Connecting An External USB Pointing Device

You can install an external USB pointing device, such as a mouse, to use instead of, or in addition to, the built-in Touch pad device. You can use any type of pointing device as long as it has a USB interface.

To install an external USB pointing device do as follows:

1. Plug the device into one of the USB ports on the computer. We recommend right-handed users attach the device to the USB port on the right-hand side of the computer; left-handed users may find it more convenient to use one of the USB ports on the rear.
2. The device may require a driver and possibly other software. Install it

according to the instructions that come with it.

3. Position the device where you want to use it.

You don't have to turn off the computer to connect or disconnect USB devices.

RIGHT USB PORTS

REAR USB PORTS
