If the computer does not recognize the memory configuration, turn off the computer and remove the memory module slot cover (complete steps and then check that the module is inserted completely into the socket and lined up squarely with the socket latches.

## NOTE

---

## Hard Drive Recovery Utilities

Your computer has been configured with a hard disk partition to allow you to recover your hard disk drive or reinstall selected applications and software features or utilities.

### NOTE

Using the HDD Recovery, you can:

Create Hard Drive Recovery DVDs using a writable drive.

Recover your hard disk drive to the factory-set default.

Recover just your C: drive, leaving any other partitions you may have created intact, for example, a D: drive.

Recover your hard disk drive to the factory-set default without the HDD Recovery partition.

Reinstall drivers and applications which were bundled with your computer.

From time to time, Windows

®

"Windows

needs your permission to continue." This is a security

feature to prevent programs or people from doing things on your computer without your permission. If you were trying to perform the action, click Continue; otherwise, click Cancel. If unsure, cancel and try again.

During the HDD Recovery Process it is strongly recommended that your computer be connected to an external power source via the AC Adaptor.

It is also strongly recommended that you create recovery DVDs before using your system. For more information on creating Recovery media see

[page](#)

62.

## **Getting Started**

### *Hard Drive Recovery Utilities*
