TOSHIBA

Media Application Server Hardware

Toshiba is excited to announce the third generation of our popular Media Application Server (MAS). This new 2U rack mountable chassis incorporates the latest server motherboard and Dual Core Central Processing Unit (CPU) technology from Intel®, thereby improving the overall performance of

Toshiba's full suite of MAS applications. Also available are new platform options, specifically a Windows Server 2003 model, an optional dual redundant power supply, and RAID1 or RAID5 hard drive redundancy.

Description

This new MAS platform includes the following features and options;

- Intel Pentium® Dual Core 1.8 gigahertz CPU
- Dual core technology provides optimal performance with less power.
- Intel Server Motherboard (Snow Hill) - Intel 3210 chip set
- Windows® XP Professional (standard) - Windows Server 2003 (Optional)
- Front panel - Hard drive activity LED
- Front panel - Reset button - CPU reset
- Internal PCI slots - Two full PCI slots for installation of fax modem boards.
- Optional SATA RAID 1 or SAS RAID 5 hard drive redundancy.
- Optional Dual Redundant Power Supplies
- RoHS Compliant (Restricted use of Hazardous Substances Directive)
Supports Toshiba's mandate of environmental responsibility.

Note

Systems configured with RAID 5 redundant hard disk drives can support only one PCI fax modem card (maximum eight fax ports).
