Page 8: Introducing Mypal

Introducing MyPal ® The ASUS MyPal A636/A632 is truly a good companion wherever you go. Powered by a 416MHz Intel ® XScale PXA272 processor, equipped with ® 64MB SDRAM and 128MB Flash ROM, and bundled with the Microsoft ® Windows Mobile 5.0 plus a host of useful utilities, you have everything...

Page 9: Back Features

• Speaker - allows you to hear alarms and other sound outputs from the device. • 4-way navigation button - functions like the four arrow keys on a keyboard. This button allows you to move through the program icons, folders, or files in a menu by scrolling up or down, left or right. •...

Page 10: Side Features

• Hold - provides a safety measure to avoid users from accidentally tapping the screen or turning on the device. Move the switch towards the word Hold to turn off the screen and prevent it from turning back on even when you tap the screen or press a button.

Page 11: Top Features

Top features Stylus External antenna cover SD card slot Power button (SD/SDIO/MMC) • External antenna cover - covers the external antenna port. If the GPS signal is weak, connect an external antenna to the port. • SD card slot - accommodates an SD memory card, MMC memory card or an SDIO interface card (e.g.

Page 12: The Stylus

The stylus The stylus functions on a Pocket PC the same way a mouse functions on a standard PC. Use the stylus to tap or drag on the LCD touch screen to open programs or execute commands. • Tap. Touch the screen once with the stylus to open programs and select options.

Page 13: Setting Up Mypal

Setting up MyPal Installing and removing the battery 1. First, remove the battery cover. Press on the battery cover latch behind the device, then slide down the battery cover to remove it. 2. Position and insert the right side of the battery with its contacts matching the 4-pin connector on the right side of the compartment.

Page 14: Connecting To A Power Source

Connecting to a power source IMPORTANT You need to charge the battery before using the device for the first time. To connect the power adapter and charge the battery 1. Connect the power cable to the jack on the sync cable adapter. 2.

Page 15: Setting Up Gps

Setting up GPS To receive GPS signal Flip open the GPS antenna panel from the back of the device. You may rotate the panel as illustrated below. NOTE If the GPS signal reception is weak, purchase and use an external antenna. Flip open the antenna cover that is above the panel,

then plug in the external antenna to the antenna port.

Page 16: Additional Storage

Additional storage MyPal A636 comes with the standard SD card slot while MyPal A632 has an additional mini SD card slot . The SD card slot can be inserted with SD (Secure Digital) or MMC memory cards. It also supports SDIO cards of various functionalities including 802.11b, camera, scanner, etc.

Page 17: Activating Mypal

Activating MyPal You need to properly calibrate and activate your device before using it. This process ensures accurate positioning when entering text and selecting menus. Calibrating and activating your device 1. Press the power button. Power button 2. The Welcome screen appears when you turn on the device for the first time, or after performing a hard reset.

Page 18: Basic Screens On Mypal

Basic screens on MyPal Today screen Normally, the Today screen appears when you turn on your device for the first time each day. NOTE When the device is already on and the screen displays another program, you may return to the Today screen any time by tapping the icon.

Page 19: Start Menu

Start menu From the Start menu, you can select programs, settings, and help topics. To display the Start menu, tap the icon from the top of the screen. Tap to open a program Tap to open a recently used program Tap to open the Programs menu Tap to open the Settings menu Tap to display the Help topics...

Page 20

Pop-up menus With the pop-up menus, you can easily choose an action for an item. For example, you can use the pop-up menu in File Explorer to delete, copy, or beam an item. To access a pop-up menu, tap and hold the stylus on the item that you wish to perform action on.

Page 21

Chapter 2 Learn the basics ♦ ♦ ♦ ♦ ♦ Viewing system information ..... 2-2 ♦ ♦ ♦ ♦ ♦ Entering information .....2-2 Entering text using the Input Panel ..... 2-2 Writing on the screen ..... 2-6 Drawing on the screen ..... 2-8 Recording a message .....

Page 22: Viewing System Information

Viewing system information Your device allows you to easily display the built-in specifications. NOTE You can not change the information you see in the system information screens. To display the system information: 1. Tap > Settings > System tab > System Information icon 2.

