from the error input.

Error input 5 times

Purifier power OFF

after power failure) or RESET button is pressed while the FILTER indicator is turned on, the air purifier is not turned on until the integrated operation time of the indoor fan exceeds 1 hour after operation start (It is not the air purifier operation time).

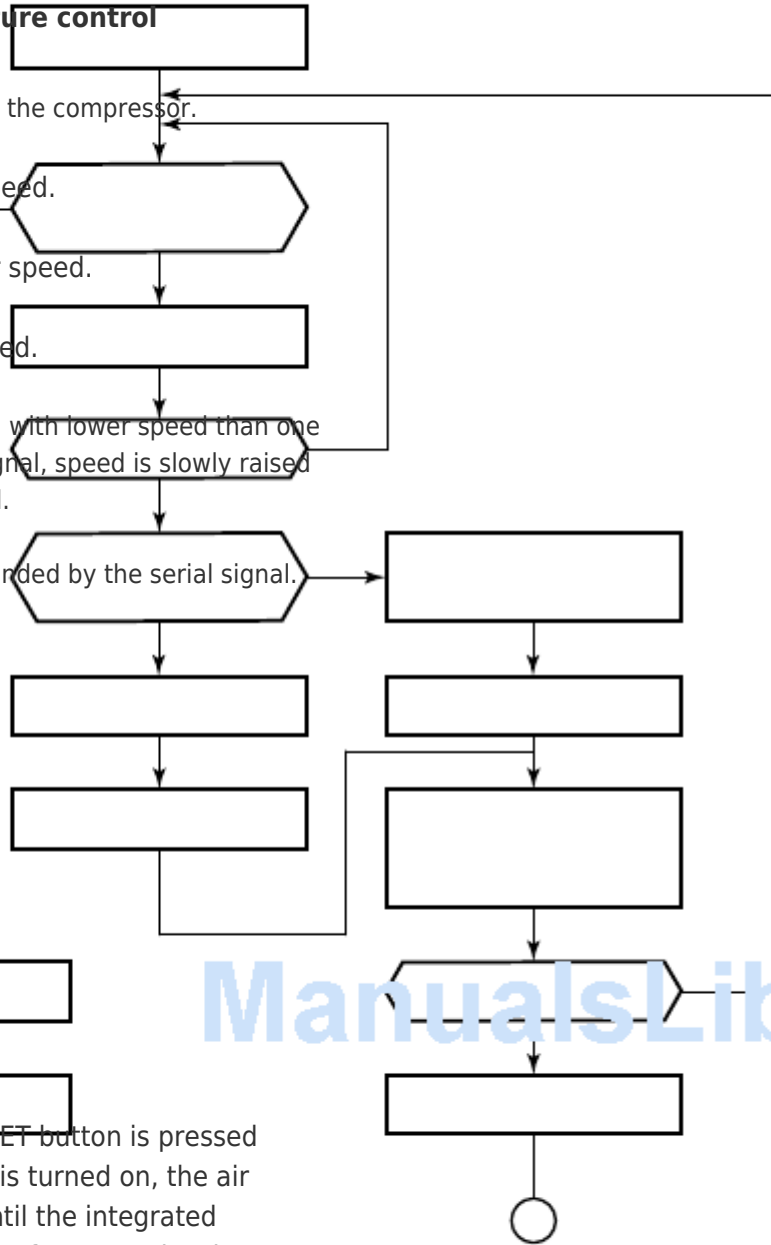

It is the safety measures considering an incomplete drain when electric dust collector has been cleaned with water.

Control operation

1. Purpose

The air purifying control function is to alert the user to trouble in the ionizing or air purifying operation.

2. Description

ManualsLib.com

Trouble is determined to have occurred (indicated by the FILTER indicator) in the following four cases.

- 1) When a count of 1000H has been
- 2) When the panel switch has been set to
- 3) When an abnormal discharge caused
- 4) When the electric dust collector has

3. Operation

The sequence that FILTER indicator is NO turned on are described in the left flowchart.

- 2) A trouble detected within 1 minute
- 3) In case that 1 minute passed after

1. Purpose

This function detects error on the refrigerating cycle or error on the compressor, and performs protective control.

