The Grand Tour Electronic Telephone Diagram On-hook/Off-hook Some procedures in this user guide instruct you to perform a step while "on-hook" or "off-hook." These terms refer to the position of the handset. "Off-hook" indicates that the handset should be lifted off of the telephone cradle.

[Page 24](#) Electronic Telephone Diagram The Grand Tour Strata CT Electronic Telephone User Guide November 2001...

[Page 25: Chapter 2 Features](#)

Features This chapter lists all the electronic telephone features in alphabetical order beginning on Page These features apply to all EKTs connected to Strata CT Telephone Systems, but they do not apply to digital telephones (DKTs). Features requiring a telephone equipped with a

speakerphone are noted. Before You Begin If you are a new user of the electronic telephone, you need to find out if your telephone has been set up for Automatic Line Selection and Ringing Line Preference.

[Page 26: Automatic Line Selection](#)

Before You Begin Features Automatic Line Selection You have Automatic Line Selection, if you go off-hook and hear dial tone and NO. 201 the [DN], Exchange, or Pooled Line (PL) LED lights steady. The LCD USING LINE 11 displays the station number () and the seized Exchange Line (11).

[Page 27: Quick Reference](#)

Features Quick Reference Quick Reference The following is a quick reference chart for using your telephone's standard features. Making an Internal Call 1. Lift the handset You hear dial tone. SPKR SPKR SPKR SPKR ...or press ...or a [DN] if you do not have Automatic Line Selection.

[Page 28: Making An Outside Call To An Isdn Trunk](#)

Quick Reference Features The display automatically NO. 203 changes from dialled number 00: 13: 23 to elapsed time after a programmed period. After you hang up, elapsed time is displayed for 15 seconds and then changes to date/time display. 3. Hang up SPKR SPKR SPKR...

[Page 29: Answering Calls](#)

Features Quick Reference Answering Calls When you receive an incoming call, the LCD displays either the Exchange NO. 203 Line (LINE 10 RINGING ... or the station [PDN] (NO. 203 210 CALLING To answer the incoming call Lift the handset The LED changes from incoming call rate to the in-use rate.

[Page 30: Account Code Calls](#)

Account Code Calls Features Account Code Calls Entered before or after a call, Account Codes can be used for a variety of reasons including billing, tracking, and line restriction applications. Account Codes are recorded by the system and can, along with the details of the calls, be printed on a Station Message Detail Recording (SMDR) report.

[Page 31](#) Features Account Code Calls If the system is set for Verified Account Codes, you must enter specific verified codes when entering the Voluntary Account Code or the code is not validated for the SMDR report. 1. After accessing an Your conversation is not NO.

[Page 32: Alarm Reset](#)

Alarm Reset Features Alarm Reset Your Strata CT system can be connected to a facility alarm system. All telephones produce a startling tone whenever this alarm is activated. To reset the alarm ALRM ALRM ALRM ALRM Press Alert Signalling Alert Signalling enables you to send an alert sound to a designated station or partner by pressing a single button.

[Page 33: Automatic Busy Redial \(Abr\)](#)

[Page 49: Call Transfer With Camp-On](#)

Features Call Transfer with Camp-on Call Transfer with Camp-on You can transfer calls to idle or busy [DNs], Hunt Group Numbers, ACD Group [DNs], etc. You cannot transfer (or camp-on) to a station [PDN] or [PhDN] if the station is in the DND mode, unless the station [PDN] or [PhDN] appears on other stations.

[Page 50: Call Waiting](#)

Call Waiting Features Call Waiting You can answer a call that is transferred to your station, even when your station is busy. When another call is camped onto your station, you hear two camp-on tone beeps and the [DN] or Line LED flashes red (on-hold).

[Page 51: Conference Calls](#)

Features Conference Calls Conference Calls This feature enables you to add other parties to an existing call. The following conferencing configurations are possible: Up to two stations and two Exchange lines. Up to three stations and one Exchange Line. Up to four stations. CONF/TRNS CONF/TRNS CONF/TRNS...

[Page 52: Direct Inward System Access \(Disa\)](#)

Direct Inward System Access (DISA) Features Direct Inward System Access (DISA) Outside callers with telephones that send Dual-tone Multi-frequency (DTMF) tones can call on Exchange lines programmed for DISA and dial a [DN] or outgoing Exchange Line without going through an attendant or operator. See the System Administrator for this number. To make an internal DISA Call 1.

