Special features

The following features are either unique to TOSHIBA computers or are advanced features, which make the computer more convenient to use. *Please note that the descriptions for starting some special features are based on setting the Control Panel to Category View. On Classic view the description is different.*

Hot Keys

Power On Password

Instant Security

Display Automatic

Power Off

HDD Automatic

Power Off

User's Manual

Key combinations let you quickly modify the system configuration directly from the keyboard without running a system configuration program.

Two levels of password security, supervisor and user, are available to prevent unauthorized access to your computer.

To register a supervisor password, double click the TOSHIBA Assist icon on your desktop, select the SECURE tab and start the Supervisor password utility.

To set a user password, select the SECURE tab on TOSHIBA Assist, then start the User password utility. In the Password tab, you can register a user password.

The hot key function Fn + F1 blanks the screen and disables the computer, providing data security.

This feature automatically cuts off power to the internal display when there is no keyboard input for a specified time. Power is restored when any key is pressed. To specify the time click Start, Control Panel, Performance and Maintenance, Power Options. In the Power Schemes tab you can select the time for the setting.

Turn off monitor

This feature automatically cuts off power to the hard disk drive when it is not accessed for a specified time. Power is restored when the hard disk is accessed. To specify the time, click Start,

Control Panel, Performance and Maintenance, Power Options. In the Power Schemes tab, you can select the time for the Turn off hard disks setting.
