[Page 2](#) TOSHIBA AMERICA INFORMATION SYSTEMS, INC. ("TOSHIBA"), ITS AFFILIATES AND SUPPLIERS DO NOT WARRANT THAT OPERATION OF THE PRODUCT WILL BE UNINTERRUPTED OR ERROR FREE. YOU AGREE THAT TOSHIBA,...

[Page 3](#) Only Peripherals complying with the FCC Class B limits may be attached to this equipment. Operation with noncompliant peripherals or peripherals not recommended by Toshiba is likely to result in interference to radio and TV reception. Shielded cables must be used between the external devices and the computer's ports.

[Page 4: Industry Canada Requirement](#)

This device must accept any interference received, including interference that may cause undesired operation. Contact either: Toshiba's Support Web site at pcsupport.toshiba.com. Or call the Toshiba Global Support Centre: Within the United States at (800) 457-7777 Outside the United States at (949) 859-4273 Industry Canada Requirement This Class B digital apparatus complies with Canadian ICES-003.

[Page 5: Telephone Company Procedures](#)

Toshiba Corporation, Toshiba America Information Systems, Inc. or an authorized representative of Toshiba, or the Toshiba Support Centre within the United States at (800) 457-7777 or Outside the United States at (949) 859-4273. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

[Page 6](#) Alarm Equipment If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer. Instructions for IC CS-03 Certified Equipment NOTICE: The Industry Canada label identifies certified equipment.

[Page 7: Wireless Interoperability](#)

Wireless Interoperability The TOSHIBA Wireless LAN Mini PCI Card products are designed to be interoperable with any wireless LAN product that is based on Direct Sequence Spread Spectrum (DSSS) radio technology, and is compliant to: The IEEE 802.11 Standard on Wireless LANs (Revision A/B/G), as defined and approved by the Institute of Electrical and Electronics Engineers.

[Page 8: Regulatory Information](#)

The radiated output power of the TOSHIBA Wireless LAN Mini PCI Card is far below the FCC radio frequency exposure limits. Nevertheless, the TOSHIBA Wireless LAN Mini PCI Card shall be used in such a manner that the potential for human contact during normal operation is minimized. The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

[Page 9](#) NOTE The above Caution information applies to products that operate with an 802.11a device. EU Declaration of Conformity TOSHIBA declares that this product conforms to the following Standards: Supplementary *The product complies with the Information: requirements of the Low Voltage Directive 73/23/EEC, the EMC Directive 89/336/EEC and/or the R&TTE Directive...

[Page 10](#) This Directive applies to EU member countries only and does not apply to end users in other countries such as the United States. Although the initial emphasis is in Europe, Toshiba is already working with design engineers, suppliers, and other partners to determine appropriate worldwide product life cycle planning and end-of-life strategies for our products.

[Page 11](#) 2. If this equipment causes RF interference to other radio stations, promptly change the frequency being used, change the location of use, or turn off the source of emissions. 3. Contact TOSHIBA Direct PC if you have problems with interference caused by this product to Other Radio Stations.

[Page 12: Device Authorization](#)

This equipment uses a frequency bandwidth from 2,400 MHz to 2,483.5 MHz. It is possible to avoid the band of mobile object identification systems. 3. TOSHIBA Direct PC Monday - Friday:

[Page 13: Radio Approvals For Wireless Devices](#)

[Page 39: Safety Icons](#)

Introduction Safety icons Safety icons This manual contains safety instructions that must be observed to avoid potential hazards that could result in personal injuries, damage to your equipment, or loss of data. These safety cautions have been classified according to the seriousness of the risk, and icons highlight these instructions as follows: Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

[Page 40: Other Documentation](#)

To stay current on the most recent software and hardware options for your computer, and for other product information, be sure to regularly check the Toshiba Web site at pcsupport.toshiba.com. If you have a problem or need to contact Toshiba, see “If Something Goes Wrong” on page...

[Page 41: Chapter 1: Getting Started](#)

Chapter 1 Getting Started This chapter provides tips for using your computer effectively, summarizes how to connect components, and explains what to do the first time you use your computer. The “Instruction Manual for Safety and Comfort,” that is shipped with your computer, contains important safety information.

[Page 42: Keeping Yourself Comfortable](#)

Extreme heat, cold, or humidity. Liquids and corrosive chemicals. Keeping yourself comfortable The Toshiba Instruction Manual for Safety and Comfort, included with your computer, contains helpful information for setting up your work environment and tips for working comfortably throughout the day.

[Page 43](#) Getting Started Selecting a place to work Avoid prolonged physical contact with the underside or surface of the computer. Computer base and palm rest can become hot! Avoid prolonged contact to prevent heat injury to skin. Read the “Avoid extended contact between computer base/palm rest and skin”...

