[Page 19: Fax Tone Detection](#)

This section will include some detail on the technology of Feature Groups. Enabling Feature Groups Feature Groups are enabled by purchasing a license for the feature group through the Toshiba FYI site at <http://fyi.tsd.toshiba.com>. Once you have purchased the license, follow the detailed instructions in "MAS Licensing"...

[Page 20: Automatic Speech Recognition \(Asr\) Automated Attendant \(Aa\)](#)

Outlook Inbox screen. When a voice message is selected, a Toshiba designed edit screen is automatically presented that enables voice playback through the multimedia speakers of the user's PC, or if desired, through the user's telephone.

[Page 21: Text-To-Speech \(Tts\)](#)

The TTS/Email Feature Group enables e-mail messages to be read back to users via the Telephone User Interface (TUI) and requires voice mail to be equipped with the UM Feature Group. TTS/Email capabilities are delivered in a host-based configuration. The Media Application Server provides the processing power for TTS. Strata CIX Voice Mail Programming 01/07...

[Page 22: System Software](#)

• Enable and disable configuration and mailbox features • Define and configure features • View status of voice ports • Define and generate system reports • Define telephone system integration • Program user mailboxes Strata CIX Voice Mail Programming 01/07...

[Page 23: System Integration](#)

The Proprietary Integration between the Strategy ES software and a Strata CIX system only requires the IP network connection between the two systems. If a company has a Toshiba Strata CIX phone system and Toshiba Strata 2000- or 3000-series digital phones, this proprietary integration provides interoperability between the Strategy ES and the Strata CIX.

[Page 24: Maintenance](#)

Maintenance Maintenance Toshiba Voice Mail Application hardware and software base platforms are easily maintained by a Toshiba authorized dealer. Procedures for backing up, restoring and maintaining the system, Feature Groups, and call processing database information are efficient and easily performed by trained administrators and technical personnel.

[Page 25: Chapter 2 - Emanager](#)

• Local Area Network (LAN) - System Administrators can connect their PC to Strata CIX via a network interface jack or modem. eManager views the Strata CIX system and Strategy ES as a

LAN providing a stable environment in which to program and access data.

[Page 26: Log On To Emanager](#)

MAS (Media Application Server) and log onto the voice mail portion of the eManager program. Check the Strata CIX Programming Manual Volume 2 for Strategy ES Voice Mail System for instructions on starting Strategy ES.

[Page 27: Emanager Profile](#)

Be sure to change the default password to protect the system from unauthorized access. Record all your passwords that use Internet Explorer. Possible values: Alphanumeric characters. Confirm Password Repeat password entered in Password field. Possible values: Alphanumeric characters. Strata CIX Voice Mail Programming 01/07...

[Page 28](#) Directory Folder Name If left blank, system uses the user's name from the first field. Assign to Self Assigns equipment control to this user. Allowed to Mod/Del Allows this user to modify or delete equipment. Strata CIX Voice Mail Programming 01/07...

[Page 29](#) Format: xxx.xxx.xxx.xxx Community Enter the Community password. Possible values: Alpha characters Default: communityName Confirm Community Re-enter the Community password. IP Address Enter the IP Address of the SES. For example: 192.168.254.252 (default). Format: xxx.xxx.xxx.xxx Strata CIX Voice Mail Programming 01/07...

[Page 30](#) ...or uncheck the "Apply to All Equipments" field and highlight the equipment in the Assigned box that applies to the revised defaults. Click Set. In this manner, you can set different defaults for different pieces of equipment. Strata CIX Voice Mail Programming 01/07...

[Page 31: Backup Database Utility](#)

3. In the Backup/Restore File Name field, type a file and pathname (e.g., c:\backup.bak). 4. Click Backup. The system creates a backup database and the screen displays the progress. 5. When the backup is complete, click Disconnect and close the screen. Strata CIX Voice Mail Programming 01/07...

[Page 32: Restore Database Utility](#)

3. (Optional) Type a new directory folder name in the next field. 4. Click Modify to save the changes. Select Equipment Click Select Equipment and the Select CIX screen displays (see Step page 2-2). Strata CIX Voice Mail Programming 01/07...

[Page 33: Mas Licensing](#)

MAS Licensing MAS Licensing See Chapter 10 in the Strata CIX Programming Manual Volume 1 for CIX Licensing. This option enables you to manage, issue and activate MAS licenses in the eManager server host. It is required that administrators should be able to manage licenses for all applications in the MAS.

[Page 34: Upload Licenses](#)

MAS is disconnected. In order not to disrupt daily activity in your customer's business, you can choose to do the activation process unattended during the evening/early morning hours by scheduling the procedure using the Windows scheduling process. 2-10 Strata CIX Voice Mail Programming 01/07...

[Page 35: Delete Licenses](#)

• 0 - New license was issued, but not activated yet. • 1 - The license activation during the startup procedure was successful. • 2 - The license activation during the startup procedure failed. Strata CIX Voice Mail Programming 01/07...

