Page 6: Section 1 Getting To Know Your Camcorder

Section 1 Getting to Know Your Camcorder Overview The camcorder equipped a 5 Mega Pixel sensor that can take H.264 format videos. The H.264 technology allows for extended video recording with less memory. High quality images up to 16 mega-pixels can also be delivered smoothly.

Page 7: Safety Instructions

Safety Instructions Do not drop, puncture or disassemble the camcorder; otherwise the warranty will be voided. Avoid all contact with water, and dry hands before using. Do not expose the camcorder to high temperature or leave it in direct sunlight. Doing so may damage the camcorder.

Page 46: Section 11 Troubleshooting

Section 11 Troubleshooting Troubleshooting The files on the memory card do not display smoothly when the LCD shows the "!" marking. The "!" symbol means the SD card is too low of a speed or contains corrupted files. The way to solve this condition is to format SD card by the camcorder instead of a PC (Please refer to the detailed Format instruction in Section 5).
