If a button does not appear on your display or telephone keypad label, see your CTX System Administrator for button assignments. Line Buttons You may have buttons designated as and/or...

[Page 21: Chapter 2 - The Basics](#)

The Basics This chapter shows you the basic operation of your DKT3000-series telephone, IPT1020-SD, or DKT2000-series telephone. The text in this chapter applies to the DKT3000-series telephones, Important! IPT1020-SD, and DKT2000-series telephones, unless otherwise noted. Important - Read First Be sure to check with your CTX System Administrator and make sure you know □...

[Page 22: Which Outgoing/Incoming Call Features Do I Have](#)

The Basics Important - Read First Which Outgoing/Incoming Call Features Do I Have? Check mark here which outgoing/incoming features you have on your system. □ Automatic Line

Selection (ALS): When making outgoing calls, you have ALS if when you lift the handset or press you hear dial tone and the Line Light Emitting Diode (LED) lights steady green.

[Page 23: Making A Call](#)

The Basics Making a Call Making a Call There are three ways to originate a call from your digital telephone: Hot Dialing 1. To make a call using Hot Dialing, dial the number. When you start to dial, the extension button, Spkr and Mic LEDs light. Digits display as they are dialed.

[Page 24: Answering A Call](#)

The Basics Answering a Call Answering a Call There are several ways to answer a call: Handset
► If your telephone is programmed for Ringing Line Preference, pick up the handset and the telephone automatically answers the ringing line. ► If not, press the button associated with the ringing line (flashing green LED).

[Page 25: Message Waiting](#)

The Basics Message Waiting Message Waiting Use your LED/button and LCD to see/retrieve message(s). An extension can receive up to four simultaneous Message Waiting indications and LCD messages. One message is reserved for the Message Center. Your telephone can be programmed to have up to four additional (flexible) Message Waiting buttons/LEDs.

[Page 26: Turning On/Off Mw Led On Another Extension](#)

The Basics Microphone Turning On/Off MW LED on Another Extension If you call an extension and it's busy or there is no answer, you may be able to light that extension's Message Waiting LED and enable that extension to call you back. The ability to perform this feature is set in system programming.

[Page 27: Call Transfer](#)

The Basics Call Transfer Call Transfer 1. While on a call, press . Your Line LED flashes green and you hear internal dial tone. 2. Dial the extension where the call will be transferred. You can remain on the line and announce the call or immediately "blind transfer"...

[Page 28: Conference Calls](#)

The Basics Conference Calls Conference Calls You can conference together up to eight parties (including your own) - with up to six parties being external network lines. The actual number of conference parties with acceptable volume levels depends on the local and far end telephone line conditions. The person who initiates the conference call is the Master.

[Page 29: Adding Voice Mail To A Conference](#)

The Basics Conference Calls Adding Voice Mail to a Conference The Conference Master can add voice mail to a conference. This feature enables participants in a conference to listen to or leave a voice mail message during one telephone call. ►...

[Page 30: Hold](#)

The Basics Hold Hold 1. To place a call on hold, press . Your LCD shows the line on hold. The held Line's LED flashes green while appearances of the line at other stations flash red. • To return to the held call, press the held button.

[Page 31: Volume Control](#)

The Basics Volume Control Volume Control ► To adjust the handset volume ► L to increase volume and M to decrease volume during the call. Press the When you hang up, the volume returns to the default setting. ► To adjust the speaker volume for internal/external calls and background music 1.

[Page 32](#) The Basics LCD Contrast Adjustments Strata CTX DKT/IPT Telephone 06/03...

[Page 33: Chapter 3 - Advanced Operation](#)

Advanced Operation This chapter gives you more details about your DKT3000-series telephone, IPT1020-SD, or DKT2000-series telephone's advanced functions. Using Your LCD If your telephone has an LCD, use this section to learn more about its functions. In its idle state, the

LCD is a desk clock and calendar. When you are on an outside call, the call duration displays.