Page 23: To Type With The Soft Keyboard

To type with the soft keyboard: 1. Tap the arrow next to the Input Panel button, then tap Keyboard. NOTE For a demonstration, open Notes. 2. Tap the keys with the stylus to enter information. Tap to show or hide the input panel Select an input method Tap to display the input method options Word completion feature...

Page 24: To Use Letter Recognizer

To use Letter Recognizer: With the Letter Recognizer, you can write letters on the screen with the stylus as you would on paper. 1. Tap the arrow next to the Input Panel button, then tap Letter Recognizer. 2. Write a letter in the box. When you write a letter, it is converted to a typed text that appears on the screen.

Page 25: To Use Transcriber

To use Transcriber: With Transcriber, you can use the stylus to write anywhere on the screen as you would on paper. Unlike Letter Recognizer and Block Recognizer, you can write a sentence or additional information. Pause after writing and let Transcriber convert the written characters to typed characters.

Page 26: Writing On The Screen

Writing on the screen In any program that accepts writing, such as the Notes program, and in the Notes tab in Calendar, Contacts, and Tasks, you can use the stylus to write directly on the screen. Write the way you do on paper. You can edit and format what you have written and

convert the writing to text at a later time.

Page 27

If the conversion is incorrect, you can select different words from a list of alternates or return to the original writing. 1. Tap and hold the incorrect word. 2. When the pop-up menu appears, tap Alternates to display a list of alternate words for the selection.

Page 28: Drawing On The Screen

Drawing on the screen You can draw on the screen in the same way that you write on the screen. The difference between writing and drawing on the screen is how you select items and how they can be edited. For example, selected drawings can be resized, while writing cannot.

Page 29: Recording A Message

Recording a message In any program where you can write or draw on the screen, you can also quickly capture thoughts, reminders, and phone numbers by recording a message. In Calendar, Tasks, and Contacts, you can include a recording in the Notes tab. In the Notes program, you can either create a standalone recording or include a recording in a written note.

Page 30: Finding And Organizing Information

To change the recording format: 1. In the note list, tap Menu > Options. 2. Tap the Global Input Options link. 3. Tap the Options tab. 4. Tap the down arrow on the Voice recording format box to display the available options.

Page 31: Using The File Explorer

Using the File Explorer To use the File Explorer to find and organize files: 1. Tap > Programs. 2. In the Program screen, tap the File Explorer icon to display the files in your device. Customizing your device You can customize your device by adjusting the settings, using the built-in programs, and installing additional software.

Page 32: Changing The Date And Time

Changing the date and time To change the date and time settings: 1. Tap > Settings > System tab. 2. Tap the Clock & Alarms icon. 3. Under the Time tab, make your desired settings. NOTE Tap the More tab and select Display the clock in the title bar in all programs to display the clock on the top right corner of the screen all the time.

Page 33: Changing The Owner Information

To use Auto Correct • Tap Menu > Edit > Menu > Auto Correct to automatically adjust the picture. NOTE Tap Menu then Undo to reverse the last action made. Tap Revert to Saved to reverse all actions done on the picture. To rotate the picture •...

Page 48: Checking Device Status

3. Tap OK to make the changes. NOTE If you clear the box beside the Show system status icon, the Asus Status icon will not show. To make the Asus Status icon appear again, Tap > Settings. Under the System tab, tap Asus Status icon.

Page 49 Chapter 3 Synchronize and enhance ® ® ♦ ♦ ♦ ♦ ♦ Microsoft ActiveSync .....® What is ActiveSync ? ..... 3-2 ® Installing ActiveSync on your computer .....3-3 ♦ ♦ ♦ ♦ ♦ Synchronizing your device .....3-4 Connecting your device to a computer .....

Page 50: Microsoft Activesync

® ® Microsoft ActiveSync ® What is ActiveSync ® ® The Microsoft ActiveSync is one of the important bundled programs in MyPal. With ActiveSync, you can synchronize the information on your desktop computer with the information on your device. Synchronization compares the data on your device with your desktop computer and updates both computers with the most recent information.

