[Page 14: General Precautions](#)

General Precautions TOSHIBA computers are designed to optimize safety, minimize strain and withstand the rigors of portability. However, certain precautions should be observed to further reduce the risk of personal injury or damage to the computer. Be certain to read the following

general precautions and to note the cautions included in the text of the manual.

[Page 15](#) **Stress injury** Carefully read the Instruction Manual for Safety and Comfort. It contains information on the prevention of stress injuries to your hands and wrists that can be caused by extensive keyboard use. It also includes information on work space design, posture, and lighting that can help reduce physical stress.

[Page 16: Safety Icons](#)

Moving the computer While the computer is designed for flexible day-to-day usage, you should exercise a few simple precautions when moving it in order to help ensure trouble-free operation. Make sure all disk/disc activity has ended before moving the computer. Turn off (shut down) the computer.

[Page 17](#) Indicates a potentially hazardous situation, which could result in death or serious injury, if you do not follow instructions. A caution informs you that improper use of equipment or failure to follow instructions might cause data loss, equipment damage, or might result in minor or moderate injury.

[Page 18: Chapter 2 Getting Started](#)

This chapter provides an equipment checklist, and basic information to start using your computer. If you use an operating system that was not pre-installed by TOSHIBA, some of the features described in this manual might not function properly. **Equipment checklist** Carefully unpack your computer, taking care to save the box and packaging materials for future use.

[Page 19: Using Your Computer For The First Time](#)

Double-click Tap the Touch Pad or click the left Touch Pad control button twice. **Left click the mouse twice.** **Start** The word "Start" refers to the " " button in the lower-left corner of the screen. **All apps** You can find a list of all your apps and programs in the All apps.

[Page 20](#) Always use the TOSHIBA AC adaptor that was included with your computer, or use AC adaptors specified by TOSHIBA to avoid any risk of fire or other damage to the computer. Use of an incompatible AC adaptor might cause fire or damage to the computer possibly resulting in serious injury.

[Page 21](#) **Figure 2-1** Connecting the power cord to the AC adaptor (2-pin plug) **Figure 2-2** Connecting the power cord to the AC adaptor (3-pin plug) Either a 2-pin or 3-pin adaptor/cord is included with the computer depending on the model. Connect the DC output plug of the AC adaptor to the DC IN 19V jack on your computer.

[Page 22](#) **Figure 2-4** **Opening the display panel 1.** **Display panel** Open and close the display panel with reasonable care. Opening it vigorously or slamming it shut might damage the computer. Do not put your fingers in the gap between the LCD panel and battery pack when closing your LCD, otherwise your fingers might get hurt.

[Page 23: Getting To Know Windows](#)

Turning on the power This section describes how to turn on the power. The Power indicator indicates the status. Refer to the Power Condition Descriptions section for more information. After you turn on the power for the first time, do not turn it off until you have set up the operating system.

[Page 24](#) You can access the Start menu from an app or the desktop in the following ways: Click the Start button () in the lower-left corner of the screen. ® Press the Windows logo key () on your keyboard. Most used allows quick access to your frequently used apps, and your recently installed apps are highlighted under Recently added.

[Page 25: Turning Off The Power](#)

Settings Settings provides system settings including advanced settings in the Control Panel. They are divided in categories so that you can configure, optimize, or personalize Windows. You can also type in the keyword, and use Search to find any setting. To open Settings, click Start ->...

[Page 26](#) Never turn off the power, disconnect an external storage device, or remove storage

media during data read/write. Failure to do so can cause data loss. Click Start -> Power and then select Shut down. Turn off any peripheral devices connected to your computer. Do not turn the computer or peripheral devices back on immediately.

[Page 27](#) Note that keyboard keys can only be used if the Wake-up on Keyboard option is enabled within the TOSHIBA System Settings. If the computer enters Sleep Mode while a network application is active, the application might not be restored when the computer is next turned on and the system returns from Sleep Mode.

[Page 28](#) If you are operating the computer on battery power, you can lengthen the overall operating time by turning it off into Hibernation Mode. Sleep Mode consumes more power while the computer is off. Sleep Mode limitations Sleep Mode will not function under the following conditions: Power is turned back on immediately after shutting down.

[Page 29: System Recovery](#)

Restoring the pre-installed software from your created Recovery Media Restoring the pre-installed software from the Recovery Partition If you choose TOSHIBA Maintenance Utility to erase the internal storage drive, all data including the operating system and recovery partition will be User's Manual...

