## Introducing Toshiba's IPedge EP Server

Toshiba is proud to announce the release of the IPedge EP system as the newest member of the IPedge family of pure IP systems. The IPedge EP system delivers big-company features at an affordable price for small businesses and branch locations. Like the other IPedge systems, the IPedge EP system performs call processing, voice mail, unified messaging, and media processing which includes conferencing and paging, centralized management, Call Manager unified communications, and more. IPedge EP system

**TOSHIBA**  
**Leading Innovation >>>**  
®  
uses Red Hat  
Enterprise Linux  
security.

The IPedge EP system (shown below) is easy to install. The IPedge EP system supports applications for up to 40 users.

The IPedge EP system can be set on a shelf or table horizontally or vertically using an optional base (shown below). It can also be installed on a standard 19" rack using the optional rack-mount kit.

IPedge EP System

(Vertical View)

IPedge EP system can also connect to a MAS or MicroMAS to run ACD and TASKE, and it can connect to uMobility and other external applications.

Networking between IPedge servers and/or Strata® CIX™ systems is enabled via IPedge Net using one IP address. **Leading Innovation >>>**

## [Page 9: Operating Environment](#)

Toshiba recommends an Uninterruptible Power Supply (UPS) with power conditioning for the IPedge server. The recommended UPS from ONEAC are shown in the table below. The UPS shown in the table include power conditioning. If you already have a UPS in place Toshiba recommends that you install a power conditioner (P/N PC075A-S2S).

[Page 10](#) Strata CIX system users can migrate to IPedge and minimize their investment by using their Strata CIX system as a gateway for PSTN interfaces and DKT telephones. The Strata CIX is networked to IPedge through IPedge Net. 10 of 19 Introducing Toshiba's IPedge EP Server...