Page 51: Installing Activesync On Your Computer

® Installing ActiveSync on your computer The ActiveSync program is already installed on your device. To synchronize information on your device with your computer, you must also install ActiveSync on your computer. Install ActiveSync from the Companion CD that came with your product package. NOTE Before starting the ActiveSync installation, make sure that ®...

Page 52: Synchronizing Your Device

9. Follow the instructions on the succeeding screens. ® ® If you have previously installed Microsoft ActiveSync in your computer, the installation wizard detects it and prompts you with a message. Click Next to continue installing and replace the current version. Click Cancel to quit and keep the current version.

Page 53

A sync relationship is a file that allows you to synchronize your device with your desktop computer. This file is stored on your desktop computer. An additional file that enables your desktop computer to recognize your device is stored on your device. To set up a sync relationship: 1.

Page 54: Checking Synchronized Information

Immediately after you set up a sync relationship, ActiveSync starts automatically and initiates the first synchronization between your device and your computer. Refer to the succeeding sections for more details on synchronization. Checking synchronized information After your first synchronization, take a look at Calendar, Contacts, and Tasks on your device.

Page 55: Manually Initiating Synchronization

Manually initiating synchronization Once you have set up ActiveSync and completed the first synchronization process, you can initiate synchronization from your device at any time. To manually initiate synchronization: 1. Tap , Programs, then tap the ActiveSync icon to display the ActiveSync screen.

Page 56: Synchronization Options

Synchronization options The Microsoft ActiveSync program allows you to customize your synchronization settings at any time. You can select the items to synchronize, set the synchronization schedule, and specify the synchronization rules. To display the synchronization options: • From the ActiveSync window on your desktop computer, click on the Options icon, or •...

Page 57: Installing Other Applications

Installing other applications The Companion CD packs a variety of useful applications. You may install some of the applications directly from the CD and download other available applications from the Internet. To install applications from the Companion CD: 1. Place the Companion CD into the optical drive of your computer.

Page 58

7. Click Pocket PC Applications to display the entertainment programs that you can install on your device, then click Details for installation instructions. 8. Click Desktop Applications to display the entertainment programs that you can install on your computer, then click Details for installation instructions.

Page 59

Chapter 5 ® Microsoft Pocket Outlook ♦ ♦ ♦ ♦ ♦ Introduction .....5-2 ♦ ♦ ♦ ♦ ♦ Calendar .....5-2 Creating appointments ..... 5-3 Using the summary screen .....5-4 Creating meeting requests .....5-4 ♦ ♦ ♦ ♦ ♦ Contacts .....

Page 60: Introduction

Introduction ® Microsoft Pocket Outlook includes Calendar, Contacts, Tasks, Notes, and Messaging. You can use these programs individually or together. For example, you can use an

e-mail address stored in Contacts to address e-mail messages in Messaging. ® Using ActiveSync , you can synchronize information in Microsoft Outlook or Microsoft Exchange on your desktop computer with your device.

Page 61: To Create An Appointment

Creating appointments To create an appointment: 1. If you are in Day or Week view, tap your desired date for the appointment, 2. Tap Menu on the Menu bar then tap New Appointment. Tap to select from a predefined text Tap to select from previously entered locations Tap to specify the time of appointment...

Page 62: Using The Summary Screen

Using the summary screen When you tap an appointment in Calendar, a summary screen appears. To change the appointment, tap Edit. Appointment details Notes/additional information on the appointment Tap to change details of the appointment Creating meeting requests You can use Calendar to set up meetings with users of Outlook and Pocket Outlook.

Page 63: Contacts

Contacts Contacts maintains a list of your friends and colleagues so that you can easily find the information you look for, whether you are at home or on the road. Using the infrared port (IR) on the device, you can quickly share Contacts information with other device users.

Page 64: Creating Contacts

Creating contacts To create a contact: 1. Tap , then tap Contacts. 2. Tap New to display a blank contact form. 3. Using the input panel, enter a name and other contact information. You will need to scroll down to see all available fields. 4.

