If the computer does not operate correctly after you turn it back on, contact a TOSHIBA authorized service provider. ■ Equipment that generates a strong electromagnetic field, such as stereo speakers (other than speakers that are connected to the computer) or speakerphones.

[Page 45: Keeping Yourself Comfortable](#)

Getting Started Keeping yourself comfortable Strain and stress injuries are becoming more common as people spend more time using their computers. However, with a little care and proper use of the equipment, you can work comfortably throughout the day. This section provides hints on avoiding strain and stress injuries. For more information, consult books on ergonomics, repetitive-strain injury, and repetitive-stress syndrome.

[Page 46: Lighting](#)

Getting Started If you are using a conventional chair: ■ Your knees should be slightly higher than your hips. If necessary, use a footrest to raise the level of your knees and ease the pressure on the back of your thighs. ■...

[Page 47: Work Habits](#)

Getting Started Work habits The key to avoiding discomfort or injury from strain is to vary your activities. If possible, schedule a variety of tasks into your working day. Finding ways to break up the routine can reduce stress and improve your efficiency.

[Page 48: Setting Up Your Computer](#)

Getting Started Setting Up Your Computer Setting up your computer may include: ■ Connecting the AC adapter ■ Charging the battery ■ Connecting a printer ■ Connecting an alternate pointing device Connecting the AC adapter Your computer contains a rechargeable battery pack, which needs to be charged before you can use it the first time.

[Page 49: Charging The Battery](#)

Never remove the power plug from the outlet with wet hands. Using the wrong AC adapter could damage your computer. TOSHIBA assumes no liability for any damage in such cases. Never pull directly on the power cable to unplug it. Hold the power plug when removing the cable from the outlet.

[Page 50: Connecting A Printer](#)

Getting Started Connecting A Printer Before connecting a printer, you need to know whether it requires a USB or a parallel interface. Check the printer's documentation. If the printer can be switched between USB and parallel mode, choose parallel if you want to leave your USB ports free for other use.

[Page 51: Connecting A Mouse](#)

Getting Started Connecting A Mouse You may want to use an external mouse or trackball instead of the computer's built-in Touch pad pointing device. Your Satellite computer supports USB-compatible pointing devices. The Touch pad remains operable even if you connect an external pointing device to the computer.

[Page 52: Using The Computer For The First Time](#)

Getting Started Using The Computer For The First Time Slide the display panel latch to the right to release it and then lift the display panel to open the computer. Don't force the display panel open beyond the point where it moves easily.

[Page 53: Using The Touch Pad](#)

Getting Started Using the Touch pad The Touch pad is a touch-sensitive pointing device that provides all the features of a mouse. Please refer to the following instructions on how to operate the Touch pad. The Touch pad is easily accessible by moving any of your fingers off the space bar and onto the Touch pad.

[Page 54: Adjusting Brightness](#)

[Page 72: Using Your Computer As A Desktop Computer](#)

Learning The Basics Using Your Computer As A Desktop Computer By connecting an external monitor, external full-size keyboard, and a mouse, you can work with your notebook as if it were a standard desktop computer. An external monitor connects to the external monitor port. Any USB devices including an external keyboard and pointing device connect to any of the three USB ports.

[Page 73: Setting Up Communications](#)

Learning The Basics Setting Up Communications To connect to the Internet, use an online service, or communicate across the telephone lines with another computer, you need: ■ A modem (supplied with your Satellite notebook computer). ■ A telephone line. ■ A browser (supplied with your computer) or communications program.

[Page 74: Connecting Your Computer To A Network](#)

Standby command. The Standby command can disrupt your network connection. You can disable the Standby command in Power Options (in Control Panel) or the TOSHIBA Power Management Utility (click the icon on the taskbar). Connecting directly to a remote computer If you are connecting directly to a remote computer or a bulletin board service (BBS), you need a general-purpose communications program.

