The illustration above pictures the remote control unit after the cover has been lowered and removed.

When you press the buttons on the remote control unit, the
appears in the display to transmit the setting changes to the receiver in the air conditioner.

A temperature sensor inside the remote control unit senses the room temperature.

Information on the operating conditions is displayed while the remote control unit is switched on. If the unit is turned off, only the mode that was set previously is still displayed.

For details, see ''Night Setback Mode''. When you press this button in the COOL mode, the
control unit will automatically adjust the set temperature to save energy.

Press the
button to increase the set temperature.

Press the
button to reduce the set temperature.

This button is for turning the air conditioner on and off.

First, press the PROGRAM button to select the mode you want.

Each time you press the ''HH'' button, the hours advance by one.

Each time you press the ''MM'' button, the minutes advance by one.