[Page 34: Soft Keys](#)

Advanced Operation Soft Keys Soft Keys When Soft Keys are on, they replace the functions on the buttons below the LCD. (is a future feature for DKT3000-series phones and the IPT1020-SD.) The following table defines Soft Key Prompts. Table 1 Soft Key Prompts Soft Key Definition...

[Page 35: Soft Key Example](#)

Advanced Operation Soft Keys Soft Key Example When the Soft Key prompts appear on the LCD, the LCD Control Button just below the prompt offers access to that feature. Here's an example of how Soft Keys work. 1. When an outside call is in progress, the LCD appears as shown on the right.

[Page 36: Advisory Messages](#)

Advanced Operation Advisory Messages Advisory Messages Advisory messaging enables you to store an informative message for LCD telephones that call your telephone. The messages can be up to 16 characters long. The Strata CTX provides a number of stored messages, shown in the table below. Message numbers 5~9 can be defined by your CTX System Administrator.

[Page 37: Account Code Calls](#)

Advanced Operation Account Code Calls Account Code Calls Account Codes (Forced or Voluntary) can be used for a variety of reasons including billing, tracking, and line restriction applications. Account Codes are assigned in the system as a fixed length (default is six digits) and are recorded by the system, along with the details of the calls, which can be printed on a Station Message Detail Recording (SMDR) report.

[Page 38: Voluntary Account Codes \(Verified/Non-Verified\)](#)

Advanced Operation Account Code Calls Voluntary Account Codes (Verified/Non-Verified) Voluntary Account Codes are optional. They can be entered during a call and are used for tracking selected calls using Station Message Detail Report (SMDR) call detail recording option. If the system is set for Verified Account Codes, station users must enter a specific code when entering the Voluntary Account Code(s) or the code is not validated for the SMDR call report.

[Page 39: Automatic Busy Redial](#)

Advanced Operation Automatic Busy Redial Automatic Busy Redial After reaching a busy outside number, you can activate Automatic Busy Redial so that the system automatically redials the number at regular intervals. The system repeats the redial until the destination is no longer busy. This feature may not be on some telephones on your system.

[Page 40: Automatic Callback](#)

Advanced Operation Automatic Callback Automatic Callback When you reach a busy station, you can set Automatic Callback to have the system monitor the busy extension and notify you when it becomes idle. Automatic Callback can also place you in queue for an available outside line, if you reach a line group in which all lines are busy.

[Page 41: Background Music](#)

Advanced Operation Background Music Background Music You can set background music over your telephone speaker or over external speakers. Up to 16 different music sources can be applied to the Strata CTX system: the first source is Quiet Tone, all others can be music or recorded information. ►...

[Page 42: Call Forward](#)

Advanced Operation Call Forward Call Forward There are two types of Call Forwarding that you can set. One is System Call Forward (set in system Programming) which automatically directs calls to a predefined location, such as Voice Mail. See your CTX System Administrator to determine or change your System Call Forward destination.

[Page 43: Station Call Forward Categories](#)

Advanced Operation Call Forward Station Call Forward Categories You can set Call Forward for the following categories of calls. Within these categories, you can use five different types of Call

Forward Settings. • Call Forward Any Call – Forwards any call, whether an internal call or incoming line call.

[Page 44: Station Call Forward Procedures](#)

Advanced Operation Call Forward • Call Forward Busy/Do Not Disturb/No Answer – Forwards all calls to your station whenever you are busy, in the DND mode, or after ringing and you do not answer the call within a designated time (set by you when you enable the feature). •...

[Page 45: Call Forward Examples](#)

Advanced Operation Call Forward Call Forward Examples ► To set your telephone to CF Busy-No Answer to an internal extension number ► Press your extension button + = Call Forward Access Code sequence Å = Internal Extension Number Å = Ring time in seconds before Call Forwards Å...

[Page 46](#) Advanced Operation Call Forward Table 2 Call Forward Procedure Feature Button Sequence Call Forward Any Call - Internal and Incoming Line Calls: Forwards any call, whether an internal call or incoming line call. All Calls to an ext. Press ext. button + (tone) + dial the dest.

