# Centrex Application

Your system may be equipped with the Centrex Application, which enhances its

feature capability when installed behind a Centrex or PBX system. Your telephone

may have access to one or more of the enhanced Centrex features listed below:

## Flexible Directory Numbering

A station's extension can be three or four digits. It is, therefore, possible to match a

station's extension and Centrex line extension number. Dial the entire station number when indicated.

Some access code numbers may have been changed to avoid system numbering

**Note**

plan conflicts.

## Centrex Feature Buttons

You can access some Centrex features by pressing a pre-programmed Flexible Button on your telephone, instead of dialing a Centrex access code. The Centrex access code, including the necessary flash and/or pause sequence, is activated when the button is pressed. See your Centrex or PBX operations manual for specific details.

## Ringling Repeat

The distinctive ring patterns available in your Centrex system are automatically repeated with your digital telephone, enabling you to answer appropriately for either outside, inside or callback calls.