[Page 44: Important Information On Your Computer's Cooling Fan](#)

Getting Started Setting up your computer Important information on your computer’s cooling fan Your computer may have a CPU cooling fan that cools the CPU by drawing outside air into the computer. Always make sure your computer and AC adaptor have adequate ventilation and are protected from overheating when the power is turned on or when an AC adaptor is connected to a power outlet (even if your computer is in Sleep mode).

[Page 45: Setting Up Your Software](#)

Getting Started Setting up your computer NOTE Please handle your computer carefully to avoid scratching or damaging the surface. Setting up your software When you turn on the computer for the first time, do not turn off the power again until the operating system has loaded completely. NOTE The names of windows displayed, and the order in which windows appear, may vary according to your software setup choices.

[Page 46: Registering Your Computer With Toshiba](#)

Product registration can be completed by either double-clicking the Toshiba Registration icon on your desktop or by visiting the Toshiba Web site at www.register.toshiba.com. Failure to complete Product Registration will not diminish Customer rights under the Toshiba standard limited Warranty.

[Page 47: Connecting To A Power Source](#)

TOSHIBA Battery Charger (that may have been provided with your computer), or use AC adaptors and battery chargers specified by TOSHIBA to avoid any risk of fire or other damage to the computer. Use of an incompatible AC adaptor or Battery Charger could cause fire or damage to the computer possibly resulting in serious injury.

[Page 48](#) Getting Started Connecting to a power source To connect AC power to the computer: Connect the power cord/cable to the AC adaptor. (Sample Illustration) Connecting the power cord/cable to the AC adaptor Handling the cord on this product will expose you to lead, a chemical known to the State of California to cause birth defects or other reproductive harm.

[Page 49: Charging The Main Battery](#)

Getting Started Charging the main battery The computer's main battery light gives you an indication of the main battery's current charge: Glows amber while the main battery is being charged (AC adaptor connected) Glows green when the main battery is fully charged Is unlit when the main battery has discharged, the battery is not charging, or the AC adaptor is not plugged into the computer or AC outlet...

[Page 50: Using The Computer For The First Time](#)

Getting Started Using the computer for the first time NOTE Battery life and charge time may vary depending on the applications, power management settings, and features used. Using the computer for the first time The computer is now ready for you to turn it on and begin using it. Opening the display panel Facing the front of the computer, locate the center of the display panel.

[Page 51: Your Computer's Features And Specifications](#)

Getting Started Using the computer for the first time Small bright dots may appear on your screen display when you turn on your computer. Your display contains an extremely large number of thin-film transistors (TFT) and is manufactured using high-precision technology.

[Page 52: Adding Memory \(Optional\)](#)

You may want to increase the computer's memory if you use complex software or process large amounts of data. NOTE Before adding external devices or memory, Toshiba recommends setting up your software. See "Setting up your software" on page...

[Page 53: Installing A Memory Module](#)

Getting Started Adding memory (optional) Installing a memory module Memory modules can be installed in the memory module slots on the base of the computer. You will need a small Phillips screwdriver for this procedure. If the computer has been running recently, the memory module may be hot.

[Page 54](#) Getting Started Adding memory (optional) If the computer is on, begin at step 1; otherwise, skip to step 3. Click Start, and then click the arrow next to the lock button in the lower-right corner of the Start menu. The Shut Down menu appears. Arrow Start Shut Down Menu...

[Page 55](#) Getting Started Adding memory (optional) Using a small Phillips screwdriver, loosen the captive screw that secures the memory module slot cover. Back of computer (Sample Illustration) Removing the memory module slot cover Remove the memory module slot cover. Place the screw and the cover in a safe place so that you can retrieve them later.

[Page 56](#) Getting Started Adding memory (optional) NOTE If your system has the memory modules stacked on top of one another, you must remove the top module first before removing/installing the bottom module. NOTE For this model Slot A is the bottom slot. Slot B is the top slot. If only one memory module is to be installed, it must be installed in Slot A.

[Page 57](#) Getting Started Adding memory (optional) Once the module's connector is fully inserted into the socket, press downward on the top edge of the module to seat the module into the latches at the sides of the socket. These latches should "snap" into place securely with the corresponding cutouts in the side of the module.

[Page 58: Removing A Memory Module](#)

Getting Started Adding memory (optional) Replace the memory module slot cover and secure it using the screw. Re-insert the main battery. For more information on inserting the main battery, see "Inserting a charged battery" on page 119. Turn the computer right side up. Reconnect the cables.

[Page 59](#) Getting Started Adding memory (optional) NOTE The following screen may appear when you turn on the power: ® If "Start Windows Normally" is highlighted, then press Enter If one of the Safe Mode options is highlighted, it is best to press to go into Safe Mode, then shut down and restart the system, at Enter ®...

[Page 60: Checking Total Memory](#)

Getting Started Adding memory (optional) Gently lift the memory module to a 30-degree angle and slide it out of the slot. Back of computer Slot B Slot A (Sample Illustration) Removing the memory module Replace the memory module slot cover and secure it using the screw.

