Benefits of Hibernation Mode

The Hibernation Mode feature provides the following benefits:

Saves Data to the hard disk drive when the computer automatically shutsdown because of a low battery condition.

You can return to your previous working environment immediately when you turn on the computer.

Saves power by shutting down the system when the computer receives

no input or hardware access for the time period set by the System

Hibernate feature.

Allows the use of the panel power off feature.

Starting Hibernation Mode

You can also enable Hibernation Mode by pressing Fn + F4 - please refer to Chapter 5,

To enter Hibernation Mode, follow the steps below.

1. Click Start.
2. Click the arrow button (
3. Select Hibernate from the menu.

Automatic Hibernation Mode

The computer can be configured to enter Hibernate Mode automatically when you press the power button or close the lid. In order to define these settings, you can follow the steps as described below:

1. Click Start and click the Control Panel.
2. Click System and Maintenance and click Power Options.
3. Click Choose what the Power Button do or Choose what closing the lid does.

4. Enable the desired Hibernation Mode settings for When I press the power button or When I close the lid.
5. Click the Save Changes button.

Data save in Hibernation Mode

When you turn off the power in Hibernation Mode, the computer takes a moment to save the current data in memory to the hard disk drive. During this time, the Hard Disk Drive indicator will glow.

After you turn off the computer, and the content of memory has been saved to the hard disk drive, turn off the power to any peripheral devices.

Do not turn the computer or devices back on immediately. Wait a moment to let all capacitors fully discharge.
