Troubleshooting

•

## Bookmarks

3. The Control Center screen is displayed. Click the non-enrolled finger icon above the finger.

4. The Fingerprint Enrollment screen is displayed. Confirm the message and click Next.

5. The Scanning Practice screen is displayed. You can practice swiping your finger. When you have finished practicing swiping your finger, click Next.

6. The Fingerprint Image Capture screen is displayed. Follow the onscreen instructions and use the same finger you have selected under the Control Center to swipe your finger with good images three times for the fingerprint template to be created.

7. In case of finger injury or authentication failure, it is recommended that another fingerprint also be enrolled. The following message will be displayed:

fingerprint images.]  
with another finger.

## Windows logon via fingerprint authentication

In place of the usual Windows logon by ID and password, fingerprint authentication also allows logon to Windows.

This is useful especially when many users are using the PCs, as user selection can be skipped.

### *Fingerprint authentication procedure*

1. Start up the computer.
2. The Logon Authorization screen is displayed. Choose any of the enrolled fingers and swipe the fingerprint on the sensor. If authentication is successful, the user will be logged on to Windows.

*If the fingerprint authentication fails, please logon using the Windows logon password.*

*Please logon using the Windows logon password if the fingerprint authentication failed for five times. To logon using the Windows logon password, enter the Windows logon password at the screen as normal.*

*A warning message will be displayed when authentication is abnormal or authentication is not successful within a fixed duration.*

User's Manual

[We recommended enrolling at least two

Click OK and repeat steps 3, 4, 5 and 6