[Page 30](#) In that case, you cannot create recovery media or restore the pre-installed software from the recovery partition. Make sure that you have already created recovery media before you start TOSHIBA Maintenance Utility. This recovery media can be used to restore your system after you have erased your internal storage drive.

[Page 31](#) To perform this restoration, do the following: When you reinstall the Windows operating system, the hard disk will be reformatted and all data will be lost. Make sure to use the default Boot Mode option in TOSHIBA Setup Utility before restoring. Launch the TOSHIBA Setup Utility.

[Page 32](#) Recovery Media. However, if you have already created a "Recovery Media", you can use it to restore the recovery partition. If you have not created "Recovery Media", contact TOSHIBA support for assistance. Restoring the pre-installed software from the Recovery Partition A portion of the total internal storage drive space is configured as a hidden recovery partition.

[Page 33: Chapter 3 The Grand Tour](#)

Chapter 3 The Grand Tour This chapter identifies the various components of the computer. It is recommended that you become familiar with each before you operate the computer. Legal Footnote (Non-applicable Icons) For more information regarding Non-applicable Icons, refer to the Legal Footnotes section.

[Page 34: Left Side](#)

Power indicator The Power indicator normally glows white when the computer is turned on. However, if you turn off the computer into Sleep Mode, this indicator flashes amber. Wireless The Wireless communication indicator glows communication white when the wireless functions are turned on. indicator Some models are equipped with wireless functions.

[Page 35](#) Do not connect any cable other than a LAN cable to the LAN jack. It might cause damage or malfunction. Universal Serial Bus Two Universal Serial Bus ports, which comply to (USB 2.0 or 3.0) port the USB 2.0 or 3.0 standard, are provided on the left side of the computer.

[Page 36: Right Side](#)

SIM Card slot This slot allows you insert a SIM card which enables a high-speed access to the Internet, corporate Intranet and your email while you are away from office. Refer to the Wireless WAN Device section for more information. Some models are equipped with the SIM Card slot.

[Page 37](#) Universal Serial Bus Two Universal Serial Bus ports, which comply to (USB 3.0) port the USB 3.0 standard, are provided on the right side of the computer. USB 3.0 port is compliant with USB 3.0 standard and backward compatible with USB 2.0 devices. The port with the icon () has Sleep and Charge function, and this function is only provided with some models.

[Page 38: Back](#)

DC IN 19V jack The AC adaptor connects to this jack in order to power the computer and charge its internal batteries. Note that you must only use the model of AC adaptor supplied with the computer at the time of purchase. Using the wrong AC adaptor can damage the computer.

[Page 39](#) Figure 3-5 The underside of the computer 1. Battery lock 4. Docking port* 2. Battery release latch 5. Memory module cover* 3. Cooling vents * Provided with some models. Product appearance depends on the model you purchased. Battery lock Slide the battery lock to release the battery pack ready for removal.

[Page 40: Front With The Display Open](#)

180W/120W. Some models are equipped with the docking port. Only the TOSHIBA Hi-Speed Port Replicator III 180W or 120W is compatible with the docking port. Do not attempt to use any other Port Replicator. Keep foreign objects out of the docking port. A pin or similar object can damage the circuitry of the computer.

[Page 41](#) 5. Display screen 13. AccuPoint* 6. Stereo speakers 14. AccuPoint control buttons* 7. Power button 15. Touch Pad ON/OFF icon* 8. Display hinges 16. TOSHIBA eco icon* * Provided with some models. Product appearance depends on the model you purchased. User's Manual...

[Page 42](#) Wireless Depending on the configuration of your communication computer, one or all of the following antennas are antennas built-in: Wireless LAN Wireless LAN/Bluetooth Some models are equipped with wireless communication antennas. Do not cover the wireless communication antennas area with any metal objects, otherwise the wireless function might not work.

[Page 43](#) Display screen 39.6 cm (15.6") LCD screen, is configured with the following resolution: HD, 1366 horizontal x 768 vertical pixels FHD, 1920 horizontal x 1080 vertical pixels Be aware that, when the computer is operating on the AC adaptor, the image displayed on the internal screen is somewhat brighter than when it operates on battery power.

[Page 44: Internal Hardware Components](#)

Pad. Some models are equipped with the Touch Pad ON/OFF icon. TOSHIBA eco icon Double tap this icon to launch the TOSHIBA eco Utility. Some models are equipped with the TOSHIBA eco icon. Internal Hardware Components This section describes the internal hardware components of your computer.