[Page 61: Hard Drive Recovery Utilities](#)

Getting Started Hard Drive Recovery Utilities If the computer does not recognize the memory configuration, turn off the computer and remove the memory module slot cover (complete steps "Installing a memory module" on page 53), and then check that the module is inserted completely into the socket and lined up squarely with the socket latches.

[Page 62: Creating Recovery Dvds](#)

DVDs to copy the hard drive recovery. If your optical disc drive is not writable, contact Toshiba Customer Support to obtain the Recovery media for your system. The Toshiba Global Support Centre in the United States is (800) 457-7777, outside the United States it is (949) 859-4273. To create recovery DVDs: Double-click the Recovery Disc Creator icon on the ®...

[Page 63: Hard Disk Drive Recovery Options](#)

Getting Started Hard Drive Recovery Utilities Hard Disk Drive Recovery options The following are the available hard disk drive recovery options: Recovering the original factory image (recommended recovery method) Hard Disk Drive Recovery using the recovery partition Erasing the hard disk Recovering the C: partition of the HDD without changing the current partition size Recovering the C: partition with a user specified size...

[Page 64](#) If not skip to step (Sample Image) Product Recovery Menu screen When the Toshiba Recovery Wizard screen displays, select one of the options and then click Next. The options are: Recovery of Factory Default Software...

[Page 65](#) Be sure to save your work to external media first. On the Toshiba Recovery Wizard screen, select Recovery of Factory Default Software, and then click Next. The Recovery of Factory Default Software screen appears.

[Page 66](#) The Recovery Wizard allows you to delete all data and partitions from the hard disk. To delete the data and partitions from your hard disk: On the Toshiba Recovery Wizard screen, select Erase the hard disk, and then click Next. The next screen lists the two methods you can choose: Delete all data and partitions from the hard disk—This...

[Page 67](#) To recover only your C: drive: On the Toshiba Recovery Wizard Screen, select Recovery of Factory Default Software, and then click Next. Select Recover without changing the hard drive partitions.

[Page 68: Hard Disk Drive Recovery Using The Recovery Media](#)

Using the arrow keys, select the DVD option and press Enter The Selecting a Process Screen will appear. Select one of the options and then click Next. The options are: Toshiba Recovery wizard System Recovery Options (Sample Image) Selecting a Process screen...

[Page 69](#) Getting Started Hard Drive Recovery Utilities ® If your system offers a choice of Windows Vista 32-bit or 64-bit operating system, select one at this time. If not skip to step (Sample Image) Product Recovery Menu screen A warning screen will appear stating that when the recovery is executed all data will be deleted and rewritten.

[Page 70: Checking The Hdd Operating Status](#)

Highlight the hard disk drive in the Volume list to display its status in the lower portion of the screen. Installing drivers and applications The Toshiba Application Installer allows you to reinstall the drivers and applications that were originally bundled with your computer. To reinstall drivers and applications: Double-click the Toshiba Application Installer icon on the ®...

[Page 71: Using The Touchpad](#)

Getting Started Using the TouchPad™ Click the item(s) you want to install. Click Install. Follow the on-screen prompts to complete the installation process.™ Using the TouchPad™ The TouchPad, the small, rectangular area located in front of the keyboard, is sensitive to touch and enables you to move the cursor with the stroke of a finger.

[Page 72: Control Buttons](#)

Getting Started Using external display devices Control buttons When a step instructs you to click or choose an item, move the cursor to the item, then press and release the primary (left-hand) button. To double-click, press the primary button twice in rapid succession.

[Page 73: Directing The Display Output When You Turn On The Computer](#)

Getting Started Using external display devices Directing the display output when you turn on the computer Once you have connected an external display device, you can choose to use the internal display only, the external device only, or both simultaneously. NOTE Some modes are only available with the appropriate device attached and turned on.

[Page 74: Adjusting The Quality Of The External Display](#)

Getting Started Using an external keyboard Adjusting the quality of the external display To obtain the best picture quality from your television (or other video display device), you may need to adjust the video settings. See the video device documentation for additional configuration steps.

[Page 75: Setting Up A Printer](#)

Getting Started Connecting a printer If your printer does not support Plug and Play, you can set up the printer as described in "Setting up a printer" on page To connect a printer to your computer: Connect the printer cable to the printer and then connect the other end to one of the computer's USB ports.

[Page 76: Connecting An Optional External Diskette Drive](#)

Getting Started Connecting an optional external diskette drive Connecting an optional external diskette drive Some operations, such as creating a password service diskette, require a diskette drive designed for use with 3.5-inch diskettes. (Sample Illustration) Optional external USB diskette drive To connect an optional external USB diskette drive, connect the cable to one of the computer's USB ports.

[Page 77: Options For Turning Off The Computer](#)

Getting Started Turning off the computer Options for turning off the computer Depending on the operating system installed, you have more than one option available for turning off the computer: Shut Down, Hibernate, and Sleep. Each option has its advantages. Use the Shut Down or Hibernate command if you will not be using the computer for several days or if you must turn off your computer.

