaded into high-speed DRAM. • BIOS INT 13 support. • Flash EEPROM for easy firmware and BIOS upgrading. • Up to 32 MBytes of intelligent Read-Ahead/Write-Back cache. • EDO RAM support for enhanced performance. ASUS PCI-DA2100 User's Manual...

Page 11 3. Hardware Installation 3.2. Installing DRAM SIMM IMPORTANT: The ASUS PCI-DA2100 requires a minimum of 2 MBytes of DRAM in one SIMM (with or without parity function) installed in SIMM socket to operate. The controller is normally delivered without any DRAM installed. <u>Page 12</u> • SCSI nodes on the same channel have unique ID number. The SCSI ID 7 is reserved for the ASUS PCI-DA2100 adapter and thus no drives should use ID7. • Both ends of all SCSI cables are properly terminated. Disable the termination of channel-0 and enable the termination of channel-1 •...

Page 13 In the event of a disk failure, disk access will continue normally with the failure transparent to the host system. The ASUS PCI- DA2100 will announce a disk failure with a repeated two-beep sequence over the speaker on the ASUS PCI-DA2100.

Page 14 "Scan" in as a new drive and then assigned as a spare drive of the logical drive. Data rebuilding will have to be manually initiated as instructed in the following section. 4.3. Data Rebuilding Via Text RAID Manager Data rebuilding can be done through running RAIDMAN.EXE under DOS. ASUS PCI-DA2100 User's Manual...

Page 27 This manual describes both the software drivers and utilities for All of ASUS PCI to SCSI RAID controllers. The ASUS PCI-DA2000 Series Controller will represent following products:

Page 28 2. Text RAID Manager and RS-232 Terminal Interface Operation For ASUS PCI-DA2100, there are no RS-232 Port on the board. So, the RS-232 Terminal Interface Operation doesn't support on the product. The Text RAID Manager utility "RAIDMAN.EXE" and RS-232 Terminal Interface Operation provides a user-friendly menu-driven system for configuring and manag- ing the ASUS PCI-DA2000 Series Controller.

Page 29 <Main Menu> Quick installation View and edit logical drives view And edit SCSI ID Map view And edit SCSI drives Scan new SCSI drive Rebuild logical drives view and Edit SCSI channels system Functions ASUS PCI-DA2000 Series RAID Controllers Driver Installation...

<u>Page 30</u> RS-232 Terminal Interface Operation Under normal operation the screen displays the average throughput (256 KBytes/ sec per division). After powering up the ASUS PCI-DA2000 Series Controller, the terminal screen will show: ASUS PCI-DA2000 Series Disk Array is installed with 8 MBytes DRAM...

Page 31 To escape and go back to the preceding menu. [Ctrl-I] To refresh terminal screen. NOTE: If the password feature is enabled, you will be prompted to enter the password before executing commands that affect configuration or operation. ASUS PCI-DA2000 Series RAID Controllers Driver Installation...

Page 32 NOTE: A "Logical Drive" is a set of drives grouped together to operate under a given RAID level and appears as a single contiguous drive. The ASUS PCI- DA2000 Series is capable of grouping connected drives into as many as 8 logi- cal drives, each configured to the same or different RAID levels.

<u>Page 33</u> A progress indicator similar to the one shown below will be displayed. When initialization is complete, the controller will automati- cally map the entire capacity of the logical drive to SCSI ID 0 LUN 0. Creating RAID 87 % Complete ASUS PCI-DA2000 Series RAID Controllers Driver Installation...

Page 34 4 Choose a RAID level by typing 5, 3, 1, 0 or N or use the keys to select a RAID level and press [Enter]. 5 The controller will start initialization and automatically map the logical drive to SCSI ID 0 LUN 0 of first host channel. ASUS PCI-DA2000 Series RAID Controllers Driver Installation...

Page 59 Help <F1> Previous screen <Esc> Abort INSTALL <ALT><F10> 11 Insert the ASUS PCI-DA2000 Series Driver Diskette into floppy A: and type netware\v4.x and press [Enter] then wait for the following screen to appears: NetWare Server Installation v4.x NetWare loadable Module Select a new disk driver to install: DA2000.DSK...

Page 60 DA2000.DSK did not finish loading in the time allowed (15 seconds). Controller will be switched to the system console screen, where you may either see it finish or enter information to finish loading it. (INSTALL-4.0-247) Press <Enter> to continue. ASUS PCI-DA2000 Series RAID Controllers Driver Installation...

Page 61 Slot: 11 The slot number (value) is auto-detected by ASUS PCI-DA2000 Series driver ac- cording to which PCI slot the ASUS PCI-DA2000 Series been plugged into. Write down the slot number for later using in STARTUP.NCF. 15 Press [Enter] on system console screen NetWare Server Installation v4.x...

<u>Page 62</u> # load DA2000 slot = x x is the slot number of slot into which where the ASUS PCI-DA2000 Series been plugged. The slot number is auto-detected by ASUS PCI-DA2000 Series driver and shown on the system console screen during ASUS PCI-DA2000 Series driver loading.