[Page 183: Destination System Number](#)

Default: Q1 Notify After (min) Number of minutes after the message has been sent to the Gateway/Proxy User Agent that voice mail should attempt to contact the remote node. Default: 0 (Gateway), 5 (Proxy) 10-7 Strata CIX Voice Mail Programming 01/07...

[Page 184](#) Second, the nodes use the Destination System Number, which is part of the AMIS protocol, to identify themselves to each other during AMIS connections. 10-8 Strata CIX Voice Mail Programming 01/07...

[Page 185: Configuring Voice Mail For Amis](#)

Agent is sent back to the sender, if accessible from this voice mail system. Possible values: valid User Agent number. Default: 989 sys_amis_max_msg Maximum number of messages the AMIS system can receive. Default: 1000 10-9 Strata CIX Voice Mail Programming 01/07...

[Page 186](#) Comment should consist of GATEWAY or PROXY USER AGENT and any other identifying information. 8. Check "Enabled" box on the screen. 9. In the Destination System

Number field, type the Destination System Number. 10-10 Strata CIX Voice Mail Programming 01/07...

[Page 187: Testing Amis](#)

NODE = up to eight digits remote address = up to 16 digits 4. The user records the message and presses to stop recording. 5. The user presses again to send the message to the specified node. 10-11 Strata CIX Voice Mail Programming 01/07...

[Page 188: Private/Urgent Message Handling](#)

If a notify task was started as the result of an urgent message being placed in the Gateway mailbox, it is only allowed to deliver the urgent message to the remote node. The urgent status is stripped from the message when it is sent. 10-12 Strata CIX Voice Mail Programming 01/07...

[Page 189: Amis User Agent Reports](#)

10-14). The node identifies itself to voice mail by a local telephone number (i.e., Destination System Number) that is sent to the receiving voice mail system during the transmission process. 7310 Figure 10-28 VPIM Gateway Screens 10-13 Strata CIX Voice Mail Programming 01/07...

[Page 190](#) Continue Every (min) Number of minutes between each retry attempt to contact the remote node. Default: 1 Notify Max Time Number of times Strategy should attempt to contact the remote node. Default: 5 10-14 Strata CIX Voice Mail Programming 01/07...

[Page 191](#) 11. Using the spin button, set the Notify After(min), Continue Every(min) and Notify Max Time fields. 12. Click Update. The data is saved. The Edit VPIM User Agent screen closes. 13. Repeat Substeps 6~12 above for any other agents you created. 10-15 Strata CIX Voice Mail Programming 01/07...

[Page 192: Vpim Operation](#)

5. The user presses again to send the message to the specified UA. The message is sent out as an e-mail through the Internet and saved in the designated mailbox at the remote server. 10-16 Strata CIX Voice Mail Programming 01/07...

[Page 193: Chapter 11 - Token Programming](#)

To program the Extension or Parameter fields, enter a series of commands, or tokens, that instruct voice mail what actions to perform. A field would, therefore, contain TokenTokenToken...Token, where Token defines how to perform the actions. 11-1 Strata CIX Voice Mail Programming 01/07...

[Page 194: Singular Tokens](#)

Chapter 3 — Voice Mail Configuration.) Go on hook—immediately hangs up. If entered after an extension number, performs an immediate hang-up without waiting for system tone cadences. This is called a Blind Transfer. 11-2 Strata CIX Voice Mail Programming 01/07...

[Page 195](#) Test event — message waiting light control—tests for the existence of the LIGHT.ON file in the mailbox's directory. If the file is there, immediately stops processing the rest of the tokens for this mailbox. 11-3 Strata CIX Voice Mail Programming 01/07...

[Page 196: Replaced Or Variable Tokens](#)

Value held in the Calling Party ID buffer. Syntax Number of messages—replaces with the total number of messages for the current mailbox. Syntax %M Number of new messages—replaces with the number of new messages for the current mailbox. Syntax %N 11-4 Strata CIX Voice Mail Programming 01/07...

[Page 197](#) Strategy ES should dial, e.g., pager/beeper telephone numbers. Syntax %V Current day of the week—replaces with the current day of the week, where: Sunday5 Thursday Monday6 Friday Tuesday7 Saturday Wednesday Syntax %W 11-5 Strata CIX Voice Mail Programming 01/07...

[Page 198](#) Length—replaces with the total number of characters in the %Sn variable. Syntax LEN[%Sn] where: LEN[] One of the %S storage variables (range: 0~19). Example

P(LEN[%S1],N) Says the number of characters in %S1 as a number. 11-6 Strata CIX Voice Mail Programming 01/07...

[Page 199: Defined Tokens](#)

Does not continue processing at Mailbox 1000 and instead continues with the next token.
I("%S1",="1234",2000) Continues processing at Mailbox 2000 only if %S1 has the value 1234.
I("%S1",="SPANISH",2000) Continues processing at Mailbox 2000 only if %S1 = SPANISH. 11-7 Strata CIX Voice Mail Programming 01/07...