[Page 53: Direct Station Selection \(Dss\)](#)

Features Direct Station Selection (DSS) 2. Dial an Exchange Line or If you do not hear dial tone, you must also dial a DISA Exchange Line access security code. See Table 7 on Page 62. code when you hear dial tone ...or dial an Exchange You hear dial tone.

[Page 54: Do Not Disturb \(Dnd\)](#)

Do Not Disturb (DND) Features Do Not Disturb (DND) If your station is in the DND mode, internal, external and transferred calls do not ring your station and OCA calls are denied. You can continue to make calls while in the DND mode. If your [PDN] or [PhDN] appears on other stations, the calls flash on your station and flash or ring the other stations.

[Page 55: Door Phones](#)

Features Door Phones Door Phones Door phones are used to call digital/electronic telephones selected in system programming. When a door phone calls, you hear a distinctive ringing tone, one or five times (set in system programming). You can also call a door phone and monitor the surrounding area. The number of possible door phones vary by Strata CT system, with up to 12 as the maximum for larger systems.

[Page 56: Dtmf Tone Dialling With * And](#)

DTMF Tone Dialling with and # Features To call/monitor a door phone 1. With the handset You hear dial tone and the LED flashes (in-use). off-hook, press a [DN]. 2. Dial the [DN] for the A two-way talk-path exists between your telephone desired door location.

[Page 57: Emergency Ringdown/Hotline Service](#)

Features Emergency Ringdown/Hotline Service Emergency Ringdown/Hotline Service The Emergency Ringdown or Hotline Service feature enables standard telephones to automatically ring a designated extension by going off-hook. Electronic telephones cannot perform this feature, but they can receive Emergency Ringdown or Hotline Service from standard telephones. Emergency Ringdown is used in healthcare facilities, where it is used to assist 205 CALLING callers who may not be able to complete a call by dialling.

[Page 58: Handsfree Answerback](#)

Handsfree Answerback Features Handsfree Answerback You can talk back to internal or incoming Tie-line calls without lifting the handset. Press When the call comes into your station, do not lift the handset; speak toward the telephone in a normal voice level. You hear a single long tone, followed by the caller's voice.

[Page 59: Isdn Outgoing Calling](#)

Features ISDN Outgoing Calling 4. Lift the handset when Your telephone's can be set in system programming Note the party returns. to switch ON/OFF with one touch, to switch OFF only while pressed and held, or to be either ON/OFF at the start of handsfree dialling.

[Page 60: Message Waiting](#)

Message Waiting Features START START START START 5. Press The dialled digits will not be sent until you press this button or until the timer expires. Message Waiting All telephones have a standard MW/FL LED for receiving/retrieving messages left by callers that called a [PDN] that was busy or did not answer.

[Page 61](#) Features Message Waiting 3. After receiving the If the MW/FL LED continues to flash, you have more message(s), place the messages—repeat the Steps to retrieve them. [Page 105: Chapter 4 Dss Console](#)

DSS Console This chapter provides an overview of the Direct Station Selection (DSS) Console that is available for system operators who do not have an attendant console. It describes the features buttons and their associated LEDs. It applies to the DSS Console model HDSS6560 (see image on next page). The DSS Console operates alongside of a electronic telephone to provide the telephone with 60 additional feature buttons.

[Page 106: \[Dss\] Buttons](#)

[DSS] Buttons DSS Console 2039 The button numbers shown in this figure are examples only and may not reflect the numbers Note on your particular station equipment. [DSS] Buttons Each [DSS] button is associated with a particular station in your telephone system. It can be used to transfer an outside call to the associated station or to make a direct call to the associated station.

[Page 107: Features](#)

DSS Console Features Features The LED color indications described here apply to DSS Console models HDSS2060 and HDSS1060. Flash conditions described here apply to all DSS Console models. Calling a Station To call a station [PDN] from a DSS Console, press the [DSS] associated with the station. A station call with a [DSS] button can be made on-hook or off-hook and with Voice First or Tone signalling.

[Page 108: Answering An \(Exchange Line\)](#)

Features DSS Console When the called station answers the call, the [DSS] LED stays steady red, and the Line LED becomes steady red. If the station does not answer before a period set in system programming, the call recalls your station. To transfer call with camp-on to a busy station 1.

[Page 109: Paging](#)

DSS Console Features Paging You can make an announcement page to a group of station telephone speakers selected in system programming with on the DSS Console. (if programmed) can be used for page announcements. See "All Call Voice Page" on Page Call Forward Override Either the [DSS] buttons on your DSS Console or the dial pad on the associated telephone can be set in system programming to ring stations that are in the Call Forward mode instead of being forwarded.