[Page 47](#) Advanced Operation Call Forward Table 2 Call Forward Procedure (continued) Feature Button Sequence Busy No Answer to Press ext. button + + dial the dest. ext. no. (tone) + timer () (tone) Å%[]#"Å an ext. Busy No Answer to Press ext.

[Page 48](#) Advanced Operation Call Forward Table 2 Call Forward Procedure (continued) Feature Button Sequence Call Forward - Incoming Line Call - Set for Another Station: Enables you to set forwarding of incoming line calls for another telephone within your telephone system Press ext.

[Page 49: Call History](#)

Advanced Operation Call History Call History Incoming calls with Caller ID or ANI information can be optionally recorded into a rolling list for the station where the call is ringing. The call is placed in the list along with the number, name (if provided), time and date of the call, and status of the call (answered, abandoned, or redirected).

[Page 50: Call Pickup](#)

Advanced Operation Call Pickup ► To park a call 1. While on a call, press ...or . The LED flashes green (consultation-hold). If you were on an extension during the call, and you have line button on your telephone, the line LED will flash until the call is picked up (depending on programming).

[Page 51: Page/Internal Call Pickup](#)

Advanced Operation Call Pickup Page/Internal Call Pickup This feature picks up Internal (station to station), Group Page, and All Call Page calls. If these types of calls occur at the same time, the pickup priority is station-to-station and then Page calls in the order of occurrence. In some systems, this feature can be applied to pick up All Call Page exclusively.

[Page 52: Call Waiting](#)

Advanced Operation Call Waiting Notes • The Primary extension number is the directory number by which the telephone set is defined. Other, non-primary extension numbers may also appear on the telephone. By convention, the Primary extension number is assigned to the first button on a multi-button telephone.

[Page 53: Direct Inward System Access \(Disa\)](#)

Advanced Operation Direct Inward System Access (DISA) Direct Inward System Access (DISA) Outside callers with touch tone telephones can call in to lines programmed for Direct Inward System Access (DISA) and dial an extension or outgoing line without going through an attendant or operator. See your CTX System Administrator for details. 1.

[Page 54: Distinctive Ringing](#)

Advanced Operation Distinctive Ringing Distinctive Ringing ► To set distinctive ringing (CTX software R1.2 or lower) 1. Press to enter User Programming Mode. 2. Press a button. The Line

LED is steady green. 3. Enter the ringing pitch number: = Low, = Middle, = High, = Combination...

[Page 55: Do Not Disturb](#)

Advanced Operation Do Not Disturb Do Not Disturb If your station is in Do Not Disturb (DND) mode, internal, external and transferred calls do not ring your station and Off-hook Call Announce calls are denied. You can continue to make calls while in the DND mode. When originating a call in DND mode, you will hear a short burst of interrupted dial tone followed by continuous dial tone.

[Page 56: Setting Dnd For Another Extension](#)

Advanced Operation Door Lock(s) Setting DND for Another Extension ► To activate DND for another extension ► Enter (hear Entry Tone) + the Primary extension of the remote extension + the pass code + (hear Success Tone). This sets DND as if activated by the Primary extension on the target telephone.

[Page 57: Door Phone\(S\)](#)

Advanced Operation Door Phone(s) Door Phone(s) Door phones can be used to call phones selected in system programming. When a door phone calls, you hear a distinctive ringing tone, one or five times (set in system programming). You can also call a door phone and monitor the surrounding area. LCD telephones display the door phone name ID when calls are made to or from door phones.

[Page 58: Echo Cancellation](#)

Advanced Operation Echo Cancellation ► To call/monitor a door phone 1. With the handset off-hook, press an extension button. You hear dial tone and the LED flashes green (in-use). 2. Press (hear three tone bursts), then enter the door phone number (01~24, depending on system size).

[Page 59: Emergency Ringdown](#)

Advanced Operation Emergency Ringdown Emergency Ringdown If a station remains off-hook for a programmable period, it can be automatically treated as an Emergency Call and directed to an emergency destination. The station may have partially dialed a number or have dialed no digits at all. Each station is programmed with its specific emergency ringdown destination.