[Page 200](#) New Message Queue Saved Message Queue Valid mailbox. Can be a variable. Defaults to current mailbox if not specified. Example KD(2,U) Deletes message number 2 in the Urgent Message Queue for the current mailbox. 11-8 Strata CIX Voice Mail Programming 01/07...

[Page 201](#) "answering" mailbox, and the Night Transfer on the DSS console is On. Syntax: KT(XXX)G(YYY) KT() where: Box number used when Night Transfer is On. Box number used when Night Transfer is Off. 11-9 Strata CIX Voice Mail Programming 01/07...

[Page 202](#) DOS suffix .IDX. L() Examples L(ENGLISH) Uses the ENGLISH.IDX system prompt file in the C:\Stratagy ES directory. L(SPANISH) Uses the SPANISH.IDX system prompt file in the C:\Stratagy ES directory. 11-10 Strata CIX Voice Mail Programming 01/07...

[Page 203](#) Menu 5 field. © If the caller makes no selection, Stratagy ES continues processing at the next token. © If the caller makes an invalid selection, Stratagy ES continues processing at the Done chain. 11-11 Strata CIX Voice Mail Programming 01/07...

[Page 204](#) Searches ORDERS.DOC for the first record that has the value of %S1 in field 5. © Replaces the current value of field 9 with %S2. © Replaces the current value of field 12 with %S5. © Saves the record back to the database. 11-12 Strata CIX Voice Mail Programming 01/07...

[Page 205](#) %Sn, F The same as %Sn, \$ except Stratagy ES uses francs and centimes. %Sn, P The same as %Sn, \$ except Stratagy ES uses pesos and centavos. 11-13 Strata CIX Voice Mail Programming 01/07...

[Page 206](#) Mailbox 9000), records nine responses, and stores the responses as one message. Q(G1,G2,E,G3,E) Stratagy ES groups the responses to greetings 1 and 2 as one message and the response to greeting 3 as a different message. 11-14 Strata CIX Voice Mail Programming 01/07...

[Page 207](#) Tab, or Ctrl+I Backslash, the actual \ character One of the %S storage variables (range: 0~19), which stores any response from the serial port. If omitted, Stratagy ES does not wait for a response. 11-15 Strata CIX Voice Mail Programming 01/07...

[Page 208](#) Stratagy ES implements the defined tokens to transfer the call to the Stratagy ES so fax transmission can begin. Typically it would be P(G1), which plays greeting 1: "Start your fax machine at the tone." 11-16 Strata CIX Voice Mail Programming 01/07...

[Page 209](#) C:\Stratagy ES\NEW.TXT, use C:\\Stratagy ES\\NEW.TXT. CAUTION! When creating applications using the J(), T(), and >() tokens, you must use the identical syntax for file identification. Otherwise, fax transmission or reception may fail. 11-17 Strata CIX Voice Mail Programming 01/07...

[Page 210](#) © Stores the contents of field 2 in variable %S2. P(G2)P(%S2,\$) P(G2) Plays Greeting 2: "Your credit line is" P(%S2,\$) Says the value stored in %S2 as a dollar amount: "five thousand dollars." 11-18 Strata CIX Voice Mail Programming 01/07...

[Page 211](#) Z() file Valid DOS file name. Can be a variable. Example Z(CHECK.TXT) Stratagy ES checks if the file CHECK.TXT exists. The file exists, and Stratagy ES executes the RNA chain mailbox. 11-19 Strata CIX Voice Mail Programming 01/07...

[Page 212](#) Note Use two backslashes \\ to signify one backslash \. For example, to specify the file name C:\Stratagy ES\NEW.TXT, use C:\\Stratagy ES\\NEW.TXT. Syntax ?(item,fsfile,uid) where: item Any alphanumeric string. Can contain %S variables. file ASCII text file specified by a

DOS file name. Can be a variable. Valid mailbox. 11-20 Strata CIX Voice Mail Programming 01/07...

[Page 213](#) Note Use two backslashes \\ to signify one backslash \. For example, to specify the file name { } C:\Stratagy ES\NEW.TXT, use C:\\Stratagy ES\\NEW.TXT. Syntax {file} where: file Valid DOS file name. 11-21 Strata CIX Voice Mail Programming 01/07...

[Page 214](#) Options Tab screen's Playback Volume field and by the user with the Play Message Controls ^ () (Chapter 4 — Voice Processing). Syntax (n) where: Volume of current port (range: -8~8). -8 is the softest 0 is the default initial volume 8 is the loudest. 11-22 Strata CIX Voice Mail Programming 01/07...

[Page 215](#) Note Use two backslashes \\ to signify one backslash \. For example, to specify the file name C:\Stratagy ES\NEW.TXT, use C:\\Stratagy ES\\NEW.TXT. Syntax {file} where: file ASCII text file containing valid Stratagy ES tokens. Valid DOS file name. 11-23 Strata CIX Voice Mail Programming 01/07...
