[Page 6: Preface](#)

The term “e-Filing” in this manual is an abbreviation of “electronic filing”. Lineup of Our Manuals Thank you for purchasing the TOSHIBA multifunctional digital systems e-STUDIO452 Series or e-STUDIO282 Series. We have provided you with these manuals for the operation of this equipment. Select and read the manual best suited to your needs.

[Page 7](#) Operator’s Manual Basic Functions This Operator’s Manual Basic Functions describes how to use the basic functions of this equipment mainly focusing on the copying function. Also this manual contains safety precautions for users to be observed. Be sure to read it first carefully. User Functions Guide This User Functions Guide describes the functions and settings under the [USER FUNCTIONS] button on the control panel of this equipment.

[Page 8](#) Network Administration Guide This Network Administration Guide explains the guidelines for setting up network servers to provide various network services, and troubleshooting for network administrators. Printing Guide This Printing Guide explains how to install the client software for printing from Microsoft Windows, Apple Mac OS, and UNIX computers, and print to the equipment.

[Page 9](#) Viewer The e-BRIDGE Viewer provides the functions to view and find the documents in e-Filing boxes on the TOSHIBA e-STUDIO MULTIFUNCTIONAL DIGITAL SYSTEMS from a client computer via TCP/IP network, and also it can view and find the files in your computer.

[Page 10: Precautions In This Manual](#)

Precautions in this manual To ensure correct and safe use of this equipment, this operator’s manual describes safety precautions according to the three levels shown below. You should fully understand the meaning and importance of these items before reading this manual.

[Page 14: Features And Functions](#)

1 Overview Features and Functions This equipment provides the network fax feature, which simplifies and facilitates your office fac-simile needs that enables you to send fax or Internet

fax digital documents directly from your desktop. This equipment also includes an Address Book database, where you can store frequently used fax numbers or Internet Fax destinations and other important recipient information, such as company name, telephone number and postal address.

[Page 15](#) **Address Book Viewer** With the Address Book Viewer you can easily add or modify fax recipient names, fax numbers, and Internet Fax address (e-mail address) to the Address Book. This utility allows you to manage recipients of the fax, select and display fax recipients from the Address Book, as well as recipient fax numbers and other contact information.

[Page 18: Chapter 2 Installing Client Software](#)

2 **Installing Client Software** Installing Network Fax Software This chapter includes procedures for installing software required to enable the fax printing and online address books for this equipment. It is recommended that you read these instructions in their entirety before beginning the installation process. Overview Before you can begin utilizing the network fax feature for this equipment, you must install the software using the Client Utilities CD-ROM provided.

[Page 19](#) This section describes about installing the N/W-Fax driver and Address Book Viewer in an SMB environment. The N/W-Fax driver can be set up using the same connection as a printer driver such as USB printing, LPR printing, IPP printing, and Novell printing. To set up the N/W-Fax driver using these connections, please refer to the Printing Guide.

[Page 20](#) 2 **Installing Client Software** Select "I accept the terms of the license agreement" and click [Next]. The Setup Type screen is displayed. Select "Custom" and click [Next]. The Select Components screen is displayed. Installing Network Fax Software...

[Page 21](#) Check the software that you want to install and click [Next]. TOSHIBA e-STUDIO N/W-Fax — check this to install the N/W-Fax driver. TOSHIBA e-STUDIO AddressBookViewer — check this to install the Address Book Viewer. The Choose Destination Location screen is displayed.

[Page 22](#) 2 **Installing Client Software** When the equipment is automatically found in the network, the "Device on Network" option is selected and the found devices are displayed in the list. Select the equipment that you want to connect and click [Next]. The Select Program Folder screen is displayed.

[Page 23](#) 3. The Browse for Folder dialog box appears. Locate this equipment in your network, select the "print" queue, and click [OK]. - Do not select "pcl6", or "ps3" queue. These queues only accept the print job in each emulation. If you install several printer drivers and specify one of these queues, the print job may not be printed properly due to mismatch of the emulations between the print job and queue.

[Page 24](#) 2 **Installing Client Software** Click [Finish]. If you selected to install TopAccessDocMon during the installation, the system may ask whether you want to view the Readme file and launch TopAccessDocMon. The Installer may ask you to restart your computer. If it does, select "Yes, I want to restart my computer now."...

