Description

The Self-Cleaning operation is to minimize the growth of mold, bacteria etc. by running the fan and drying so as to keep the inside of the air conditioner clean.

Self-Cleaning operation

When the cooling or dry operation shuts down, the unit automatically starts the Self-Cleaning operation which is then performed for the specified period based on duration of the operation which was performed prior to the shutdown, after which the Self-Cleaning operation stops.

(The Self-Cleaning operation is not performed after a heating operation.)

1) When the stop signal from the remote controller or timer-off function is received, only the timer indicator light.

2) The period of the Self-Cleaning operation is determined by the duration of the operation performed prior to the reception of the stop code.

3) After the Self-Cleaning operation has been performed for the specified period, the unit stops operating.