[Page 75: Communications Parameters](#)

Learning The Basics Communications parameters There are four communications parameters: ■ Modem speed - The speed at which the modem transfers information. Speeds are measured in bits per second. ■ Data bits - The number of bits in one character. This number is usually seven or eight.

[Page 76: Turning Off The Computer](#)

Cleaning the computer To keep your computer clean, gently wipe the display panel and exterior case with a lightly dampened cloth. Ask your TOSHIBA dealer for suggestions for appropriate cleaning products. Keep liquid, including cleaning fluid, out of the computer's keyboard, speaker grille, and other openings.

[Page 77: Restoring The Pre-Installed Software](#)

TOSHIBA's Online Resources TOSHIBA maintains a number of online sites to which you can connect. These sites can provide information about TOSHIBA products, give help with technical questions, and keep you up to date with future upgrades.

[Page 78: Chapter 4 Mobile Computing](#)

This chapter covers all aspects of using your computer while travelling. TOSHIBA's Energy-Saving Design TOSHIBA is a partner in the Energy Star Program and has designed this product to meet the Energy Star guidelines for energy efficiency. Your computer enters a low-power state when it is not being used, thereby conserving energy and saving money in the process.

[Page 79: Running The Computer On Battery Power](#)

Mobile Computing Running the computer on battery power The computer uses a removable Lithium Ion (Li-ION) battery pack that provides power when you are away from an AC power source. You can recharge it many times. In addition to the removable battery, the computer has an internal real-time clock (RTC) Lithium rechargeable battery.

[Page 80: Charging Batteries](#)

Mobile Computing Charging Batteries The battery needs to be charged before you can use it to power the computer. You can charge the battery using your computer. Charging the battery To charge the battery while it is in your computer, plug the computer into a live AC outlet.

[Page 81: Charging The Rtc Battery](#)

Mobile Computing Charging the RTC battery In addition to the main battery, the computer contains an internal battery for the real-time clock (RTC). The RTC battery provides power for the internal real-time clock and calendar. During normal use, the main battery keeps the RTC battery adequately charged.

[Page 82: Monitoring Battery Power](#)

The computer needs this time to check the battery's remaining capacity and perform calculations. To check the battery level, you can look at the TOSHIBA Power ® Management Utility, which can be found in the Windows Control Panel.

[Page 83: Conserving Battery Power](#)

Mobile Computing Conserving Battery Power How long a fully charged battery pack lasts when you are using the computer depends on a number of factors, such as: ■ How is the computer configured? ■ How much do you use the display panel instead of an external monitor? ■...

[Page 84: Battery Alarms](#)

You can also set the computer to enter Standby when the alarm goes off. To set the alarm levels: 1. Click the Start button, then click Control Panel. 2. Double-click the TOSHIBA Power Management icon (if in Category View, then first click Performance and Maintenance to make the TOSHIBA Power Management icon appear).

[Page 85: Changing The Battery](#)

Mobile Computing Changing The Battery When your battery runs out of power, you have two options- connect the AC adapter or install a fresh battery. For instructions on using the AC adapter, see "Connecting the AC adapter" in chapter 2. Removing the battery 1.

[Page 86: Inserting A Battery](#)

Batteries should not be disposed of together with household waste. To make sure that they are forwarded to recycling or proper disposal they may be returned free of charge to an authorized TOSHIBA dealer/distributor. Use only batteries recommended by TOSHIBA as replacements.

[Page 87: Travelling Tips](#)

■ Always travel with the computer in a carrying case. TOSHIBA offers a choice of carrying cases for the computer. They all provide plenty of extra space for manuals, power cables, CDROM discs, and floppy disks, etc.

[Page 88: Chapter 5 Using Advanced Features](#)

Using Advanced Features Satellite P20 Chapter 5 Using Advanced Features This chapter explains many advanced features of your notebook computer. Multiple Displays Adjusting display settings You can adjust your display settings in Display Properties. Enter through Start, Control Panel, Appearance and Themes, Display or, right-click ®...

