## If Something Goes Wrong

---

*Develop good computing habits*

**3**

Select Never on When to turn off the display.

**4**

Click Save changes.

**The screen saver runs while you are watching a movie**

## **or title.**

If the screen saver is enabled, it runs on top of any movie or title you are watching. To disable the screen saver:

**1**

Right-click on the desktop and click Personalize in the menu.

**2**

Select None for the screen saver.

**3**

Click OK.

## **Develop good computing habits**

### **Save your work frequently.**

You can never predict when your computer will lock, forcing you to

close a program and lose unsaved changes. Many software programs build in an automatic backup, but you should not rely solely on this feature. Save your work! See

[page 89](#)

### **On a regular basis, back up the information stored on your internal storage drive.**

Use Windows

disc, or external hard disk. Here are some ways you can do this:

Use the Windows

entire computer to an optical disc, or external hard disk.

Copy files to a rewritable external storage device.

Connect your computer to the office network and copy files to your network partition.

Some people use a combination of these methods, backing up all files to tape weekly and copying critical files to diskette on a daily basis.

If you have installed your own programs, you should back up these programs as well as your data files. If something goes wrong that requires you to reformat your internal storage drive and start again, reloading all your programs and data files from a backup source will save time.

for instructions.
