HOW TO INSTALL THE WIRELESS RECEIVER

Install the Wireless receiver in correct orientation, since the Wireless receiver can be

installed at only one corner as shown in (Fig. 1).

Electrical control box
Indoor unit
refrigerant pipe side
Indoor unit
drain pipe side

1. Remove the adjust corner cap.
2. Remove the adjust corner cap at the corner where the Wireless receiver kit is to be installed. (Fig. 2)
 - Pull the adjust corner cap in the direction of (1) and slide it in the direction of (2) to remove it.
 - Remove strap from the pin and detach the adjust corner cap from the ceiling panel.

3. The insulation pad is packed in the two rectangular holes for ceiling panel wires. Remove the insulation pad, and pass the wires from the Wireless receiver through the rectangular holes. (Fig. 3)

4. Make sure that the black sponge wrapped around the wiring is about 0.8" (20 mm) out of the rectangular hole on the indoor unit side, and fix it with the Cord clamp by Screw. (Fig. 3)

Pass the Wireless receiver lead wire through the Cord clamp and fix it with Screw
Remove the insulation pad from the rectangular hole on the indoor unit side.

Pass the Wireless receiver lead wire through the hole in the ceiling panel
Pull out the black sponge wrapped around the wiring about 0.8" (20 mm) from the rectangular hole.

- Thank you for purchasing Wireless receiver kit for air conditioners.
- Read this manual carefully for correct installation of the Wireless receiver kit before starting work.
- After the installation is completed, execute a test run to check for normal operation and explain how to use and maintain the Wireless receiver kit to the customer according to the Operation Manual.

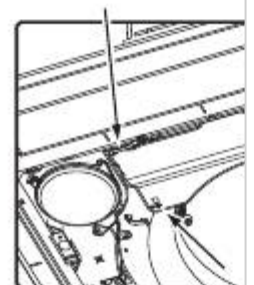

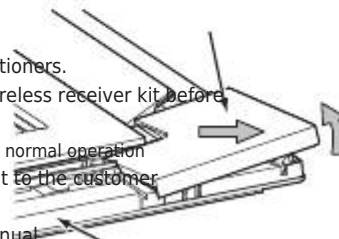

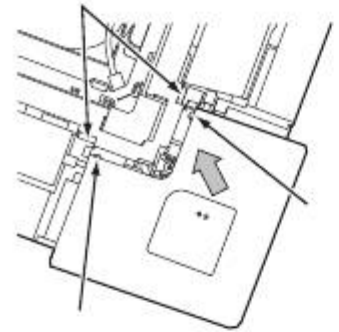

Ask the customer to keep this manual with the Operation Manual.

CAUTION

- If the black sponge is not properly positioned, water leakage, dew condensation, and dew condensation on the wiring may occur, so be sure to do so.

5. Attach the Wireless receiver to the panel. At this time, be careful not to pinch the wiring. (Fig. 4) If there is a part where the claws of the Wireless receiver part are not fitted, it may cause water leakage, so push claws A (2 places) and claws B (3 places)

1
firmly and firmly to make sure that the Wireless receiver part does not float. please

confirm.

CAUTION

- Press the three claws of the adjust corner cap firmly as far as they will go, and then check that the adjust corner cap is closely attached.
- Failure to do so may result in water leakage.

HOW TO WIRING THE WIRELESS RECEIVER

1.

Remove the mounting screw A on the electric control box cover and loosen the screw B. Slide the cover to remove the hook (the electric control box cover remains hooked on the hinge).

Hook

(Fig. 2)

2.

Connect the wiring from the Wireless receiver to the connector 9P (CN214: white) on the P.C.Board of the indoor unit.

Use the cord clamp inside the electrical parts box to process the excess wiring, and then attach the electric control box cover and air inlet grille.

Cord Clamp

- 1 -

Claw A

There are claws B here, so push it in firmly.

Push in the claw B (3 places) on the back side of the Wireless receiver so that they fit.
