[Page 179](#) Troubleshooting Network problems Make sure the TV IP address is on the same subnet as the networked computer. Example of proper setup: The computer has the IP address ♦ 192.168.0.100 with the Subnet mask 255.255.255.0, the TV has the IP address 192.168.0.101 with the Subnet mask 255.255.255.0; both are on the same subnet.

[Page 180: Wireless Network Problems](#)

Troubleshooting Wireless network problems Wireless network problems Check that the router/AP (Access point) power is On. After starting wireless network setup, confirm that the network is configured properly by performing the network connection test, see “Network Connection Test” on page 132. Check the router/AP’s connection status. If the router/AP does not support PBC or WPS, Easy Setup (PBC) will not work even if the push-button is pressed, see “Wireless Setup”...