[Page 45](#) Some models are equipped with a "Solid-State Drive (SSD)" instead of a hard disk drive. In this manual, the word "HDD" or "Hard disk drive" also refers to the SSD unless otherwise stated. SSD is a large-capacity storage device which uses Solid-State Memory in place of a magnetic disk of the hard disk.

[Page 46](#) NVIDIA Graphic Control ® Some NVIDIA graphics models might include NVIDIA Optimus™ technology feature. ® NVIDIA Optimus™ technology intelligently optimizes notebook performance by seamlessly switching between a discrete NVIDIA GPU for great graphics performance and an Intel integrated graphics chip for sustained battery life.

[Page 47](#) NVIDIA Graphics Controllers. However, Toshiba does not guaranty compatibility of such NVIDIA drivers with your device. TOSHIBA shall not be liable for any damage resulting from NVIDIA's drivers. Hence, your device shall not be covered under TOSHIBA's limited warranty.

[Page 48: Power Condition Descriptions](#)

Power Condition Descriptions The computer operating capability and battery charge status are affected by different power conditions, including whether an AC adaptor is connected and what the battery charge level is. DC IN/Battery indicator Check the DC IN/Battery indicator to determine the status of the battery pack and the power status with the AC adaptor connected.

[Page 49: Chapter 4 Operating Basics](#)

Chapter 4 Operating Basics This chapter describes the basic operations of your computer, and highlights the precautions that must be taken when using it. Using the Touch Pad The Touch Pad on the palm rest might support the following gestures: Tap once on the Touch Pad to

activate an item, such as an app.

[Page 50](#) There are different types of keys, specifically typewriter keys, function keys, and Windows special keys. Never remove the key caps on your keyboard. Failure to do so might damage the parts under the key caps. Keyboard indicator The following figure shows the position of the CAPS LOCK indicator and NUM LOCK indicator which show the following conditions: When the CAPS LOCK indicator glows, the keyboard produces capitals when any letter is typed.

[Page 51](#) Toggles the mode of the keyboard backlight between Timer, On, and Off. To set up the brightness, click System Settings under TOSHIBA group in All apps. Click Keyboard tab, and select a level under Keyboard Backlight Brightness Control. To set up the timer, launch the BIOS setup utility, select Power Management ->...

[Page 52: Optical Disc Drive](#)

Some functions show the toast notification at the edges of the screen. Those toast notifications are enabled by default. You can disable them in the Function Key settings. To access it, click System Settings -> Function Key under TOSHIBA group in All apps. Windows special keys The keyboard provides two keys that have special functions in Windows, ®...

[Page 53](#) Grasp the disc tray gently and pull until it is fully opened. Figure 4-2 Pressing the eject button and pulling the disc tray open 1. Eject button Lay the disc, label side up, in the disc tray. Figure 4-3 Inserting a disc 1.

[Page 54](#) If the disc is not seated properly when the disc tray is closed, the disc might be damaged. Also, the disc tray might not open fully when you press the eject button. Removing discs To remove the disc, do the following: Do not press the eject button while the computer is accessing the optical disc drive.

[Page 55](#) This might cause you to either lose data or incur other damage to the drive or media. Disclaimer TOSHIBA does not assume responsibility for the following: Damage to any disc that might be caused by writing or rewriting with this product.

[Page 56](#) Based on TOSHIBA limited compatibility testing, we suggest the following manufacturers of disc media, however, it must be noted that disc quality can affect write or rewrite success rates. Also be aware that in no event does TOSHIBA guarantee the operation, quality or performance of any disc. CD-R: TAIYO YUDEN CO., Ltd.

[Page 57: Toshiba Video Player](#)

In addition, do not use the computer on an unstable surface such as a stand. Keep mobile phones and other wireless communication devices away from the computer. TOSHIBA VIDEO PLAYER TOSHIBA VIDEO PLAYER is only provided with some models. User's Manual...

[Page 58](#) Please be aware of the following limitations when you use the TOSHIBA VIDEO PLAYER: Notes on use This software can only be used on Windows operating system. TOSHIBA VIDEO PLAYER software is supported for playback of DVD and video file.

[Page 59](#) VIDEO PLAYER might not function properly. Do not change the screen resolution while running the TOSHIBA VIDEO PLAYER. Do not change the display device while running the TOSHIBA VIDEO PLAYER. Starting TOSHIBA VIDEO PLAYER Use the following procedure to start TOSHIBA VIDEO PLAYER.

