Connecting the AC adapter

Attach the AC adapter when you need to charge the battery or you want to operate from AC power. It is also the fastest way to get started, because the battery pack will need to be charged before you can operate from battery power. The AC adapter can be connected to any power source supplying from 100 to 240 volts and 50 or 60 hertz. For details on using the AC adapter to charge the battery pack, refer to Chapter 6,

Power-Up

Use of the wrong adapter could damage your computer. TOSHIBA

assumes no liability for any damage in such case. The output rating for the computer is 15 volts DC.

1. Connect the power cord to the AC adapter.
2. Connect the DC output plug on the AC adapter to the DC IN input port on the back of the computer.
3. Plug the power cord into a live wall outlet. The Battery and DC IN indicators on the front of the computer should glow.
