Connecting A Mouse

You may want to use an external mouse or trackball instead of the computer's built-in Touch pad pointing device. Your Satellite computer supports USB-compatible pointing devices.

The Touch pad remains operable even if you connect an external pointing device to the computer.

Using a USB pointing device

1. Plug the device into one of the USB ports on the computer. We recommend right-handed users attach the device to the USB port on

the right-hand side of the computer; left-handed users may find it more convenient to use one of the USB ports on the rear.

2. The device will probably require a driver and possibly other software; install it according to the instructions that come with it.

3. Position the device where you want to use it.

You don't have to turn off the computer to connect or disconnect USB devices.