[Page 60: Using The Accupoint](#)

TOSHIBA VIDEO PLAYER features and instructions are explained in details in TOSHIBA VIDEO PLAYER Manual. Use the following procedure to open TOSHIBA VIDEO PLAYER Manual. Press the F1 key when TOSHIBA VIDEO PLAYER is launched and click the Help button. Using the AccuPoint To use the AccuPoint, simply push it with your finger tip in the direction you want to move the on-screen pointer.

[Page 61: Using The Fingerprint Sensor](#)

Position a new cap on the peg and press it into place. The peg is square, so be careful to align the cap's square hole with the peg. You can buy replacement AccuPoint caps from your TOSHIBA authorized dealer. Using the Fingerprint Sensor Some models have a fingerprint utility

installed for the purpose of enrolling and recognizing fingerprints.

[Page 62](#) becomes visible. In performing this process, you should also take care to ensure that the center of your fingerprint is on the sensor. The following illustrations show the recommended way to swipe your finger over the fingerprint sensor. Figure 4-6 Swipe the finger 1.

[Page 63](#) You can back up the fingerprint data or the information registered to Web Site Passwords. Use Import/Export in TOSHIBA Fingerprint Utility main menu. Also refer to the fingerprint utility Help file for more information by clicking ? in TOSHIBA Fingerprint Utility main menu.

[Page 64](#) TOSHIBA does not guarantee that the fingerprint utility technology will be completely secure or error-free, or that it will accurately screen out unauthorized users at all times. TOSHIBA is not liable for any failure or damage that might arise out of the use of the fingerprint software.

[Page 65](#) "Do you want to quit?" is displayed. Click OK. It will be returned to the TOSHIBA Fingerprint Utility main menu. Delete all users fingerprints In the TOSHIBA Fingerprint Utility main menu, click Run as administrator. User Account Control window is displayed. Click Yes.

[Page 66](#) System Authentication screen is displayed. This will switch the password input screen across to the keyboard-based one. You must ensure that you use the TOSHIBA Password Utility to register a User Password before using the Fingerprint Pre-Boot authentication and its extended function to allow fingerprints to be used to access the computer when it is turned on.

[Page 67: Battery](#)

How to Enable Fingerprint Pre-Boot authentication and Single Sign-On feature It is necessary to first enroll your fingerprint with the TOSHIBA Fingerprint Utility prior to enabling and configuring the Pre-Boot authentication and Single Sign-On feature. You should check that your fingerprint is enrolled before configuring the settings.

[Page 68](#) If the RTC battery becomes completely discharged, the system will lose this information and the real-time clock and calendar will stop working. You can change the Real-Time Clock settings in the TOSHIBA Setup Utility. Refer to Real Time Clock for further information.

[Page 69](#) Never remove the battery pack while the Wake-up on LAN function is enabled, as data will be lost. Before you remove a battery pack, disable the Wake-up on LAN function. Charging the batteries When the power in the battery pack becomes low, the DC IN/Battery indicator flashes amber to indicate that only a few minutes of battery power remain.

[Page 70](#) The battery is nearly completely discharged. In this instance, leave the AC adaptor connected for a few minutes and the battery should begin charging. The DC IN/Battery indicator might show a rapid decrease in battery operating time when you try to charge a battery under the following conditions: The battery has not been used for a long time.

[Page 71](#) How you use optional devices, such as a USB device, to which the battery supplies power Where you store your programs and data Whether you close the display panel when you are not using the keyboard - closing the display saves power The environmental temperature - operating time decreases at low temperatures System Sleep Mode...

[Page 72](#) Replacing the battery pack Be aware that the battery pack is classified as a consumable item. The operating life of the battery pack will gradually reduce through repeated charging and discharging, and should be replaced when it reaches the end of its operating life. In addition to this, you might also replace a discharged battery pack with a charged spare when you are operating your computer away from an AC power source for an extended period of time.

[Page 73: Wireless Wan Device](#)

Figure 4-7 Releasing the battery pack 1. Battery lock 3. Battery pack 2. Battery release latch Installing the battery pack To install a battery pack, do the following: Do not touch the battery release latch while holding the computer or the battery pack might fall out due to the

unintentional release of the battery release latch and cause injuries.

Page 74 To pop the SIM card tray partially open, insert a slender object (about 10mm, diameter 0.8mm), such as a straightened paper clip, into the eject hole. Gently pull to open the SIM card tray. Never pull the SIM card tray completely out of the slot. Figure 4-8 Open the SIM card tray with the eject hole 1.