[Page 78](#) Getting Started Turning off the computer For information on how to use and configure Hibernation mode see "Using and configuring Hibernation mode" on page Sleep mode The Sleep command places the computer into a power-saving mode. Sleep saves the current state of the computer to memory so that, when you restart the computer, you can continue working from where you left off.

[Page 79: Using The Shut Down Command](#)

Getting Started Turning off the computer Using the Shut Down command The Shut down command completely shuts down the computer without saving your work or the current state of the computer. This command closes all open programs, shuts down the operating system, and then turns off your computer.

[Page 80](#) Getting Started Turning off the computer Click Change advanced power settings. The Advanced settings tab of the Power Options window appears. (Sample Image) Advanced settings tab of Power Options screen Click Power buttons and lid to display the actions that you can configure.

[Page 81: Using And Configuring Hibernation Mode](#)

Getting Started Turning off the computer Click Apply. Click OK. Once the computer is configured, you can turn it off by either pressing the power button or closing the display panel, depending on the options set. Restarting your computer To start the computer up again, press the power button until the on/off light glows green.

[Page 82](#) Getting Started Turning off the computer To use any of these methods, you first need to enable them using the Power Options feature. Click Start, Control Panel, System and Maintenance, and then Power Options. The Power Options window appears. Click Change plan settings under the power plan to be customized.

[Page 83: Using And Configuring Sleep Mode](#)

Getting Started Turning off the computer Power button action Set this option to Hibernate if you want the computer to go into Hibernation mode when you press the power button. Start menu power button Set this option to Hibernate if you want the computer to go into Hibernation mode when you click the power button in the Start menu.

[Page 84](#) Getting Started Turning off the computer Click Sleep. The computer saves the status of all open programs and files to the memory, turns off the display, and enters into a low-power mode. The on/off light blinks amber indicating the computer is in Sleep mode.

[Page 85](#) Getting Started Turning off the computer To disable the computer from automatically entering Sleep mode, select Never. Click Change advanced power settings. The Advanced settings tab of the Power Options window appears. (Sample Image) Advanced settings tab of Power Options screen Click Power buttons and lid to display the actions that you can configure.

[Page 86: Closing The Display Panel](#)

Getting Started Customizing your computer's settings Click Apply. Click OK. Once the computer is configured, you can place it into Sleep mode by either pressing the power button or closing the display panel, depending on the Sleep options set. Starting again from Sleep mode To start up the computer from Sleep mode, press the power button until the on/off light glows green.

[Page 87: Cleaning The Computer](#)

You may want to secure your computer to a heavy object such as your desk. The easiest way to do this is to purchase an optional computer lock cable. For more information on purchasing a cable lock, visit accessories.toshiba.com. (Sample Illustration) Computer lock cable To secure the computer: Wrap the cable through or around some part of a heavy object.

[Page 88](#) Getting Started Caring for your computer Pass the locking end through the loop. Insert the cable's locking end into the security lock slot on your computer, then engage the locking device. The computer is now securely locked. (Sample Illustration) Attaching security lock cable...

[Page 89: Chapter 2: Learning The Basics](#)

Chapter 2 Learning the Basics This chapter gives some computing tips and provides important information about basic features. Computing tips Save your work frequently. Your work stays in the computer's temporary memory until you save it to the internal storage drive. If the network you are using goes down and you must restart your computer to reconnect, or your battery runs out of charge while you are working, you will lose all work since you last saved.

[Page 90](#) Learning the Basics Computing tips Back up your files to disks (or other removable media) on a regular basis. Label the backup copies clearly and store them in a safe place. It is easy to put off backing up because it takes time. However, if your internal storage drive suddenly fails, you will lose all the data on it unless you have a separate backup copy.

[Page 91: Using The Keyboard](#)

Learning the Basics Using the keyboard Using the keyboard Your computer's keyboard contains character keys, control keys, ® function keys, and special Windows keys, providing all the functionality of a full-size keyboard. (Sample Illustration) Keyboard Character keys Typing with the character keys is very much like typing on a typewriter, except that: The space bar creates a space character instead of just passing over an area of the page.

[Page 92: Ctrl, Fn, And Alt Keys](#)

Learning the Basics Using the keyboard Ctrl, Fn, and Alt keys (Sample Illustration) Ctrl, Fn, and Alt keys Ctrl , and keys do different things depending on the program you are using. For more information, see your program documentation. Function keys The function keys (not to be confused with the key) are the 12 keys at the top of the keyboard.

[Page 93: Overlay Keys](#)

Learning the Basics Using the keyboard Overlay keys The keys with gray numbers and symbols on the front of them form the numeric and cursor overlay. This overlay lets you enter numeric data or control the cursor as you would using the 10-key keypad on a desktop computer's keyboard.

