Electrical

A three-wire or four-wire, single phase, 240-volt, 60-Hz, AC-only electrical supply is required.

Models rated from 7.3 to 9.6 kW at 240 volts (5.5 to 7.2 kW at 208 volts) require a separate 40-ampere circuit, fused on both sides of the line.

Models rated at 7.2 kW and below at 240 volts (5.4 kW and below at 208 volts) require a separate 30-ampere circuit, fused on both sides of the line.

Use minimum 10 gauge copper wire only. A time-delay fuse or circuit breaker is recommended. A U.L.-listed conduit connector must be provided at the junction box.