[Page 25: Installing From Topaccess](#)

Installing from TopAccess If the system administrator has uploaded the software to this equipment, you can use TopAccess to install the software on your workstation. When using Windows Server 2003 that the Service Pack is installed, the installation from TopAccess cannot be performed.

[Page 26](#) 2 **Installing Client Software** Click the "Install Client1" link to download the installer file. Download the installer file on your desktop by following the prompts. Double-click the "InstallClient1.exe" file that you downloaded. The installer starts and the InstallShield Wizard dialog box appears. Follow the installation procedure using the Client Utilities CD-ROM

described in following section.

[Page 27: Uninstalling The N/W-Fax Driver And Address Book Viewer](#)

Uninstalling the N/W-Fax Driver and Address Book Viewer The following instructions describe how to uninstall the N/W-Fax driver and Address Book Viewer. The uninstallation procedure is different depending upon how you installed the client software. P.27 “When Installed Using the Installer” P.32 “When Installed Using Add Printer Wizard”...

[Page 28](#) 2 Installing Client Software Select “TOSHIBA e-STUDIO452 Series Client” or “TOSHIBA e- STUDIO282 Series Client” and click [Change/Remove]. The InstallShield Wizard dialog box appears. Select “Remove” and click [Next]. The Confirm Uninstall dialog box appears. Click [OK]. Uninstalling the N/W-Fax Driver and Address Book Viewer...

[Page 29](#) Click [Yes] to delete the setting files. Deleting files starts. If you want to re-install the client software later, click [No] to remain the setting files. You can restore the data and settings when you re-install the client software. Select “Yes, I want to restart my computer now.” and click [Finish] to restart your computer.

[Page 30](#) 2 Installing Client Software Open “Control Panel” and click the “Add/Remove Programs” icon. The Add/Remove Programs dialog box appears. Select “TOSHIBA e-STUDIO452 Series Client” or “TOSHIBA e- STUDIO282 Series Client” and click [Change/Remove]. The InstallShield Wizard dialog box appears. Uninstalling the N/W-Fax Driver and Address Book Viewer...

[Page 31](#) Select “Modify” and click [Next]. Uncheck the components that you want to uninstall and click [Next]. Click [Next]. Uninstalling the N/W-Fax Driver and Address Book Viewer...

[Page 32: When Installed Using Add Printer Wizard](#)

2 Installing Client Software Click [Yes] to delete the setting files. Deleting files starts. If you want to re-install the client software later, click [No] to remain the setting files. You can restore the data and settings when you re-install the client software. Click [Finish].

[Page 33](#) Click the [File] menu and select [Server Properties]. The Print Server Properties dialog box appears. Display the Drivers tab. Select the N/W-Fax driver and click [Remove]. The confirmation dialog box appears. Click [OK]. The N/W-Fax driver is completely deleted. Uninstalling the N/W-Fax Driver and Address Book Viewer...

[Page 34: Repairing Client Software](#)

2 Installing Client Software Repairing Client Software When the client software will not work correctly, you can repair the client software. Repairing Client Utilities Software The following describes an installation on Windows XP. The procedure is the same when other versions of Windows are used.

[Page 35](#) Select “Yes, I want to restart my computer now.” and click [Finish] to restart your computer. Repairing Client Software...

Faxing from Client Computers This section describes the instructions on how to send a fax using the N/W-Fax driver. Faxing from Applications.....38 How to Fax using the N/W-Fax Driver.....38 Setting up the N/W-Fax Options52 Sending with Extended Fax Functionality57 Managing Faxes61 Managing Fax Jobs using TopAccessDocMon61 Managing Fax Jobs using TopAccess.....62...

[Page 38: Faxing From Applications](#)

3 Faxing from Client Computers Faxing from Applications You can use the N/W-Fax driver option to electronically fax and Internet Fax from your computer to one or more recipients. In addition, you can select fax properties, fax schedule options, include fax cover sheets and edit sender information.

[Page 39](#) Select “TOSHIBA e-STUDIO Series Fax” and Click [Properties]. The properties dialog box appears. The procedures for displaying the properties dialog for the printer driver may be different depending on the application you are using. See your application’s manual about dis-

playing the printer properties dialog box.

[Page 40](#) 3 Faxing from Client Computers When you want to send a document with a fax cover sheet, display the Cover Sheet tab, select the cover sheet type in the “Cover Sheet” drop down box and specify the other options. If you enable the “Sender Information” option, continue to the next step and specify the message to appear as the sender information.

