2-1. Air Discharge Chamber for Top Discharge

Install the air-discharge chamber in the field when:
it is difficult to keep a space of minimum 2 ft.

between the air-discharge outlet and the obstacle.
the air-discharge outlet is facing the sidewalk and
discharged hot air can annoy the passers-by.

Refer to Fig. 2-4.

2-2. Wind Shield for "CL" Model

It is recommended to use wind shields for "CL" model
(Fig. 2-5). "CL" model is designed to use in low out-
door temperature conditions.

General

When the outdoor unit is installed in a position ex-
posed to strong wind (like seasonal winds with low air

temperature in winter), wind shield must be installed on the outdoor unit.

This unit is designed so that the fan of the outdoor unit runs at low speed when the air conditioner is operated at low outdoor air temperatures. When the outdoor unit is exposed to strong wind, the system pressure drops because of the freeze protector.

For outer dimensions of wind shield, please see

Fig. 2-6.
