[Page 1](#) FlashAir™ Configuration Software User's Manual (Windows) Revision 2 For the (MAC) User's Manual click here...

[Page 2: Software Installation](#)

3. Insert FlashAir™ ("Product") into SD slot, and go to the Product's directory. 4. Double-click "FlashAir.exe", and installer is launched. Note: The latest FlashAir configuration software can be downloaded from the website below. Please check the website and use the latest version available. URL: <http://www.toshiba.co.jp/p-media/wwsite/flashair.htm>...

[Page 3](#) 5. Choose the appropriate language and Click "Next >".

[Page 4](#) 6. After preparation is finished, the screen below will be displayed. Click "Next >". 7. Choose Destination location for installing Software and click "Next >". In this manual, the destination location is not changed.

[Page 5](#) 8. Click “Install”. 9. After installation is completed, the screen below is displayed. Click “Finish” to complete installation.

[Page 6](#) 10. After the installation is completed, a “FlashAirTool” icon will appear on the desktop of the PC. This completes the Software installation.

[Page 7: Operation Procedure](#)

Operation Procedure Insert the Product into the SD slot and double-click the “FlashAirTool” icon on the desktop of the PC. After the Software starts up, the window below (“Main Window”) is displayed. 3. Card Setting 4. Wireless LAN Startup screen 5.

[Page 8](#) 3. Card Setting When the “Card Setting” button is clicked, the screen below is displayed. (1) Start mode Setting (2) Wireless LAN Setting (3) Card Setting (1) Start mode Setting FlashAir Setting: Start automatically at boot This mode is set as the default setting. The wireless LAN functionality of the Product will run automatically when the device which contains the Product is turned on.

[Page 9](#) Do not use easy-to-guess passwords and please select a strong password. Toshiba recommends you to make a note of your SSID and security key. (3) Card Setting If there is no connection from a device (e.g.

[Page 10](#) wireless LAN functionality will be automatically turned off. This results in the Product working as a normal SDHC memory card only. Please click “Apply” to save the Card Setting.

[Page 11](#) 4. Wireless LAN Startup screen You can select an image for the Wireless LAN Startup screen when you set the “Start mode Setting” as “Start with control image”. Current Image Sample images File selection field Six sample images, which are preloaded, or any image, can be set as the Wireless LAN Startup screen. Click an image from the samples and click “Change”...

[Page 12](#) 5. Format the Card This feature is to format the Product and reset it to the factory default. This feature may cause all the data and initial settings stored in the Product to be lost. Back up your data on multiple types of storage media before using this feature. Initial setup of the Product is required again after formatting.

[Page 13](#) While the window below is displayed, the Product is being reset to the factory default. After formatting is completed, the window below will be displayed. Follow the instructions in this window, take out the Product from SD slot and insert it again. Then click “OK”.

[Page 14](#) This feature is to update the software of the Product. Download the latest version of the software from the website (<http://www.toshiba.co.jp/p-media/wwsite/flashair.htm>) and store it to your PC. Click “Browse” and select the stored file. After selecting the stored file, click the “Update” button.
