Quick Guide

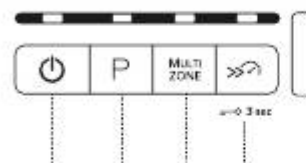

THANK YOU FOR BUYING A WHIRLPOOL PRODUCT.

In order to receive a more complete assistance, please register your appliance on: www.whirlpool.eu/register

Before using the appliance carefully read the Safety Instruction.

CONTROL PANEL

1. On-Off/Reset button with indicator light
2. Program selection button with indicator light
3. Multizone button with indicator light
4. Turbo button with indicator light / Key lock
5. Eco program indicator light

6.
Key lock indicator light

8.
Program number and remaining time indicator

FIRST TIME USE

FILLING THE SALT RESERVOIR

The use of salt prevents the formation of LIMESCALE on the dishes and on the machine's functional components.

- It is mandatory that the salt reservoir never be empty.
- It is important to set the water hardness.

The salt reservoir is located in the lower part of the dishwasher and must be filled when the SALT REFILL indicator light

1. Remove the lower rack and unscrew the reservoir cap (anticlockwise).

2. Position the funnel (see figure) and fill the salt reservoir right up to its edge (approximately 1 kg); it is not unusual for a little water to leak out.

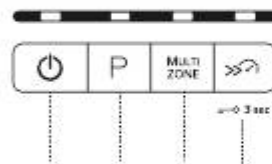

3. Only the first time you do this: fill the salt reservoir with water.

4. Remove the funnel and wipe any salt residue away from the opening. Make sure the cap is screwed on tightly, so that no detergent can get into the container during the wash program (this could damage the water softener beyond repair).

Whenever you need to add salt, it is mandatory to complete the procedure before the beginning of the washing cycle to avoid corrosion.

WATER-SOFTENING SYSTEM

Water softener automatically reduces water hardness, consequently preventing scale buildup on heater, contributing also to better cleaning efficiency. This system regenerates itself with salt, therefore it is required

PROGRAMS TABLE

Program

Eco 50° - Program is suitable to clean normally soiled tableware, that for this use, it is the most efficient programme in terms of its combined energy

1. gy and water consumption, and that it is used to assess compliance with the EU Ecodesign legislation.

6			Drying phase	Natural-Dry	
Sense® 50° - 60° - For normally soiled dishes with dried food residues. Sense					
2.					
ses the level of soiling on the dishes and adjusts the program accordingly.					
Intensive 65° - Program recommended for heavily soiled crockery, especially			✓	✓	P
3.					
cially suitable for pans and saucepans.			✓	✓	MULTI ZONE P
Fast Wash 50° - Normally soiled crockery. Everyday cycle, that ensures			✓	✓	MULTI ZONE P
4.			✓	✓	MULTI ZONE P
res optimal cleaning and drying performance in shorter time.					
Crystals 45° - Program for delicate items, which are more sensitive to high			✓	✓	MULTI ZONE
5.					
temperatures, for example glasses and cups.			✓	✓	MULTI ZONE
Rapid 30' 50° - Program to be used for half load of lightly-soiled dishes					
					MULTI

6.

with no dried food residues. Without drying.

Silent 50 - Suitable for night-time operation of the appliance. With the

7. lowest noise.

Sanitizing 65° - Normally or heavily soiled crockery, with additional anti-

8.

bacterial wash. Can be used to perform maintenance of the dishwasher

Prewash - Use to refresh crockery planned to be washed later. No deter-

9.

gent to be used with this program.

Self- Clean 65° - Program to be used to perform maintenance of the

10.

dishwasher, to be carried out only when the dishwasher is EMPTY using

specific detergents designed for dishwasher maintenance.

ECO program data is measured under laboratory conditions according to European Standard EN 60436:2020. Note for Test

Laboratories: For information on com-

parative EN testing conditions, please send an email to the following address: dw_test_support@europeanappliances.com

Pre-treatment of the dishes is not needed before any of the programs.

*) Not all options can be used simultaneously.

**) Values given for programs other than the program Eco are indicative only. The actual time may vary depending on many factors such as temperature and

pressure of the incoming water, room temperature, amount of detergent, quantity and type of load, load balancing, additional selected options and sensor cali-

bration. The sensor calibration can increase program duration up to 20 min.

WATER RECYCLING INDICATOR - When lit, it indicates that standard program uses water recycling system.

9.

3				
15. Delay button with indicator light	✓	✓		
16. Start/Pause button with indicator light / to refill salt container when empty.	✓	✓		
Frequency of regeneration depends on water hardness level setting - regen- eration takes place once per 8 Eco cycles with water hardness level set to 3.	✓	✓	MULTI ZONE	
Regeneration process starts in final rinse and finishes in drying phase, be- fore cycle ends.	✓	✓	MULTI ZONE	
• Single regeneration consumes: ~3.5L of water;	✓	✓	MULTI ZONE	
• Takes up to 5 additional minutes for the cycle;	✓	✓	MULTI ZONE	
• Consumes below 0.005kWh of energy.	✓	✓	MULTI ZONE	
FILLING THE RINSE AID DISPENSER				

Rinse aid makes dish DRYING easier. The rinse aid dispenser A should be filled when the RINSE AID REFILL indicator light on the control panel is lit.

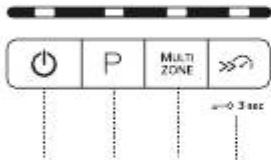

NEVER pour the rinse aid directly into the appliance tub.

FILLING THE DETERGENT DISPENSER

To open the detergent dispenser use the opening device C. Introduce the detergent into the dry dispenser D only. Place the amount of detergent for pre-washing directly inside the tub.

If all-in-one detergents are used, we recommend using the TABLET button, because it adjusts the program so that the best washing and drying results are always achieved.

Usage of detergent not designed for dishwashers may cause malfunction or damage to the appliance.
