## Wireless LAN

---

The wireless LAN is compatible with other LAN systems that comply with the IEEE 802.11a+g, and 802.11g wireless LAN standards.

It supports the following:

Automatic Transmit Rate Select mechanism in the transmit range of 54, 11, 5.5, 2 and 1 Mbit/s. (54 Mbps is available only with 802.11a or 802.11g.)

Advanced Encryption Standard (AES) data encryption, based on 128bit encryption algorithm. (Revision G, A/G combo type.)

*Wake-up on LAN does not function on a Wireless LAN.*

Frequency Channel Selection (5GHz and 2.4 GHz)

Roaming over multiple channels

Card Power Management

Wired Equivalent Privacy (WEP) data encryption. Wake-up on LAN does not function on a wireless LAN.

## Security

1. Be sure to enable WEP(encryption) function. Otherwise your computer will allow the illegal access by outside through Wireless LAN to cause illegal intrusion, eavesdropping, and loss or destruction of stored data. TOSHIBA strongly recommends the customer to enable the WEP function.

2. TOSHIBA is not liable for the eavesdropping of data due to the use of Wireless LAN and the damage thereof.

ManualsLib.com

## Wireless communication switch

You can enable or disable wireless LAN function, with the on/off switch. No transmissions are sent or received when the switch is off. Slide the switch forward to turn it on and backward to turn it off.

*Turn the switch off in airplanes and hospitals. Check the LED. It stops glowing when the wireless communication function is off.*

## Wireless communication LED

The LED indicates the status of the wireless communication functions.

LED status

LED off

LED glows

User's Manual

Indication

Wireless communication switch is set to off

Wireless communication switch is on