[Page 94: Starting A Program](#)

Learning the Basics Starting a program Starting a program The easiest way to start a program is to double-click the name of the file that contains the information you want to work on. To find ® the file, use the Start menu or Windows Explorer.

[Page 95: Starting A Program From Windows](#)

Learning the Basics Starting a program ® Starting a program from Windows Explorer If a program is not listed in the All Programs menu, you can start it ® ® from Windows Explorer. Windows Explorer gives you a view of your computer's contents as a hierarchy or "tree."...

[Page 96: Starting A Program Using The Start Search Field](#)

Learning the Basics Saving your work Starting a program using the Start Search field This example uses the Start menu's Start Search field to start WordPad: Click Start to display the Start menu. The Start Search field appears at the bottom of the Start menu. Start Search field...

[Page 97](#) Learning the Basics Saving your work Saving files ® In your Windows -based application, click File, and then Save. Click Browse folders. If you are working with a document that already has a file name, this is all you need to do. If you created a new document, your program displays a Save As dialog box.

[Page 98: Printing Your Work](#)

Learning the Basics Printing your work Using a file extension Most programs assign an extension to the file name that identifies the file as being created in the program with a particular format. For ® example, Microsoft Word saves files with a .doc extension. Any ®...

[Page 99: Backing Up Your Work](#)

Learning the Basics Backing up your work Specify the print parameters. For example, the range of pages and number of copies to print. Click Print. Backing up your work Back up all the files you create in case something happens to your computer.

[Page 100: Optical Drive Components](#)

Learning the Basics Using the optical drive For these reasons, your computer may come with an optical drive. TECHNICAL NOTE: Your optical drive is set to play region 1 (North America) DVD-ROMs. If you play a DVD disc from another region, the drive will automatically change to play in the format of the other region.

[Page 101: Inserting An Optical Disc](#)

Learning the Basics Using the optical drive Manual eject hole—Use if you need to release the disc tray when the power is off. Use a straightened paper clip or other narrow object to press the manual eject button located inside the hole. Never use a pencil to press the manual eject button.

[Page 102](#) If you insert the disc incorrectly, it may jam the drive. If this happens, contact Toshiba support for assistance. Push the disc tray in by pressing gently on the center of the tray until it clicks into place.

[Page 103: Playing An Audio Cd](#)

Depending on the configuration, your computer may come with an optical drive that allows you to: Play pre-recorded and recorded optical media. Read/write data and multi-media files to recordable optical media. For more information regarding supported optical media formats please refer to your computer's detailed specifications at pcsupport.toshiba.com.

[Page 104: Removing A Disc With The Computer On](#)

Due to manufacturing and quality variations in third party optical media (e.g., CD or DVD) or optical media players/recorders, in certain cases, your Toshiba optical drive may not record on certain optical media that bear the applicable logo, or play back optical media recorded by other computers or optical media recorders.

[Page 105: Caring For Optical Discs](#)

Toshiba's online resources Toshiba maintains a number of online sites to which you can connect. These sites provide information about Toshiba products, give help with technical questions and keep you up to date with future upgrades.

[Page 106: Chapter 3: Mobile Computing](#)

It has a number of other features that enhance its energy efficiency. Many of these energy-saving features have been preset by Toshiba. We recommend you leave these features active, allowing your computer to operate at its maximum energy efficiency, so that you...

[Page 107: Running The Computer On Battery Power](#)

® *Toshiba EasyGuard technology comprises a number of features some of which may or may not be available on a particular Toshiba computer depending on the model selected. See easyguard.toshiba.com for detailed information. Running the computer on battery power The computer contains a removable Lithium-Ion (Li-Ion) battery that provides power when you are away from an AC outlet.

[Page 108: Power Management](#)

Changes to these settings may result in system performance or stability issues. Users who are not completely familiar with the power management component of the system should use the preset configuration. For assistance with setup changes, contact Toshiba's Global Support Centre.

[Page 109: Using Additional Batteries](#)

Never leave batteries in the battery charger for more than a week at a time. Doing so may reduce the potential charge of the battery. Always use the battery charger specified by Toshiba. You can order a Toshiba battery charger from Toshiba's Web site at accessories.toshiba.com.

[Page 110: Charging The Rtc Battery](#)

Mobile Computing Charging batteries The battery may not start charging immediately under the following conditions: The battery is extremely hot or cold. To ensure that the battery charges to its full capacity, wait until it reaches room temperature (50 to 80 degrees Fahrenheit, 10 to 26 degrees Celsius).

[Page 111: Monitoring Main Battery Power](#)

Mobile Computing Monitoring main battery power NOTE It is seldom necessary to charge the RTC battery because it charges while the computer is on. If the RTC battery is low, the real-time

clock and calendar may display the incorrect time and date or stop working.

