5. Schedule Timer

I How to Set Holidays in a Scheduled Week of Operation

Operations programmed for a specific day during the week can be temporarily disabled by setting that day as a holiday.

- When the set holiday passes, the holiday setting is canceled and operation is resumed as programmed the following week.

- Holidays can be selected for the week starting from today's day. If today is selected as a holiday, the holiday setting is canceled from the next programmed operation. (Depending on the program, if the program is currently running, the program may not stop.)

Example Setting

Today is Thursday and Friday is set as a holiday.

STEP 1

Press the **GROUP** button to select a group to go on holiday.

NOTE

Depending on installation conditions, group selection is disabled or set so that all groups are automatically selected for the holiday feature. If so, proceed to the next step.

STEP 2

Press the **HOLIDAY** button.

"HL" starts blinking in the present time display area and today's day of the week starts blinking.

STEP 3

Select a day as the holiday using the **DAY** button, and press the **SET** button.

To select other holidays, select a day using the **DAY** button and set it with the **SET** button.

If you made a mistake or want to cancel a holiday,

press the **CLEAR** button.

When Friday comes, the program set for that day does not run.

3 - 73

Control of Mini ECO-i SYSTEM

When Saturday comes, Friday's holiday setting is canceled.
