Troubleshooting

•

Bookmarks

Problem

Monitor goes into panning mode

Sound system

Problem

No sound is heard

Pointing device

If you are using a USB mouse, also refer to the and to your mouse documentation.

TouchPad/Dual Mode Pad

Problem

On-screen pointer does not respond to Pad operation

Double-tapping does not work

User's Manual

Procedure

Check your monitor specification. It might not support the selected resolution and refresh rate.

The resolution on the monitor might go into panning mode when wide screen resolution is selected. Refer to Appendix B,

Procedure

Adjust the volume control dial.

Check the software volume settings.

If appropriate, make sure the headphone connection is secure. Check Windows Device Manager and ensure the sound function is enabled and that settings for I/O address, interrupt level and DMA are correct for your software and do not conflict with other hardware devices that you have connected to the computer.

If problems persist, contact your dealer.

Procedure

The system might be busy. If the pointer is shaped as an hourglass, wait for it to resume its normal shape and try again to move it. You may also press Fn + F9 to enable the TouchPad/Dual Mode Pad and then try again to move it.

Try changing the double-click speed setting in the mouse control utility.

1. Open the Control Panel, select the Mouse

icon and press Enter.

2. Click the Buttons tab.

3. Set the double-click speed as instructed and click OK.

Troubleshooting

Display

Modes.
