Troubleshooting

•

Bookmarks

Connecting

1. Make sure the connectors are properly aligned and plug the i.LINK (IEEE1394a) cable into the computer.
2. Plug the other end of the cable into the device.

Note the following when you use i.LINK:

You may need to install drivers for your i.LINK devices.

Not all i.LINK devices have been tested. Therefore, compatibility with all i.LINK devices cannot be guaranteed.

■ Use S100, S200 or S400 cables no longer than three meters.

■ Some devices might not support Sleep or automatic off functions.

■ Do not connect or disconnect an i.LINK device while it is using an application or when the computer is automatically shutting it down to save power. Data might be destroyed.

Disconnecting

1. Click the Safely Remove Hardware icon on the Task Bar.
2. Point to i.LINK (IEEE1394a) device and click.
3. Disconnect the cable from the computer then from the i.LINK device.

Refer also to the documentation that came with your i.LINK device.

Security lock

A security lock enables you to anchor your computer to a desk or other heavy object to help prevent unauthorized removal of the computer. Attach one end of a cable to the desk and the other end to the security lock slot on the right side of the computer.