Page 65: Finding A Contact

Finding a contact There are four ways to find a contact. 1. In the contact list, enter a contact name in the box under the navigation bar. To show all contacts again, clear text from the box or tap the button to the right of the box. 2.

Page 66: Tasks

Tasks Use Tasks to keep track of what you have to do. Indicates high priority Tap to display or edit the task details Tap and hold to display a pop-up menu of actions Tap to create a new task Creating tasks To create a task: 1.

Page 67: Using The Summary Screen

5. To assign the task to a category, tap Categories and select a category from the list. On the task list, you can display tasks by category. 6. To add notes, tap the Notes tab. You can enter text, draw, or create a recording.

Page 68: Notes

Notes Quickly capture thoughts, reminders, ideas, and phone numbers with Notes. You can create a written note or a recording. You can also include a recording in a note. If a note is open when you create the recording, it will be included in the note as an icon.

Page 69: Creating Notes

Creating notes To create a note: 1. Tap , then tap Notes. 2. Tap New to display a blank note. 3. Create your note by writing, drawing, typing, or recording. For more information about using the input panel, writing and drawing on the screen, and creating recordings, see Chapter 2.

Page 70: Messaging

Messaging Use Messaging to send and receive e-mail messages in one of these ways: • Synchronize e-mail messages with Microsoft Exchange or Microsoft Outlook on your desktop computer • Send and receive e-mail messages by connecting directly to an e-mail server through an Internet service provider (ISP) or a network Synchronizing e-mail messages You can e-mail messages as part of the general synchronization process.

Page 71: Connecting Directly To An E-Mail Server

Connecting directly to an e-mail server In addition to synchronizing e-mail messages with your desktop computer, you can send and receive e-mail messages by connecting to an e-mail server using a modem or network card connected to your device. You need to set up a remote connection to a network or an ISP, and a connection to your e-mail server.

Page 72 When you connect to your e-mail server or synchronize with your desktop computer, by default, you will receive messages from the last five days only, the first 100 lines of each new messages, and file attachments of less than 100KB in size. The original messages remain on the e-mail server or your desktop computer.

Page 73: Reading Messages In Inbox

Reading messages in Inbox The messages you receive appear in your Inbox folder. By default, the most recently received messages appear on top of the list. Unread messages appear in boldface. Tap to select the service, and the folder that you wish to display Tap to select the sort order for the messages Tap and hold to display a...

Page 74: Composing Messages

Composing messages To compose a message: 1. Tap New to display a blank e-mail screen. Enter the e-mail address here Tap to show or hide the complete message header Type your text here Tap to send the message 2. In the To field, enter the e-mail address of your recipient.

Page 75 To address your e-mail to several recipients, type the e-mail addresses separated by a semicolon. A semicolon is automatically added between e-mail addresses if you select from your Contacts list. All the names in the Contacts list with e-mail addresses appear in the e-mail address book.

Page 76: Managing E-Mail Messages And Folders

Saving composed messages If you are working offline, the message is moved to the Outbox folder and will be sent the next time you connect. If you do not wish to send the message immediately, tap OK after composing the message to save it to the Drafts folder. When you are ready to send the message, open the Drafts folder and tap the message.

Chapter 8 Get connected ♦ ♦ ♦ ♦ ♦ Introduction .....8-2 ♦ ♦ ♦ ♦ ♦ Connect to the Internet .....8-2 ♦ ♦ ♦ ♦ ♦ Connect to Work ..... 8-3 ♦ ♦ ♦ ♦ ♦ Set up connections .....8-3 Modem connections .....

Page 103: Introduction

Introduction You can set up connections to the Internet and corporate network at work to do such activities as browse the Internet or intranet, send and receive e- mail and instant messages, and synchronize information using ActiveSync. Connections can be made using a modem, wireless network, or network (Ethernet) card.

Page 104: Connect To Work

Connect to Work 1. Obtain the following information from your network administrator: server phone number, user name, and password. 2. Tap > Settings > Connections tab > Connections. 3. Under My Work Network, set up either a modem, network card, wireless network, or VPN

server connection.

Page 105: Vpn Server Connections

VPN server connections A VPN connection helps you to securely connect to servers, such as a corporate network, via the Internet. Ask your network administrator for your user name, password, domain name, TCP/IP settings, and host name or IP address of the VPN server. To set up a VPN server connection: 1.