Page 63 5. Windows NT Driver Installation 5. Windows NT Driver Installation Up to 4 ASUS PCI-DA2000 Series adapters can be installed in one computer. The following files are supplied for driver installation, to be found in the subdirectory \WINNT\V3_1 for Windows NT 3.1.

Page 64 ASUS PCI-DA2000 Series adapter installed for Windows NT, then follow step 1 through step 2 only. If you are adding an ASUS PCI-DA2000 Series adapter to a computer that has no ASUS PCI-DA2000 Series adapter installed for Windows NT, then follow all steps.

Page 65 5. Windows NT Driver Installation 3 Prepare for the installation by using DISKCOPY (or any other disk-copy utility) to make backup copy of ASUS PCI-DA2000 Series distribution diskette. If you are installing Windows NT 3.1, copy all files from \WINNT\V3_1 to root direc- tory of the backup diskette.

Page 66 Skip step 2 if the version of your Windows NT is not v3.1. 2 If one of the ASUS PCI-DA2000 Series adapters control the system boot disk, use ATTRIB.EXE to disable the hidden, system and read only attributes of c:\ntbootdd.sys, then copy the same driver to c:\ntbootdd.sys and restore the...

Page 67 [Ctrl-I], select Configure Card option, then change IO Port Address to DIS- ABLED. 2 Use ASUS Text RAID Manager or RS-232 Terminal Interface to configure Logi- cal Drives and SCSI Devices and map them to valid SCSI-IDs/LUNs. Note that SCSI ID 7 is reserved for the ASUS PCI-DA2000 Series controller and thus no logical drives or devices should be mapped to this SCSI ID.

Page 68 ASUS PCI-DA2000 Series family Miniport Driver to support ASUS GUI RAID Manager. Please select "Do not install a driver", and click on "OK". 16 Make sure that the ASUS PCI-DA2000 Series family Miniport Driver is work- ing properly by using Device Manager tab of System icon in Control Panel.

Page 69 6 Click on the "Have Disk" button and enter a:\win95 as the subdirectory to copy the manufacturer's file from. Click "OK". 7 Select ASUS PCI-DA2000 Series PCI-to-SCSI RAID Adapter, and click on "OK". 8 Click on "OK". The driver is copied.

Page 70 7. OS/2 Driver Installation 7. OS/2 Driver Installation Up to 4 ASUS PCI-DA2000 Series controllers can be installed in one computer. The following files are supplied for driver installation, they are put in the \OS2 subdirectory. DA2000.ADD: ASUS PCI-DA2000 Series OS/2 2.x and 3.0 (Warp) Device Driver.

Page 71 If you are adding an ASUS PCI-DA2000 Series controller to a computer that al- ready has an ASUS PCI-DA2000 Series controller installed for OS/2 2.x/3.0, then follow step 1 through step 2 only. If you are adding an ASUS PCI-DA2000 Series controller to a computer that has no ASUS PCI-DA2000 Series controller installed for OS/2 2.x/3.0, then follow all steps.

<u>Page 72</u> (Disable) Enable Embedded Target Support. Makes the driver (disable) enable notzero SCSI LUN support. Default setting is /ET. /PCI:n Maximum PCI Bus Number in the computer. Where n is a decimal value between 0 to 255. Default value is 255. ASUS PCI-DA2000 Series RAID Controllers Driver Installation...

Page 73 Normally, adapters are numbered consecutively, starting at 0. /BUS:n PCI Bus Number which ASUS PCI-DA2000 Series is plugged in. You can get the PCI bus number from the information that ASUS PCI-DA2000 Series BIOS dis- plays at system bootup.

Page 74 SCSI Target ID(LUN) of the adapter specified by /A:n, to be supported by the IBMsupplied SCSI manager (OS2SCSI.DMD). The default setting is /SM. Note : The driver will find all the ASUS PCI-DA2000 Series controller in your computer automatically, if no /BUS and /DEV options specified.

Page 75 [Ctrl-I], select Configure Card option, then change IO Port Address to DIS- ABLED. 2 Use ASUS Text RAID Manager or RS-232 Terminal Interface Operation to con- figure Logical Drives and SCSI Devices and map them to valid SCSI-IDs/LUNs. Note that SCSI ID 7 is reserved for the ASUS PCI-DA2000 Series controller and thus no logical drives or devices should be mapped to this SCSI ID.

<u>Page 76</u> 8 A message similar to the following will be displayed: Please insert the pcida volume and press <ENTER>: Insert the ASUS BTLD diskette again and press [ENTER] 9 At the following prompt, type "y": The BTLD packages will now be added to the Link Kit.

Page 77 SCO UNIX system Please enter the names of the packages you wish to install or q to quit: [default:pcida] 11 The ASUS PCI-DA2000 Series driver will now be linked into the SCO UNIX kernel. ASUS PCI-DA2000 Series RAID Controllers Driver Installation...

Page 78 Modem Control Set up modem parameters. Reset Controller Reset the controller Controller Maintenance Download/Upload controller Firmware through the Text RAID Manager.