2. Operation

- Control of the compressor speed

- 43 -

Description

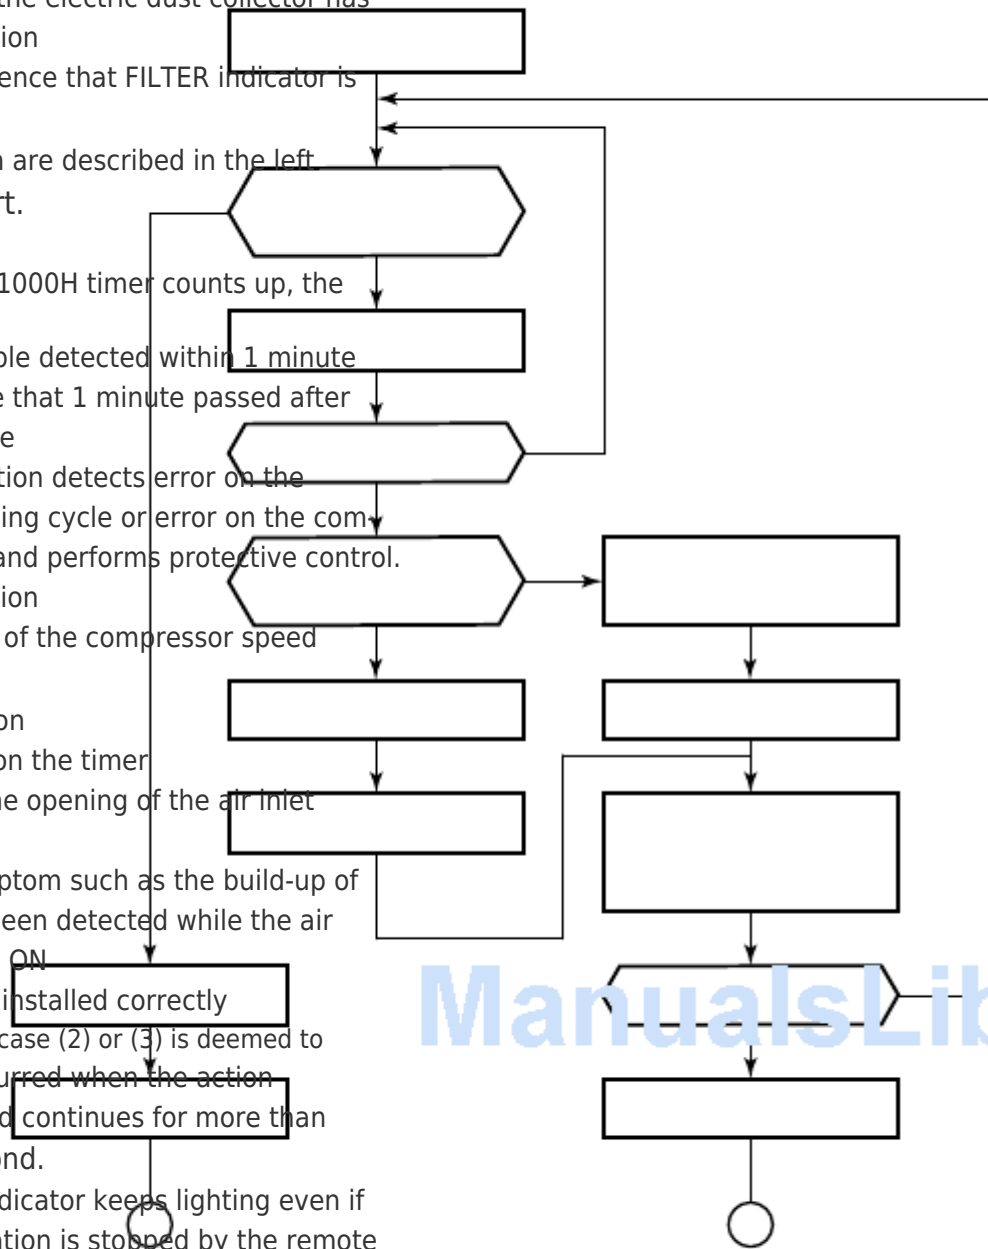

reached on the timer OFF by the opening of the air inlet grille, etc. by a symptom such as the build-up of dirt has been detected while the air purifier is ON

not been installed correctly
 * Trouble case (2) or (3) is deemed to have occurred when the action concerned continues for more than one second.

FILTER indicator keeps lighting even if the operation is stopped by the remote controller.

The timer is stored in memory of the microcomputer, and the operation time is cleared by filter RESET button on the indoor unit or a power failure. (FILTER indicator goes off.)

after activation of the air is immediately judged as an error and the FILTER indicator goes on. activation of the purifier, the purifier is turned off while the PURE indicator

keeps ON. After 10 minutes passed, restart the purifier and an error is judged again.

The speed control is performed as described in the left table based upon the discharge temperature.