[Page 41: Specifying Recipients](#)

When you enable the “Sender Information” option in the Cover Sheet tab, display the Sender Information tab and enter the sender information message to appear the message on the fax cover sheet. In the text field in the Sender Information tab, up to 500 characters can be entered. For instructions on how to set the Sender Information, see the following section.

[Page 42](#) 3 Faxing from Client Computers P.51 “Removing recipients” Specifying recipients from Address Book Click [Select From Address Book] in the Send tab. The Address Book Viewer is launched. Faxing from Applications...

[Page 43](#) Browse the address book category within the Address Book where desired recipients are programmed. Private Address Book — This contains the contacts registered in the associated client address book on your client computer. Public Address Book — This contains the contacts registered in the address book in this equipment.

[Page 44](#) 3 Faxing from Client Computers Select the contact you want to add as a recipient and click the [Fax] icon () in the tool bar to add the fax number as a recipient, and click the [Mail] icon () to add the e-mail address as a recipient.

[Page 45](#) After you selected all recipients, right-click on a recipient name in the right pane and select [Selection] in the menu displayed. The Destinations dialog box appears. You can also display the Destinations dialog box by clicking the [Selection] icon () in the tool bar.

[Page 46](#) 3 Faxing from Client Computers The Address Book Viewer is closed and selected recipients are added to the “To” list. Searching recipients from address book Click [Select From Address Book] in the Send tab. The Address Book Viewer is launched. Faxing from Applications...

[Page 47](#) Click the [Edit] menu and select [Find]. The Find Contact dialog box appears. Select a address book to search contacts in the “Data Source” drop down box. The default address book in the “Data Source” can be set by selecting [View] - [Default Configuration] - [Data Source] from the menu bar.

[Page 48](#) 3 Faxing from Client Computers Display the Person tab and enter search text in the following fields that you require. Name — Enter the search characters or string to search by the first name. Fax Number — Enter the search characters or string to search by the contact fax number.

[Page 49](#) Check the “Email Address” check box if you want to add the Email address of the selected contacts as the destinations, and check the “Fax Number” check box if you want to add the fax number of the selected contacts as the destinations. The default destination type in the “Type Selection”...

[Page 50](#) 3 Faxing from Client Computers The Address Book Viewer is closed and selected recipients are added to the “To” list. Entering a recipient manually Click [New]. The Direct Dial dialog box appears. To add an Internet Fax address as a recipient, select “Internet Fax Address”...

[Page 51: How To Setup](#)

To add a fax number as a recipient, select “Fax Number” and enter the fax number in the right field. In addition, if you specify a Sub address, enter the Sub address in the “SUB” field, and security password for the Sub address in the “PWD” field if required. You can send to a fax number only when the optional Fax unit is installed.

[Page 52: Setting Up The N/W-Fax Options](#)

How to display: Click the [File] menu and select [Print] on an application. Select "TOSHIBA e-STUDIO Series Fax" and Click [Properties]. Setting up the N/W-Fax Options N/W-Fax options are the attributes you set to define the way a fax job is transmitted. For example, you can specify the recipients, resolution, and paper size.

[Page 53](#) To specify the recipients, you can select from the Address Book or enter the recipient manually. P.41 "Specifying Recipients" 1) To This displays the specified recipients list. 2) [Select From Address Book] Click to launch the Address Book Viewer. You can select recipients from the Address Book. P.42 "Specifying recipients from Address Book"...

[Page 54](#) 3 Faxing from Client Computers 6) Dept. Code Enter 5-digit department code if required. When the department code is enabled on this equipment, you must enter the department code to send a fax. If you do not enter the department code when the department code is enabled on the equipment and the Department Code Enforcement is set to OFF in TopAccess, the job will be stored in the Invalid job list without transmitting the job.

[Page 55: Setting Up The Cover Sheet Properties](#)

Setting up the Cover Sheet Properties In the Cover Sheet tab of the N/W-Fax properties dialog box, you can specify the fax cover sheet to be sent. If you enable the cover sheet, the cover sheet is attached in the first page of the document and sent to the recipients.

[Page 56: Setting Up The Sender Information Properties](#)

3 Faxing from Client Computers Setting up the Sender Information Properties In the Sender Information tab of the N/W-Fax properties dialog box, you can specify the sender information that appears on the cover sheet. This must be set only when the "Sender Information"...