[Page 112: Determining Remaining Battery Power](#)

Mobile Computing Monitoring main battery power HINT: Be careful not to confuse the battery light () with the on/off light (). When the on/off light flashes amber, it indicates that the system is suspended (using the Windows operating system Sleep command). Power button System Indicator Lights...

[Page 113: What To Do When The Main Battery Runs Low](#)

Mobile Computing Monitoring main battery power Highlight the power icon in the Notification Area. A pop-up message displays the remaining battery power as a percentage. With repeated discharges and recharges, the battery's capacity gradually decreases. A frequently used older battery does not power the computer for as long as a new battery, even when both are fully charged.

[Page 114: Conserving Battery Power](#)

Mobile Computing Monitoring main battery power To change the default notification settings: Click Start, Control Panel, Mobile PC, and then Power Options. The Power Options window appears. Click Change plan settings under the power plan to be customized. The Edit Plan Settings window appears. Click Change advanced power settings.

[Page 115: Power Plans](#)

Mobile Computing Monitoring main battery power There are various ways in which you can conserve power and extend the operating time of your battery: Enable Sleep or Hibernation, which saves power when you turn off the computer and turn it back on again ®...

[Page 116: Using A Hot Key To Set The Power Plan](#)

Mobile Computing Monitoring main battery power To edit a plan or to edit advanced settings, continue to the following NOTE steps. Click Change Plan Settings to choose the plan you want to edit. This screen allows you to change basic settings. Click Change Advanced Settings to access settings for battery notification levels, internal storage drive power save time, etc.

[Page 117: Changing The Main Battery](#)

Mobile Computing Changing the main battery While continuing to press , press until you select the desired Power Plan. The Power Plan options are: Balanced, Power Saver, and High Performance. Release the key. The hot key card disappears. You are now in the selected mode. Changing the main battery When your main battery has run out of power, you have two options: plug in the AC adaptor or install a charged main battery.

[Page 118](#) Mobile Computing Changing the main battery Slide the battery release lock to the unlocked position. (Sample Illustration) Unlocking the battery release lock Slide the battery release latch to release the battery. Pull the discharged battery out of the computer. (Sample Illustration) Removing the battery If the battery is leaking or its case is cracked, put on protective gloves to handle it, and discard it immediately.

[Page 119: Inserting A Charged Battery](#)

Mobile Computing Changing the main battery Inserting a charged battery To insert a battery: Wipe the terminals of the charged battery with a clean cloth to ensure a good connection. Insert the charged battery into the slot until the latch clicks. The battery pack has been designed so that you cannot install it with reverse polarity.

[Page 120: Taking Care Of Your Battery](#)

If a battery is leaking or damaged, replace it immediately. Use protective gloves when handling a damaged battery. To replace the main battery, use an identical battery that you can purchase through the Toshiba Web site at accessories.toshiba.com. A reverse polarity condition should be avoided with all batteries.

[Page 121: Maintaining Your Battery](#)

Mobile Computing Taking care of your battery Maintaining your battery Fully discharging your battery pack will allow better accuracy of the battery meter. To fully discharge your battery pack: Periodically, disconnect the computer from a power source and operate it on battery

power until the battery pack fully discharges.

[Page 122: Disposing Of Used Batteries](#)

If you cannot find the information you need elsewhere, call Toshiba at: (800) 457-7777. In addition, Toshiba's recycling initiatives include recycling programs, events and consumer promotions. For details, visit www.ToshibaDirect.com, select Recycling &...

[Page 123: Traveling Tips](#)

Never leave your computer on a sunny ledge or in a place where it could get wet or covered in dust. Always travel with the computer in a carrying case. Toshiba offers a choice of carrying cases for the computer. They all provide plenty of extra space for manuals, power cords, and compact discs.

[Page 124: Chapter 4: Exploring Your Computer's Features](#)

Chapter 4 Exploring Your Computer's Features In this chapter, you will explore some of the special features of your computer. Exploring the desktop The desktop is the launching pad for everything you can do in the ® Windows operating system. You use its features to start programs, find documents, set up system components, and perform most other computing tasks.

[Page 125: Finding Your Way Around The Desktop](#)

Exploring Your Computer's Features Exploring the desktop Finding your way around the desktop Your computer's desktop includes several standard features: icons, Start button, Taskbar, Notification Area, and background pattern. Icons Start button Taskbar Notification Area ® (Sample Image) Windows operating system desktop Icons An icon represents a folder, file, or program that can be quickly activated by double-clicking the icon.

[Page 126](#) Exploring Your Computer's Features Exploring the desktop Your desktop may contain other icons depending on your ® configuration. See Windows online Help for more specific information on each icon and how to use it. Start button You use the Start button to: Start programs Open documents Adjust system settings...

[Page 127: Setting Up For Communications](#)

Exploring Your Computer's Features Setting up for communications Setting up for communications To connect to the Internet, use an online service, or communicate across the telephone lines with another computer, you need: A browser or communications program An Internet Service Provider (ISP) or online service if you plan to use the Internet A way to connect to the ISP (for example modem/ ®...