[Page 60: Off-Hook Call Announce](#)

Advanced Operation Off-hook Call Announce Off-hook Call Announce Off-hook Call Announce (OCA) enables you to complete a call to a busy digital telephone. Your telephone must be programmed to either announce automatically or to announce after you press a button on your dial pad. The destination telephone must be programmed to accept an OCA.

[Page 61: Override Calls](#)

Advanced Operation Override Calls 3. Press again to reconnect to the second caller. You can toggle as often as you choose. If you do not want the first caller to hear your conversation with the second caller, cover the mouthpiece of your handset. Override Calls The available override features are: Busy Override...

[Page 62: Executive Override](#)

Advanced Operation Override Calls Executive Override Executive Override enables you to enter an established conversation. Your telephone can also be programmed to block Executive Override from other telephones. ► To perform Executive Override ► After reaching a busy station, press ...or, if you have an LCD telephone, use the Soft Key.

[Page 63: Class Of Service Override](#)

Advanced Operation Paging Class of Service Override By dialing a Class of Service (COS) Override code, a user can change a station's set of privileges to one associated with the override code. When the call is terminated and another is attempted from the same station, the original COS is applied. This allows selected users to override restrictions that are placed on any telephone in the system.

[Page 64: Answering A Page](#)

Advanced Operation Paging ► To make a Group Page ► Press and enter the Group number (01~16) ...or press extension + and enter the zone number. Answering a Page ► To answer a Group Page, lift the handset off-hook, press extension + enter the Group number.

[Page 65: Privacy](#)

Advanced Operation Privacy Privacy Privacy controls the ability of more than one person to use the same extension or CO line at the same time. Privacy applies to multiple appearances of extensions, Phantom extensions, outside Lines and outside Line Group buttons. The application of Privacy to individual telephones is controlled in system programming.

[Page 66: Speed Dial](#)

Advanced Operation Speed Dial Speed Dial Speed Dial enables you to dial a sequence of up to 32 digits with a shorter code. Dial sequences can include telephone numbers, authorization codes, passwords feature activation codes and pauses. Speed Dial may be used to originate a call or invoked after a call is established.

[Page 67: Storing A Station Speed Dial Number](#)

Advanced Operation Speed Dial Storing a Station Speed Dial Number There are three ways to store a Station Speed Dial number, including Programming Mode, Access Codes and through system programming by your CTX System Administrator. ► To store a Station Speed Dial Number using User Programming Mode 1.

[Page 68: Advanced Speed Dial Operation](#)

Advanced Operation Speed Dial Selected telephones may have the ability to change System Speed Dial Note numbers. Follow this procedure but specify a System Speed Dial number (200~999) instead. 3. Enter the destination digits, then press . The LCD shows "SPEED DIAL" + the Speed Dial Number + destination + #.

[Page 69: Tone/Pulse Dialing](#)

Advanced Operation Tone/Pulse Dialing The numbers are defined in Table Table 5 Dial String Characters Entry Meaning End of Speed Dial Number when entering via access code (Escape. " " functions as an escape key indicating that the number immediately following represents something exceptional.

[Page 70: Voice Mail - Direct Transfer](#)

Advanced Operation Voice Mail - Direct Transfer Voice Mail - Direct Transfer The Strata CTX enables you to transfer a call directly to a voice mailbox without first ringing that person's telephone. ► To transfer a call directly to Voice Mail (VM) 1.

[Page 71](#) Advanced Operation Voice Mail Soft Keys Table 7 Soft Keys for CTX Digital Telephones DKT 3010 SD DKT 2010 SD DKT 3014 SDL DKT 3020 SD Voice Mail Functions DKT 2020 SD IPT1020 SD ACCEPT Confirm automatic copy destination Create a Guest Mailbox ADD DESTS Additional Destinations ADD MBX...

[Page 75: Call Recording](#)

Advanced Operation Call Recording Call Recording While on an active call, a station user can record the conversation and store it in a Strategy voice mailbox. Recordings can also be paused or restarted. Depending upon your System Administrator, you are given either a manual method of recording that allows you to designate the mailbox where the recording will be sent or an auto method that automatically sends the recording to a predefined mailbox that is assigned to the phone you are using.

