[Page 7: Plan The Interface](#)

Plan the Interface The system administrator programs the telephone system for use with the Wireless Telephone System using the normal administration terminal or procedures. Programming can be done after the handsets are registered. Recommended programming includes assigning extension numbers to the handsets and programming features on the telephone system so they are easily accessible from the handsets.

[Page 8](#) LinkPlus Interface Guide: Toshiba Strata DK/CTX System "model" handsets then use the model as a template to program the other handsets. • All handsets are different: All handsets are programmed differently, so each handset will be programmed individually. Before installation, verify the features assigned to the wired telephones to plan the system and extension programming required for the handsets.

[Page 9: Assign Extension Numbers](#)

Plan the Interface on the handsets. These assignments should emulate assignments on the user's wired set. Assign Extension Numbers The wire contractor should inform the system administrator which port numbers have been designated for the handsets. The system administrator may use the Extension Assignments Worksheet at the end of this document to track the port numbers, extensions, users, and features assigned to handsets.

[Page 10: Feature Programming Requirements](#)

LinkPlus Interface Guide: Toshiba Strata DK/CTX System Feature Programming Requirements When planning the interface, the following information must be taken into account: Line sequences The handset uses two types of key sequences to access PBX features and multiple lines. Line sequences are those where the user presses key and then a number key.

[Page 11](#) Plan the Interface SpectraLink 6100 MCU For the SpectraLink 6100 MCU, the handset function menu text can only be changed via remote configuration through the services of Polycom's Customer Support. SpectraLink 8000 Telephony Gateways Function menu text options can be changed in the Administration Console of the SpectraLink 8000 Telephony Gateways.

[Page 12](#) LinkPlus Interface Guide: Toshiba Strata DK/CTX System follow the cadence provided by the system switch. Call progress tones provided by the host system will be passed through to the handset. PN: 1725-36145-001_D.doc...

[Page 13: Interface Implementation](#)

Interface Implementation This section describes the recommended programming to use the Wireless Telephone System with a Toshiba Strata DK/CTX key telephone system. The procedures assume: • The Toshiba system is installed and operational in an approved configuration. See the Telephone Switch Interface Matrix document for tested configurations.