[Page 128: Connecting A Modem To A Telephone Line](#)

(WAN) For specific information about connecting to a LAN or WAN, consult your network administrator. Send a fax directly from your computer For more detailed information regarding your computer's modem, visit Toshiba's Web site at accessories.toshiba.com.

[Page 129](#) Exploring Your Computer's Features Setting up for communications Before you can communicate using the modem, you need to connect it to a telephone line. Your computer's built-in modem port provides an RJ-11 jack, allowing you to connect the modem to a standard voice-grade telephone line.

[Page 130: An Overview Of Using The Internet](#)

Double-click the ConfigFree icon in the Notification Area. Press the TOSHIBA Assist button (if applicable to your system) to open the TOSHIBA Assist, and then click the ConfigFree icon. Click the ConfigFree icon in the Notification Area, and then click the desired utility.

[Page 171](#) Utilities ConfigFree® Status of Wireless Connection switch (Sample Image) Connectivity Doctor screen Profile Settings The Profile Settings utility lets you save network settings in ® "profiles." ConfigFree profiles are useful for easily switching network settings and devices. You can switch network settings simply by selecting the profile with the desired settings.

[Page 172](#) Utilities ConfigFree® To create a profile: Click the icon in the Notification Area. Move the pointer to Profile. Click Open Settings. The ConfigFree Profile Settings window appears. (Sample Image) ConfigFree Profile Settings window Click Add to start the Create Profile Wizard.

[Page 173: Chapter 6: If Something Goes Wrong](#)

This chapter aims to help you solve many problems by yourself. It covers the problems you are most likely to encounter. If all else fails, contact Toshiba. You will find information on Toshiba's support services at the end of this chapter.

[Page 174: Problems When You Turn On The Computer](#)

If Something Goes Wrong Problems when you turn on the computer Click the Applications tab. If a program has stopped responding, the words "not responding" appear beside its name in the list. Select the program you want to close, then click End Task. Closing the failed program

should allow you to continue working.

[Page 175](#) If Something Goes Wrong Problems when you turn on the computer If you are using an AC adaptor, verify that the computer is receiving power from the external power source by looking at the AC power light. If the indicator is glowing, the computer is connected to a live external power source.

[Page 176](#) Try turning the computer on again. If the computer starts normally, the AC adaptor may be defective and will need to be replaced (see the Toshiba Web site at accessories.toshiba.com). If the AC power light starts flashing, remove the battery, and continue with the steps below.

[Page 177: The Windows Operating System Is Not Working](#)

If Something Goes Wrong ® The Windows operating system is not working Verify that the AC adaptor is the correct unit for your computer model. The computer may not be able to start from an AC adaptor that is rated for less current (amperage) than the computer requires, even if the rated voltage is correct, and the plug fits correctly in the DC-IN socket.

If Something Goes Wrong ® The Windows operating system is not working Safe Mode with Command Prompt Enable Boot Logging Enable low-resolution video (640x480) Last Known Good Configuration (advanced) Directory Services Restore Mode Debugging Mode Disable automatic restart on system failure Disable Driver Signature Enforcement ®...

[Page 179: The Windows Operating System Can Help You](#)

Click one of the options listed in the window and then follow the on-screen instructions. You can connect to Support Online by clicking Microsoft Customer Support or by going to Toshiba support at pcsupport.toshiba.com. Resolving a hardware conflict If you receive an error message telling you there is a device driver ®...

[Page 180: Fixing A Problem With Device Manager](#)

If Something Goes Wrong Resolving a hardware conflict The device most recently connected to the system is the one most likely to be causing a conflict. Resolving conflicts There are several things you can do to resolve hardware conflicts: Get the most recent drivers from the manufacturer. Disable the device.

[Page 181: Memory Problems](#)

If Something Goes Wrong Resolving a hardware conflict The Resources tab, which lists resources assigned to the monitor, optional external optical drive, optional external diskette drive, and other power-using functions. This tab does not appear if the device is not using resources. The Driver tab, which displays the drivers being used by the device.

[Page 182: Power And The Batteries](#)

If Something Goes Wrong Resolving a hardware conflict NOTE For this model Slot A is the bottom slot. Slot B is the top slot. If only one memory module is to be installed, it must be installed in Slot A. Power and the batteries Your computer receives its power through the AC adaptor and power cord/cable or from the system batteries (battery, optional...

[Page 183: Keyboard Problems](#)

After a period of time, the battery will lose its ability to perform at maximum capacity and will need to be replaced. This is normal for all batteries. To purchase a new battery pack, see your accessories information included with your computer, or visit the Toshiba Web site at accessories.toshiba.com.

[Page 184: Display Problems](#)

If Something Goes Wrong Resolving a hardware conflict Nothing happens when you press the keys on the external keyboard. You may have plugged the external keyboard in while the computer was turned on. Using the computer's TouchPad: Click Start, and then click the arrow next to the Lock button in the lower-right part of the Start menu.