[Page 89: Setting Up More Than One Display](#)

Using Advanced Features Setting up more than one display Make sure that the display device is connected and select the Settings tab in Display Properties. Click on Advanced and select GeForce FX Go5200. Click nView Display Mode in the menu on the left side by clicking the tab.

[Page 90: Multiple Display Properties](#)

Using Advanced Features Multiple display properties If the nView tab is not visible when you click the Advanced button on the Settings tab of the Display Properties window, you must adjust your settings before using nView. Disable your existing dual monitor settings under the Settings tab by doing the following.

[Page 91](#) Using Advanced Features The Display Properties window allows you to adjust more precisely the relative positioning of the two displays when they are configured as an extended desktop. On the Display Properties window, the two displays can be positioned horizontally, vertically or in any diagonal configuration you wish, as shown below.

[Page 92: Playing Dvds](#)

Using Advanced Features Playing DVDs The WinDVD software for playing DVD movie titles is already installed. To use it, simply insert the DVD disc into the disc tray. Your computer will launch the WinDVD software automatically. Using a CD-RW, DVD-R/-RW or DVD Multi Drive If your computer comes with either the CD-RW, DVD-R/-RW or DVD Multi Drive, you can write to either CD-R, CD-RW, or DVD-R media.

[Page 93: Playing Cds, Dvds And Digital Music Files With The Computer On Or Off](#)

Using Advanced Features Playing CDs, DVDs And Digital Music Files With The Computer On Or Off You can listen to CDs with the computer turned off and also start playing digital music files and DVDs, in which case the computer will turn on automatically.

[Page 94: Digital Mode](#)

Using Advanced Features Digital Mode In Digital mode, your computer can play DVD video, MP3s, Wav files, Midi files, and other forms of digital music file. When the CD control buttons are unlocked (by pressing the CD/Digital Mode button for over three seconds) the computer initially enters the CD mode.

[Page 96: Using Wireless Lan](#)

1. Slide the Wireless Communication switch to turn on the Wireless Networking. The LED will light amber to show the on status. 2. Run the TOSHIBA Client Manager from the system task bar to connect the nearest Access Point if you are using 802.11a/b.

[Page 97: Using The Toshiba Power Management Utility](#)

This software allows you to select the power scheme with the most appropriate settings for this computer. You can double click the TOSHIBA Power Management Utility icon on the system taskbar to execute the program. Following the on-screen display step by step panels, you will find following settings.

[Page 98: Chapter 6 Expanding & Upgrading](#)

Expanding & Upgrading Satellite P20 Chapter 6 Expanding & Upgrading This chapter covers things you can do to expand and upgrade your computer including connecting external peripherals, buying additional disk drives to attach externally and installing more system memory. Using External Peripherals Your computer is ideally suited for use as a desktop computer in the office or at home.

[Page 99: Connecting A Usb Keyboard](#)

Expanding & Upgrading Connecting A USB Keyboard You can install a full-size USB keyboard. This may be more convenient for some tasks and saves wear and tear on the computer's built-in keyboard. RIGHT USB PORTS REAR USB PORTS To install an external USB keyboard do as follows: 1.

[Page 100: Connecting An External Usb Pointing Device](#)

Expanding & Upgrading Connecting An External USB Pointing Device You can install an external USB pointing device, such as a mouse, to use instead of, or in addition to, the built-in Touch pad device. You can use any type of pointing device as long as it has a USB interface. RIGHT USB PORTS REAR USB PORTS To install an external USB pointing device do as follows:...

[Page 101: Connecting An External Monitor](#)

Expanding & Upgrading Connecting An External Monitor You might want to connect an external monitor to your computer to have a larger screen and to reduce wear on the built-in LCD screen. You can connect a CRT desktop monitor to the standard 15-pin external monitor port on the rear of the computer, or, if the monitor has a USB interface, to one of the USB ports.

[Page 102: Connecting A Television](#)

Expanding & Upgrading Connecting A Television You might want to connect a television to your computer to have a larger screen to watch DVDs.