Page 106: Network Card Connections

Network card connections Use a network (Ethernet) card to connect directly to a network. Once connected, you can view the Internet or intranet, or download e-mail. You do not need to create a new connection on your device. For more information, see your network administrator.

Page 107: End A Connection

End a connection • When connected via modem or VPN, tap on the navigation bar, then tap Disconnect. • When connected via cable or cradle, detach your device from the cable or cradle. • When connected via Infrared, move the device away from the other computer or device.

Page 108: Use Dialing Rules

Use dialing rules Additional numbers may need to be dialed depending on your given location when connecting. For example, if you want to dial from work, a 9 prefix must often be dialed, or an area code is needed. To avoid creating a new modem connection for each situation, set dialing rules for the locations from which you connect often.

Page 109: Infrared (Ir) Connection

Infrared (IR) connection Setting beam options To set the beam options: 1. Tap > Settings > Connections tab. 2. Tap Beam icon to display the Settings screen. 3. By default, your device detects incoming infrared (IR) beams and prompts you to accept them.

Page 110: Sending Infrared Beams

Sending infrared beams To send a file via infrared beam: 1. Tap and hold a file to beam, then tap Beam File... from the pop-up menu. 2. Align the IR ports of the devices so that they are unobstructed and within a close range.

Page 112: Introducing Bluetooth

® Introducing Bluetooth Bluetooth is a short-range wireless communications technology. Devices with Bluetooth capabilities can exchange information over a distance of about 10 meters (30 feet) without requiring a physical connection. Unlike infrared, you do not need to line up the devices to beam information with Bluetooth.

Page 113: Bluetooth Settings

Bluetooth settings To configure the Bluetooth settings: 1. Tap from the lower right corner of the Today screen to display the Bluetooth menu. 2. Tap Bluetooth Settings. 3. Tap one of the tabs at the bottom of the Settings screen to make your desired changes.

Page 114: Services

Services Under Bluetooth Services you may enable/disable services like File Transfer, Information Exchange, Serial Port, Personal Network server and Audio Gateway. File Transfer Tap File Transfer from the Services list to customize settings. Tap Advanced button to set the highest level directory on your device that remote devices can access.

Page 115: Bluetooth Manager

Bluetooth Manager The Bluetooth Manager allows you to create, manage, and use Bluetooth to connect to remote devices. To launch the Bluetooth Manager: 1. Tap from the lower right corner of the Today screen to display the Bluetooth menu. 2. Tap Bluetooth Manager. The My Shortcuts

screen displays a list of pre-configured connections, if any.

Page 116: Bluetooth Connection Wizard

Bluetooth Connection Wizard The Bluetooth Connection Wizard helps you set up connections with remote Bluetooth devices. To launch the Bluetooth connection wizard: 1. Tap New from the Bluetooth Manager command bar. The Bluetooth Connection Wizard screen appears. 2. Select a type of connection that you wish set up.

Page 117: Remote Device Services

Remote device services Wireless serial port Using a Bluetooth serial port is equivalent to using a physical cable serial port connection between two devices. As with a physical connection, you have to configure the application that will use the serial port. To configure the Bluetooth Serial Port: 1.

Page 118: Dial-Up Networking

Dial-up networking The Dial-up Networking feature allows you to connect to a remote computer through a phone line. Once connected, you can browse the Internet, check/read emails, etc. NOTE The remote Bluetooth device that will provide the Dial-up Networking service should have access to a telephone system, either a hard-wired or a cellular connection, and capable of answering a call.

Page 119: Bluetooth File Explorer

Bluetooth File Explorer The Bluetooth File Explorer appears automatically after a file transfer connection is established. This service feature allows you to do the following operations: • Navigate the directory structure of the remote device • View the files and folders on the remote device •...

Page 120 To create a folder on the remote device: 1. Select the folder in which you wish to place the new folder. 2. From the File menu, tap Create a Folder. 3. Enter a name for the new folder while the default name New Folder is highlighted.

