received through a STB via the Component Input Jacks.

This Plasma TV can receive and decode ANY digital signal (HDTV, EDTV, or SDTV).

However, the display is always EDTV.

DIGITAL ANTENNA IN

## ADDING NEW DIGITAL CHANNELS

Use this feature to add new digital channels or to add digital channels with broadcast towers that are in opposite directions from your home.

If necessary, after the initial search, turn the antenna and use the On-Screen Menu to perform a Digital Add-on Search. Repeat these steps for each direction in which there are transmitting towers.

A Digital Add-on Search may take several minutes to complete.

NOTES: Digital Add-on Search will not affect channels already in the channel database in which the TV receives RF signals from an antenna. Other digital signals are received through a STB via the Component Input Jacks.

Press the **TUNER** key to select the Digital signal (HDTV, EDTV, or SDTV). However, the display is always EDTV.

Press the **MENU** key.

Other digital signals are received through a STB via the Component Input Jacks. This Plasma TV can receive and decode ANY digital signal (HDTV, EDTV, or SDTV).

### **Page 2: Digital Audio Output Connection**

[.1]). A fiber optics cable is used to carry the 5.1 surround sound (for low-noise signal transfer). Using a Fiber Optics cable, connect the TV's Digital Audio Output to the Digital Audio Input of a Multi-Channel Receiver. (Fiber optics cable is not supplied.) NOTES: When making the connection, be careful not to bend the fiber optics cable too sharply.
