NOTE To register online, you must be connected to the Internet. Adding optional external devices NOTE Before adding external devices, Toshiba recommends first setting up the software. After starting your computer for the first time you may want to: ❖...

[Page 31: Adding Memory \(Optional\)](#)

You may want to increase the computer's memory if you use complex software or process large amounts of data. NOTE Before adding external devices, Toshiba recommends first setting up the software. Installing a memory module Memory modules can be installed in the memory module slots on the back of the computer.

[Page 32](#) Getting Started Adding memory (optional) The computer has two memory slots—Slot A and Slot B. You can install one or two memory modules. Before you install or remove a memory module, turn off the computer using the Start menu. If you install or remove a memory module while the computer is in Sleep or Hibernation mode, data will be lost.

[Page 33](#) Using a small Phillips screwdriver, loosen the captive screw that secures the memory module slot cover. Back of monitor (Sample Illustration) Removing the memory module slot cover Remove the memory module slot cover. Place the screw and the cover in a safe place so that you can retrieve them later.

[Page 34](#) Getting Started Adding memory (optional) NOTE For this model, Slot A is the bottom slot. Slot B is the top slot. If only one memory module is to be installed, it must be installed in Slot A. Pick up the memory module by its sides, avoiding any contact with its connector.

[Page 35](#) Once the module's connector is fully inserted into the socket, press downward on the top edge of the module to seat the module into the latches at the sides of the socket. These latches should "snap" into place securely with the corresponding cutouts in the side of the module.

[Page 36: Removing A Memory Module](#)

Getting Started Adding memory (optional) Always make sure your computer and AC adaptor have adequate ventilation and are protected from overheating when the power is turned on or

when an AC adaptor is connected to a power outlet (even if your computer is in Sleep mode).

[Page 37](#) NOTE The following screen may appear when you turn on the power: If “Start Windows If one of the Safe Mode options is highlighted, it is best to press to go into Safe Mode, then shut down and restart the system, at Enter which time Windows When Safe Mode is suggested, this could be a sign that you may...

[Page 57: Selecting Video Cables](#)

Selecting video cables To connect a device to the HDMI™ In port, you must purchase an HDMI™ cable. Connecting a printer NOTE Your printer documentation may require you to install the printer software before physically connecting the printer to your computer. If you do not install the software as instructed by the printer manufacturer, the printer may not function correctly.

[Page 58: Setting Up A Printer](#)

Getting Started Turning off the computer Setting up a printer NOTE Some printers require a specific installation process. Refer to your printer installation guide for instructions before completing the following procedure. If your printer does not support Plug and Play, follow these steps to set it up for the first time.

[Page 59: Options For Turning Off The Computer](#)

Options for turning off the computer Depending on the operating system installed, you have more than one option available for turning off the computer: Shut down, Hibernate, and Sleep.

Each option has its advantages. ♦ Use the Shut down or Hibernate command if you will not be using the computer for several days or if you must turn off your computer.

[Page 60: Using The Shut Down Command](#)

Getting Started Turning off the computer Sleep mode The Sleep command places the computer into a power-saving mode. Sleep saves the current state of the computer to memory so that, when you restart the computer, you can continue working from where you left off.

[Page 61](#) Click the Shut down button in the lower-right corner of the Start menu. The computer closes all open programs, shuts down the operating system, and then turns off. Turning off the computer more quickly You can also turn off the computer by pressing the power button. To use this method, you first need to activate it using the Power Options feature.

[Page 69: Customizing Your Computer's Settings](#)

Customizing your computer's settings There are several ways in which you can customize your computer to suit your particular requirements. Refer to your operating system documentation or Help and Support for details. You may also wish to customize your power usage settings. For more information, see additional custom settings you can choose.

[Page 70: Using A Computer Lock](#)

You may want to secure your computer to a heavy object such as your desk. The easiest way to do this is to purchase an optional computer lock cable. For more information on purchasing a cable lock, visit accessories.toshiba.com. (Sample Illustration) Computer lock cable To secure the computer: Wrap the cable through or around some part of a heavy object.

[Page 71: Chapter 2: Learning The Basics](#)

Chapter 2 Learning the Basics This chapter gives some computing tips and provides important information about basic features. Computing tips ♦ Save your work frequently. Your work stays in the computer's temporary memory until you save it to the internal storage drive. If the network you are using goes down and you must restart your computer to reconnect, you will lose all work since you last saved.

[Page 72: Using The Wireless Mouse](#)

Learning the Basics Using the wireless mouse ♦ Use Error-checking and Disk Defragmenter regularly to check and optimize disk space and improve performance. ♦ Scan all new files for viruses. This precaution is especially important for files you receive via external media, email, or download from the Internet.

[Page 73: Replacing The Batteries](#)

Replacing the batteries Batteries are required to power the wireless mouse. The battery light glows red when the battery power is low. To replace the batteries: Save your work and turn the mouse upside down.