Page 75: Gps Function

Never allow metal objects, such as screws, staples and paper clips, to enter the computer. Foreign metal objects can create a short circuit, which can cause computer damage and fire, possibly resulting in serious injury. Do not touch the connectors on the SIM card or on the computer. Debris on the connectors might cause access problems.

Page 76 When installing or removing a memory module, you must ensure that you do not touch any other internal areas of the computer. Use only memory modules approved by TOSHIBA. Do not try to install or remove a memory module under the following conditions.

Page 77 Slide your fingernail or a thin object under the cover and lift it off. Figure 4-10 Removing the memory module cover 1. Screw 2. Memory module cover Align the notch of the memory module with that of the memory slot and gently insert the module into the slot at about a 30 degree angle before holding it down until the latches on either side snap into place.

Page 78 Align the grooves along the edges of the memory module with the locking tabs on the connector and insert the module into the connector firmly. If you find it difficult to install the memory module, gently prise the locking tabs outwards using the tip of your finger. Also ensure that you hold the memory module along its left and right hand edges - the edges with the grooves in.

Page 79: Lan

Grasp the module by its edges and remove it from the computer. If you use the computer for a long time, the memory modules and the circuits locating close to the memory modules will become hot. In this case, let them cool to room temperature before you replace them. Or you will get burnt if you touch any of them.

Page 80 LAN cable types The computer must be configured properly before connecting to a LAN. Logging onto a LAN using the computer's default settings might cause a malfunction in LAN operation. Check with your LAN administrator regarding set-up procedures. If you are using Gigabit Ethernet LAN (1000 megabits per second, 1000BASE-T), be sure to connect with a CAT5e cable or higher.

Page 81: Memory Media

Plug the other end of the cable into a LAN hub connector or router. Check with your LAN administrator and hardware or software vendor before using or configuring a network connection. Memory media The computer is equipped with a memory media slot that can accommodate some kinds of memory media with various memory capacities so that you can easily transfer data from devices, such as digital cameras and Personal Digital Assistants.

Page 82 The SD memory card logo is (The SDHC memory card logo is (The SDXC memory card logo is (The maximum capacity of SD memory cards is 2 GB. The maximum capacity of SDHC memory cards is 32 GB. The maximum capacity of SDXC memory cards is 128 GB.

Page 83 For more details on using memory cards, see manuals accompanying the cards. About the write-protect feature Memory media cards have a write-protect function. SD Card (SD memory card, SDHC memory card and SDXC memory card) Set the write-protect switch to the lock position, if you do not want to record data.

Page 84: Smart Card

Removing memory media The following instructions apply to all types of supported media devices. To remove memory media, do the following: Click the Safely Remove Hardware and Eject Media icon on the Windows Taskbar. Select memory media. Push the memory media until you hear a click to partially release it. Grasp the media and remove it.

[Page 85: External Display](#)

Press the Smart Card gently to ensure a firm connection is made. The computer will identify the Smart Card and display an icon in the Windows Taskbar. When inserting a Smart Card into the Smart Card slot, make sure to confirm that the card is oriented correctly before inserting.

[Page 86](#) External RGB monitor port An external analog monitor can be connected to the External RGB monitor port on the computer. To connect an external analog monitor, do the following: Connect the RGB cable to the External RGB monitor port. There are no fastening screws for an external monitor cable on the External RGB monitor port.

[Page 87](#) Figure 4-18 Connecting the HDMI out port 1. HDMI out port 2. HDMI cable Do not plug/unplug an HDMI device under the following conditions: The system is starting up. The system is shutting down. When you connect a television or external monitor to the HDMI port, the display output device is set to HDMI.

[Page 88](#) documents, streamed/local media contents or other online contents can be shared wirelessly with others. To use wireless display, either one of the following devices is required: A compatible external display with built-in support for wireless display. An external display with HDMI port and a wireless display adaptor. The wireless display adaptor is a device that connects to the external display via HDMI port and can receive Wi-Fi signals from your computer.

[Page 89: Toshiba Hi-Speed Port Replicator Iii 180W/120W](#)

TOSHIBA Hi-Speed Port Replicator III 180W/ 120W In addition to the ports available on the computer, the TOSHIBA Hi-Speed Port Replicator III 180W/120W also provides several kinds of ports. The Port Replicator connects directly to the docking interface on the underside of the computer.

[Page 90: Security Lock](#)

1. Docking port (computer) Product appearance depends on the model you purchased. Make sure the AC adaptor is always connected to the TOSHIBA Hi-Speed Port Replicator III 180W/120W while in use. Otherwise the Port Replicator will stop working, possibly resulting in data loss.