[Page 185](#) If Something Goes Wrong Resolving a hardware conflict Try adjusting the contrast

and brightness controls on the external monitor. Press simultaneously to make sure the display priority is not set for the built-in screen. The screen does not look right. You can change the display settings by clicking a blank area of the desktop with the secondary control button, then clicking Personalize.

[Page 186: Disk Or Internal Storage Drive Problems](#)

If Something Goes Wrong Resolving a hardware conflict Small bright dots appear on your TFT display when you turn on your computer. Small bright dots may appear on your screen display when you turn on your computer. Your display contains an extremely large number of thin-film transistors (TFT) and is manufactured using high-precision technology.

[Page 187](#) If Something Goes Wrong Resolving a hardware conflict You can choose one or both options: Automatically fix file system errors Scan for and attempt recovery of bad sectors Click Start. Error-checking tests and repairs the disk. Your hard disk seems very slow. If you have been using your computer for a long time, your files may have become fragmented.

[Page 188: Optical Drive Problems](#)

For more information regarding supported optical media formats, refer to the complete detail specifications for your computer at pcsupport.toshiba.com. If the problem is with an optical data disc, refer to the software's documentation and check that the hardware configuration meets the...

[Page 189: Sound System Problems](#)

[Page 190](#) If Something Goes Wrong Resolving a hardware conflict PC Card checklist Make sure the card is inserted properly into the slot. Make sure all cables are securely connected. Occasionally a defective PC Card slips through quality control. If another computer with a PC Card slot is available, try the card in that machine.

[Page 191: Printer Problems](#)

If Something Goes Wrong Resolving a hardware conflict Select the item you wish to remove and click OK. Remove the device when told it is safe to do so. Never swap modules when the computer is in Hibernation or Sleep mode.

[Page 192: Modem Problems](#)

Make sure the line has a dial tone. Connect a telephone handset to the line to check this. The other system may be busy or off line. Try making a test transmission to someone else. For more information regarding your system's V.92 modem, visit the Toshiba Web site at pcsupport.toshiba.com.

[Page 193: Wireless Networking Problems](#)

To determine if your computer has an internal Wi-Fi adapter, check  the device list in Device Manager (part of the Windows Control Panel, Hardware and Sound). Some Toshiba models may have a Wireless antenna ON/OFF switch even though they do not have an  internal Wi-Fi adapter.

[Page 194](#) If Something Goes Wrong Resolving a hardware conflict Verify that the network connection is configured to obtain its Internet Protocol (IP) address dynamically: Click Start, and then Network. Click View Status. Click Details. Verify that the DHCP Enabled setting is set to Yes. Click Close.

[Page 195: Dvd Operating Problems](#)

"Checking device properties" on page 180 for instructions on using Device Manager to view the optical drive properties. Check the Toshiba Web site for new information on optical drives and their operation. A blank screen appears while watching a DVD-ROM movie or title.

[Page 196: Develop Good Computing Habits](#)

If Something Goes Wrong Develop good computing habits Select Never on When to turn off the display. Click Save changes. The screen saver runs while you are watching a movie or title. If the screen saver is enabled, it runs on top of any movie or title you are watching.

[Page 197: Data And System Configuration Backup In The Windows](#)

If Something Goes Wrong Develop good computing habits Read the user's guides. It is very difficult to provide a fail-safe set of steps you can follow every time you experience a problem with the computer. Your ability to solve problems will improve as you learn about how the computer and its software work together.

[Page 198](#) If Something Goes Wrong Develop good computing habits Click Create. In the input field, enter a name that is descriptive enough to be easily understood in the future, such as "Before installing Brand X Accounting app." Then click Create. ® The Windows operating system creates the Restore Point, automatically stamps it with the current date and time, and...

[Page 199](#) An external hard drive is recommended in case the internal storage drive fails. No additional software is required. Most of the optical drives built into recent Toshiba portable computer models can write to (or 'burn') as well as read from optical discs.

[Page 200](#) If Something Goes Wrong Develop good computing habits General tips for installing hardware and software Here are a few tips to help ensure safe and easy installation of new hardware (printers, pointing devices, external hard drives, DVD ® writers, scanners, etc.) and software (applications like Microsoft ®...

[Page 201: If You Need Further Assistance](#)

Since some problems may be related to the operating system or the program you are using, it is important to investigate other sources of assistance first. Try the following before you contact Toshiba: Review the troubleshooting information in your operating system documentation.

[Page 202: Contacting Toshiba](#)

Go to the Tech Support Center, select your particular model from the list and go to the Detailed Specifications for that model. For the number of a Toshiba dealer near you in the United States, call: (800) 457-7777. Contacting Toshiba If you still need help and suspect that the problem is hardware-related, Toshiba offers a variety of resources to help you.
