Fig. 3-87 shows an example of installation.

Air-outlet grille

3-27.

Installing the Drain Piping

(1) Prepare a standard hard PVC pipe (O.D. 32 mm) for the drain and use the supplied hose band to prevent water leaks.

The PVC pipe must be purchased separately.

When doing this, leave a gap between the drain socket of the unit and the PVC pipe to allow the drainage to be checked. The transparent drain pipe allows you to check drainage. (Fig. 3-88)

CAUTION

(2) After connecting the drain piping securely, wrap the supplied packing and drain pipe insulator around the pipe, then secure it with the supplied clamps. (Fig. 3-89)

NOTE

Make sure the drain pipe has a downward gradient (1/100 or more) and that there are no water traps.

Air outlet duct
Ceiling material
Tighten the hose clamps so their locking nuts face upward. (Fig. 3-88)