[Page 76: Other Voice Mail Features](#)

Advanced Operation Call Recording Notes The following notes apply to telephone systems that are networked. For instance, if your company is so large that some departments are connected to one system (node) and others are on another (either in the same building or in another city), the telephones on the other node are considered "remote"...

[Page 92: Led Indicator Details](#)

User Programming LED Indicator Details LED Indicator Details Each line and feature button has a LED next to it which indicates the status of the line or feature associated with the button. Line LEDs light red or green and flash at varying rates to indicate call status (see Table 12).

[Page 93](#) DADM/DSS Console This chapter provides an overview of the following two optional units and describes the features, buttons and associated LEDs. It describes the various models for the following two types of units. • Digital Add-on Module (DADM) – adds 20 line/feature buttons to digital telephones.

[Page 94: Chapter 6 - Dadm/Dss Console Dadm](#)

DADM/DSS Console DADM DADM Digital add-on Modules (DADM) can be connected to 3000-, IPT, and 2000-series telephones to provide additional buttons. Certain models are not interchangeable. The DADM3120 works with the DKT3000-series telephones and the IPT1020-SD. The DADM3020 works with 3000-series telephones only and the 2000-series telephone requires a 2000-series DADM.

[Page 95: Dss Console](#)

DADM/DSS Console DSS Console DSS Console The Direct Station Selection (DSS) console operates alongside of a digital telephone to provide 60 additional buttons. The 3000- series telephone requires a 3000-series DSS; the 2000-series telephone requires a 2000- series DSS. A DDSS3060 example is shown right.

[Page 96: Calling A Station](#)

DADM/DSS Console DSS Console Calling a Station ► To call a station’s extension from either a DSS console or a DADM, press the DSS associated with the station. A station call with a DSS button can be made on-hook or off-hook, and with Voice First or Tone signaling.

[Page 97: Call Transfer With Camp-On](#)

DADM/DSS Console DSS Console Call Transfer with Camp-on You can transfer a call to a busy station from either a DSS console or an DADM. Use the DSS to transfer the call, even though the DSS LED associated with the station you are “transferring to”...

[Page 98: Paging](#)

DADM/DSS Console DSS Console Paging You can make an announcement page to a group of telephone speakers selected in system programming with on the DSS console. (if programmed) on either the DSS console or the DADM can be used for page announcements. See “All Call Page”...

[Page 99: Appendix A - Centrex Application](#)

Centrex Application Your system may be equipped with the Centrex Application, which enhances its feature capability when installed behind a Centrex or PBX system. Your telephone may have access to one or more of the enhanced Centrex features listed below: Flexible Directory Numbering A station’s extension can be three or four digits.

[Page 100: Delayed Ringing](#)

Centrex Application Delayed Ringing Delayed Ringing Outside line or Centrex line(s) can be programmed for a 12-second and/or 24-second ring delay at stations to permit alternate answering conditions. Answer the line when your telephone is ringing. Strata CTX DKT/IPT Telephone 06/03...

[Page 101: Appendix B - Button Labels](#)

Button Labels All Flexible Buttons must be programmed for your telephone in system programming and vary for individual telephones. If a button does not appear on your display or telephone keystrip label, see your CTX System Administrator for button assignments. The button labels in Table 13 are for the Programmable Buttons on your telephone.

[Page 102](#) Button Labels Delayed Ringing Table 13 Feature Button Definitions (continued) Button Definitions Call Forward-No Answer – Press to forward calls to another station or voice mail device when your station is not answered after 8~60 seconds (set at your station). Call Forward-External –...

[Page 103](#) Button Labels Delayed Ringing Table 13 Feature Button Definitions (continued) Button Definitions Program – Press to enter User Programming mode, which enables you to re-define Flexible Buttons to perform other functions, including programming One Touch and Flexible Buttons, register Call Forward assignments, assign Message Waiting Keys and assign BGM sources played over the telephone speaker.