Page 121 To set a local folder for incoming files: 1. From the Tools menu, tap Set Local Folder. 2. Use the drop-down menu at the top of the screen to go to your desired folder. 3. Tap OK to return to the main screen of Bluetooth File Explorer. You will see the Local Folder field is updated to reflect the new folder selection.

Page 122: Send Via Bluetooth

Send via Bluetooth You can conveniently send your Pocket Outlook contacts, calendar items, and tasks individually or collectively to the remote device via Bluetooth. To send data via Bluetooth: 1. Tap , then either Contacts, Calendar, or Tasks. 2. Tap and hold the item you wish to send to the remote device, then tap Send via Bluetooth from the pop-up menu.

Page 123: Dial Via Bluetooth

Dial via Bluetooth The Dial via Bluetooth option allows you to select a contact from the Pocket Outlook contacts list, and have your paired cell phone dial the contact’s phone number. If a contact has more than one phone number, select the number that you wish to dial.

Page 124: Bluetooth Personal Area Network

Bluetooth Personal Area Network A Bluetooth personal area network is a private, temporary, ad-hoc network of up to eight (8) devices. A Bluetooth personal area network allows you to easily exchange information that normally requires a TCP/IP network. Most chat utilities, multi-player games, etc. are fully functional in a Bluetooth personal area network environment.

Page 125 To join a personal network: 1. From the Bluetooth Manager, select New > Join a personal network. 2. On the wizard screen, select Join a personal network, then tap Next.. 3. Select the host of the personal network, then tap Next to establish a connection to the personal area network.

Page 128: Introducing Wi-Fi

® Introducing Wi-Fi ® MyPal comes with a built-in Wireless Fidelity (Wi-Fi) feature that allows you to connect to wireless local area networks and the Internet. Using the IEEE 802.11b standard for wireless LAN, MyPal can connect at speeds of up to 11 Mbps to an access point (Infrastructure mode) or to another wireless device (Ad-hoc mode).

Page 129: Configuring Wireless Networks

3. From the list of detected wireless networks, select a wireless network to you want to connect your device. 4. Select either The Internet or Work for the network to connect your device. 5. Tap Connect. The device connects to the selected network.

Page 130: Adding A Wireless Network

To configure a network adapter: 1. Tap the Network Adapters tab. 2. Make your desired changes to the available adapters on the list. 3. Tap OK when done. 4. After changing the network adapter settings, a message appears instructing you to remove then re- install the network card to have your changes take effect.

Page 131

2. Tap Add New... from the wireless networks field. 3. Use the input panel to key-in the Network name. 4. Select The Internet or Work network you wish to connect to through the wireless network. 5. If you want to connect to another wireless device (Ad-hoc mode), check the option This is a device-to-device (ad-hoc) connection.

Page 132: Network Association

8. The created wireless network is displayed in the list of wireless networks. Tap the wireless network to connect. Network association To associate with one of the detected wireless networks: 1. Tap and hold on a wireless network, then tap Connect from the pop-up menu.

Page 133: Wi-Fi Information

Wi-Fi information You can view the Wi-Fi information by tapping , and selecting Wi-Fi Information from the menu. NOTE You can view the Wi-Fi information even when the device is disconnected from a wireless network. Wi-Fi Status This tab displays the current state and link information of your Wi-Fi device, and allows you to re-scan the available wireless networks when necessary by...

Page 134: Signal Strength

Status This field shows the Wi-Fi connection status. • Connected the station is associated with one wireless LAN device. This status also indicates the MAC address of the device. • Disconnected - a previous link existed but no beacon was received. The connection to the adapter is terminated.

Page 135: Site Survey

Site Survey This tab allows you to search for available wireless networks within your location. Tap the Search button to scan all available wireless networks and display the results on the screen. Each wireless network is preceded by an icon for easy identification. The network channel, RSSI, and BSSID are also displayed in columns.

Page 136: Ip Info

RSSI This column shows the Received Signal Icon Link Quality Strength Indication (RSSI) transmitted Excellent by each wireless network. This Good information is helpful in determining Fair which network you wish to associate Poor your device. This signal is normally represented by a dBm value.
