Operating Basics

Bluetooth wireless technology

Bluetooth™ wireless technology eliminates the need for cables between electronic devices such as desktop computers, printers and mobile phones. You cannot use the built-in Bluetooth functions and an optional Bluetooth device simultaneously.

Bluetooth wireless technology has the following features:

Worldwide operation

The Bluetooth radio transmitter and receiver operate in the 2.4 GHz band, which is license-free and compatible with radio systems in most countries in the world.

Radio links

You can easily establish links between two or more devices. The link is maintained even if the devices are not within line of sight.

Security

Two advanced security mechanisms ensure a high level of security:

Authentication prevents access to critical data and makes it impossible to falsify the origin of a message.

Encryption prevents eavesdropping and maintains link privacy.

Bluetooth™ Stack for Windows

Please note that this software is specifically designed for the following operating systems:

Microsoft

Microsoft

Detailed information regarding the use with these operating systems is listed below. Please refer also to the electronic information which is included with each software.

This Bluetooth™ Stack is based on Bluetooth™ Version 1.1/1.2/2.0+EDR specification. TOSHIBA cannot confirm compatibility between any PC products and/or other electronic devices that use Bluetooth™ other than TOSHIBA mobile PCs.

Release Notes related to the Bluetooth™ Stack for Windows

1. Install:

When installing on Windows 2000 or Windows XP, please note that the Bluetooth™ Stack for Windows signature

2. Fax application software:

Please note that there are some fax application software applications that you cannot use with this Bluetooth™ Stack.