[Page 57: Sending With Extended Fax Functionality](#)

Sending with Extended Fax Functionality The N/W-Fax driver allows users to perform the following features. P.57 "Saving a Fax as File" P.57 "Delayed Transmission" P.58 "Sending with a Cover Sheet" Saving a Fax as File You can save a document in the "TXFAX" folder in the "FILE_SHARE" folder in this equipment as well as sending the document to fax numbers and Internet Fax addresses.

[Page 58: Sending With A Cover Sheet](#)

3 Faxing from Client Computers Click [Edit]. The Scheduled Time dialog box appears. Select the date and time and click [OK]. You can click the Date arrow to display a calendar then allows you to select an date. Enter the time to commence the fax transmission. You can use the up and down arrows to assist with setting the time with the proper format.

[Page 59](#) Enter the subject to appear on the cover sheet in the "Subject" field. You can enter up to 40 characters for the subject. Enter the message to appear on the cover sheet in the "Message" field. You can enter up to 500 characters for the message. If you want the sender information to appear on the cover sheet, check the "Sender Information"...

[Page 60](#) 3 Faxing from Client Computers If you want the recipients information to appear on the cover sheet, check the "Recipients Information" box and check the items required for the recipient information. Name — Check this to have the name of the recipient appear on the cover sheet. Company —...

[Page 61: Managing Faxes](#)

Managing Faxes You can display manage the fax jobs using TopAccessDocMon and TopAccess. P.61 "Managing Fax Jobs using TopAccessDocMon" P.62 "Managing Fax Jobs using TopAccess" Managing Fax Jobs using TopAccessDocMon Users can use the TopAccessDocMon application's Fax tab to display the fax jobs that are currently on this equipment.

[Page 62: Managing Fax Jobs Using Topaccess](#)

3 Faxing from Client Computers Click the Fax tab. The fax jobs list is displayed. If you want to delete a fax job, select a fax job in the list, click the [Document] menu and select [Cancel]. The selected job is deleted. Managing Fax Jobs using TopAccess Users can use TopAccess to display the fax jobs that are currently on this equipment.

Page 63 Managing Address Book This section describes the instructions on how to use the Address Book Viewer. Running Address Book Viewer	64

Managing Contacts and Groups.....	88
Converting the Address Book Data.....	108..

[Page 64: Running Address Book Viewer](#)

From the Program Group, you can access the Address Book Viewer to create and edit your private address book. Accessing the Address Book Viewer from the Programs group Click the [Start] menu, select [All Programs], [TOSHIBA e-STUDIO Client], and select [TOSHIBA e-STUDIO AddressBookViewer].

[Page 65](#) This method is only suggested if you are in the process of sending a fax and you need to add a fax recipient to the send list that is not currently a member of the Address Book. Otherwise, use the program group to access the Address Book Viewer. Accessing the Address Book Viewer from the Print properties In the Print dialog box in the application, select the N/W-Fax driver for the printer and click [Properties].

[Page 66: About Address Book Viewer Interface](#)

4 Managing Address Book Then the Destinations dialog box appears. [Remove] — Click this to remove the selected contacts from the destinations list. [OK] — Click this to add these contacts as the destinations. [Cancel] — Click this to cancel the selection. [Help] —...

[Page 67: Using Commands](#)

3) Browse Pane You can expand or collapse to view/hide Groups and Contact address book entries. The browse pane contains a tree structure for the following address books: - Private Address Book — This contains the contacts registered in the associated client address book on your client computer.

[Page 68](#) 4 Managing Address Book - Import -vCard File — Select this to import the address book data that had been exported as vCard files from e-STUDIO3510c Series, e-STUDIO451c Series, e-STUDIO850 Series, e-STUDIO4511 Series, e-STUDIO450 Series, e-STUDIO280 Series, GL-1010 address book using the Address Book Viewer. The data will be imported in the “Import Address Book”.

[Page 69](#) 5) Help The following commands can be selected in the Help menu. - Contents and Index — Select this to display the Online Help. - About TOSHIBA e-STUDIO Address Book — Select this to display the version information. Toolbar You can use following tool icon to perform various functions quickly.

[Page 70](#) 4 Managing Address Book (Mail) — Click this to add the e-mail addresses of selected contacts as destinations to be sent using the N/W-Fax driver. This icon is available only when accessing the Address Book Viewer from the N/W-Fax driver properties dialog box and selecting contacts. (Confirm Selection) —...

