If you cannot find the information you need, contact Toshiba for assistance. Do not open or mutilate the battery pack. Released electrolyte is corrosive and may cause damage to the eyes or skin, and, if swallowed, may be toxic.

Page 15: Related Documents

Related Documents ––– Related Documents The following documents can be used to reference more information about the Strata DK systems. Strata DK Programming Manual provides all instructions necessary to program the system and system record sheets, including ACD. It also contains the user guides in a reduced-size format.

Page 16: Chapter 1 - The Grand Tour

The Grand Tour Your cordless digital telephone is designed and engineered to work with your Toshiba digital telephone system and provide you with reliability, long life, and outstanding performance. The cordless digital telephone is compatible with all Strata DK systems that support digital telephones (except Strata DK24/56/96 Release 3).

Page 17: Applications

You benefit from much greater performance than other cordless telephones currently available. This means better sound quality, longer range, greater security, multi-line access, helpful LCD display information, and many other important advantages. Strata DK Cordless Digital Telephone 5/99...

Page 18

DKT telephone to the single-line telephone (SLT). An SLT cordless is not only a cumbersome alternative to the Toshiba digital cordless; but also, if you forget to forward your calls, you cannot receive the calls on your SLT cordless.

Page 42: Chapter 5 - Features

Features This chapter gives you all of the cordless digital telephone features in alphabetical order beginning on Page 47. Your cordless digital telephone provides many of the same features as a 2000-series corded digital telephone. In addition to the functions, you can use your cordless digital telephone’s buttons to invoke the features listed below or to gain multiple-line access.

Page 43: Before You Begin

Also see the Digital Telephone User Guide for more information. Before You Begin If you are a new user of the cordless digital telephone, find out if your Strata DK system has Tone or Voice First Signaling. The difference is Tone Signaling rings while Voice First Signaling notifies you with a long tone, and then the caller’s voice.

Page 44: Quick Reference

The following topics are quick references for using your telephone’s standard features. Making an Outside Call You can make calls to or receive calls from telephones outside of the Strata DK system by dialing direct or and using CO Line Access Codes.

Page 45: Making An Outside Call To An Isdn Trunk

“ISDN Outgoing Calling” on Page for more information on ISDN calls. Making an Internal Call You can make calls to and receive calls from other stations in the Strata DK system. To dial an internal call 1. Press or a [DN].