[Page 71: Managing Address Book](#)

N/W-Fax driver. The Address Book Viewer also displays a public address book that is the address book in the compatible TOSHIBA equipment, such as e-STUDIO3510c Series, e-STUDIO451c Series, e-STUDIO850 Series, e-STUDIO4511 Series, e-STUDIO450 Series, e-STUDIO280 Series, and GL-1010 controller for the e-STUDIO35/45. Using the Address Book Viewer, you can display the contacts or groups in the address book and they can be copied to your private address book.

[Page 72: Managing The Public Address Book](#)

4 Managing Address Book Managing the Public Address Book In order to access the public address book in e-STUDIO3510c Series, e-STUDIO451c Series, e-STUDIO850 Series, e-STUDIO4511 Series, e-STUDIO450 Series, e-STUDIO280 Series, and GL-1010 controller for the e-STUDIO35/45, you must configure the connection to the device. You can configure the connection by searching the device in the network, or entering the IP address of the device manually.

[Page 73](#) Click [Start Discovery] to begin the process. It locates all the compatible devices in

your network. You can quit the process by clicking [Stop Discovery]. If the process continues for a long time, it is because the too many network clients are in the network.

[Page 74: Configuring Discovery Settings](#)

4 Managing Address Book Configuring Discovery Settings You can configure the discovery settings. 1) Devices Click the arrow button to display the pull down list and check the model name that you want to search. 2) Network - Enable IPX/SPX Search This is disabled because the Address Book Viewer does not support the IPX/SPX connection.

[Page 75](#) Configuring the connection manually Click the [Tools] menu and select [Device Setting]. The TopAccessDocMon Local Discovery dialog box appears. Click [Manual Selection]. The Manual Selection dialog box appears. Managing Address Book...

[Page 76: Downloading The Public Address Book](#)

4 Managing Address Book Enter each item to specify the printer address. IPv4 Address — Enter the IPv4 address of the printer. IPv6 Address — Enter the IPv6 address of the printer. IPX Address — This is disabled because the Address Book Viewer does not support the IPX/SPX connection.

[Page 77: Configuring The Mapi Address Book](#)

The Address Book Viewer downloads the address book data that is backed up in the equipment using TopAccess through FTP. Backing up the address book data can be operated by an administrator. If the address book data is old, please ask your administrator to backup the address book data.

[Page 78: Managing The Microsoft Outlook Address Book](#)

4 Managing Address Book Managing the Microsoft Outlook Address Book The Address Book Viewer automatically accesses the Microsoft Outlook Express Address Book to obtain the address book data. You use the MS Outlook address book to copy the contacts and groups to the private address book. P.92 “Copying Contacts from an Address Book”...

[Page 79](#) In the General tab, enter the items as described below. Directory Server Name — Enter the server name or IP address of a LDAP server. This Server requires me to log on — Check this if the LDAP server requires the user name and password to log on.

[Page 80](#) 4 Managing Address Book Click [Add]. The entered directory service is added to the Directory Service list. Repeat the procedure from Step 2 to Step 3 until all required directory services are added. Click [Close]. — Adding Contacts from LDAP Servers After you register the LDAP directory services, you can search contacts in the LDAP servers and add preferred contacts to the LDAP Address Book.

[Page 81](#) Display the Person tab and enter search text in the following fields that you require. Name — Enter the search characters or string to search by the contact name. Fax Number — Enter the search characters or string to search by the contact fax number.

[Page 82](#) 4 Managing Address Book Select contacts that you want to add to the LDAP Address Book, and click [Add]. The selected contacts are added to the LDAP Address Book. Searching contacts by detailed search conditions Click the [Edit] menu and select [Find]. The Find Contact dialog box appears.

[Page 83](#) Display the Detail Setting tab and select a field to search in the “Field Select” drop down box. Select how it searches contacts in the “Condition of search string” drop down box. Contains — Select this to search contacts that contain the search string. Is —...

[Page 84: Importing And Exporting The Address Book](#)

4 Managing Address Book Repeat the procedure from Step 3 to Step 6 to add all required conditions. You can remove the search conditions you have added. To do this, select the condition and click [Delete]. Click [Search]. It begins searching contacts in the LDAP server. When it completes searching, found contacts appear in the list at the bottom of the dialog box.

[Page 85](#) The CSV file to import the Address Book Viewer must be created as the comma separated file in the following format: Group Name,Contact Key,Prefix,First Name,Last
